

Baselode Energy Corp. Appoints Cameron MacKay to Vice-President, Exploration & Development

15.12.2021 | [CNW](#)

TORONTO, Dec. 15, 2021 - [Baselode Energy Corp.](#) (TSXV: FIND) (OTCQB: BSENF) ("Baselode" or the "Company") is pleased to announce that Mr. Cameron MacKay has been appointed Vice-President, Exploration & Development.

Cameron has been instrumental for the Company's success and discovery of the high-grade Uranium ACKIO zone on the Company's Hook project, as well as managing the technical and logistical requirements for Baselode's project portfolio. Prior to joining Baselode, Cameron had spent five years with Purepoint Uranium Group (TSXV: PTU) as Senior Exploration Geologist helping delineate the high-grade Uranium Spitfire prospect. His technical background also includes working as a Senior Bedrock Mapper with the Canada-Nunavut Geoscience Office. He is currently a member in good standing with the Association of Professional Engineers and Geoscientists of Saskatchewan, and holds an M.Sc. in Geology from the University of Saskatchewan.

"It's been my sincerest pleasure to work closely with Cameron since he joined Baselode in November, 2020. I've learned a lot from his technical expertise and we have complimented each others strengths. I'm very happy to have Cameron progress in the Company in a more executive role as his strengths are truly befitting the position," said James Sykes, Baselode's CEO, President & Director.

About Baselode Energy Corp.

Baselode currently controls 100% of approximately 227,000 hectares for exploration in the Athabasca Basin area, northern Saskatchewan, Canada. The land package is free of any option agreements or underlying royalties.

Baselode's Athabasca 2.0 exploration thesis is focused on discovering near-surface, basement-hosted, high-grade uranium orebodies outside of the Athabasca Basin. The exploration thesis is further complemented by the Company's preferred use of innovative and well-understood geophysical methods to map deep structural controls to identify shallow targets for diamond drilling.
