The mineral resource estimate for La Preciosa will provide Avino with substantial inventory, which, if the proposed transaction is closed, will increase the consolidated NI43-101 mineral resources to over 235 million silver equivalent ounces, adding to the significant base we have at Avino and further supports our belief that we are poised for growth as well as elevating Avino's potential as a silver producer and developer in Mexico."

#### Cut-off Grade

Based on historic underground mining methods, Avino has selected a cut-off grade of 120 AgEq as a base-case scenario; however, further optimization work will determine and refine the appropriate cut-off grade for economic extraction of ore.
