

Jourdan Announces Elevated Li₂O Grades From Its Drillhole Campaign

20.12.2021 | [GlobeNewswire](#)

TORONTO, Dec. 20, 2021 - [Jourdan Resources Inc.](#) (TSXV: JOR; OTCQB: JORFF) ("Jourdan" or the "Company") is pleased to publish the next partial assay results of its September/October 2021 drilling campaign on its flagship Vallée project, which is located 35km north of Val-d'Or in Quebec, Canada. The results are from the first five drill holes and show multiple distinct zones of pegmatite intersections.

Highlights of Line 2*:

Highlights

Drill hole	From (m)	To (m)	Length (m)	Li ₂ O (%)
VAL21-2-2	87.9	88.8	0.9	1.23
VAL21-2-3	207.0	208.0	1	1.36
VAL21-2-4	167.4	168.3	0.9	1.62
VAL21-2-5	99.75	100.85	1.1	1.19
VAL21-2-5	102.5	103.5	1.05	1.52

*drill core width only; does not represent true width

As mentioned in a press release dated October 15, 2021, the Company has completed its previously announced diamond drilling program, with 1,682 meters of drilling completed in October 2021. The Company has now received 62% of assay results from the program and awaits further assays from the program in which every hole showed multiple intersections of spodumene-bearing pegmatite. These last results are expected before the holidays.

The drill program was completed by Les Forages G?o-Nord of Dolbeau-Mistassini, Quebec, under the supervision of Alexandr Beloborodov G?ologue Inc. (ABG Exploration) of Laval, Quebec.

The pegmatite dykes appear to become more abundant and wide further northwards and it is Jourdan's intention to expand on historical drillholes during the next campaign.

Jourdan's Chief Executive Officer, Rene Bharti, commented, "The latest drill results appear to confirm the commercial grade lithium that Jourdan possesses within its large land package. These results will keep us moving closer towards defining a resource, which will be a vital next step in becoming Quebec's next lithium producer."

"We are excited to report these grades of our second fence line drilled since 2011", said Dr. Andy Rompel, Executive Chairman of Jourdan, "and we are keenly awaiting the next results for the remaining three holes. We feel extremely encouraged to continue drilling on our Vallée property to build on what is already known and to expand known deposits northwards and eastwards."

All samples have been sent to Impact Global Solutions Inc. Laboratory in Delson, Qu?bec ("IGS") for analysis by sodium peroxide fusion and ICP finish. This laboratory is recognized by the industry and accredited ISO/MEC 17025 by the Standards Council of Canada. In addition to the quality assurance and quality control ("QA/QC") employed by IGS, Jourdan developed a rigorous QA/QC protocol for its operators, including the insertion of analytical standard samples, duplicates and coarse silica blanks on a systematic basis.

Further significant results

Drill hole	From (m)	To (m)	Length (m)	Li ₂ O (%)
VAL21-2-1	144.4	150.4	6	0.13
VAL21-2-2	87.0	87.9	0.9	1.03
VAL21-2-2	87.9	88.8	0.9	1.23
VAL21-2-2	88.8	89.7	0.9	0.87
VAL21-2-2	94.2	95.05	0.85	0.54
VAL21-2-3	18.0	19.0	1	0.57
VAL21-2-3	23.0	23.8	0.8	0.74
VAL21-2-3	23.8	24.4	0.6	0.84
VAL21-2-3	207.0	208.0	1	1.36
VAL21-2-3	208.0	209.0	1	0.72
VAL21-2-4	17.0	17.5	0.5	0.57
VAL21-2-4	167.4	168.3	0.9	1.62

Cautionary statements

The content and grades of any mineral deposits at the Company's properties are conceptual in nature. There has been insufficient exploration to define a mineral resource on the property and it is uncertain if further exploration will result in any target being delineated as a mineral resource.

This press release contains "forward-looking information" within the meaning of applicable Canadian

securities legislation. Forward-looking information includes, but is not limited to, statements with respect to the remaining assay results from the Company's recently completed drilling program and the Company's ability to complete any future drilling campaigns to expand known deposits, to establish a resource at its properties, and to execute its business plan, including its ambition to become Quebec's next lithium producer. Generally, forward-looking information can be identified by the use of forward-looking terminology such as "plans", "expects" or "does not expect", "is expected", "budget", "scheduled", "estimates", "forecasts", "intends", "anticipates" or "does not anticipate", or "believes", or variations of such words and phrases or statements that certain actions, events or results "may", "could", "would", "might" or "will be taken", "occur" or "be achieved". Forward-looking information is subject to known and unknown risks, uncertainties and other factors that may cause the actual results, level of activity, performance or achievements of Jourdan to be materially different from those expressed or implied by such forward-looking information, including but not limited to: receipt of necessary approvals; general business, economic, competitive, political and social uncertainties; future prices of minerals; accidents, labour disputes and shortages and other risks of the mining industry. Although Jourdan has attempted to identify important factors that could cause actual results to differ materially from those contained in forward-looking information, there may be other factors that cause results not to be as anticipated, estimated or intended. There can be no assurance that such information will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking information. Jourdan does not undertake to update any forward-looking information, except in accordance with applicable securities laws.

NEITHER TSX VENTURE EXCHANGE NOR ITS REGULATION SERVICES PROVIDER (AS THAT TERM IS DEFINED IN THE POLICIES OF THE TSX VENTURE EXCHANGE) ACCEPTS RESPONSIBILITY FOR THE ADEQUACY OR ACCURACY OF THIS RELEASE.
