Passcode: 4R0A8A (if required).

Vango is focused on exploring and developing the Marymia Project in the Mid-West region of WA. In the near-term, the Company is focused on expanding its high-grade resource base to support its future plans to become a significant gold mining and production company.

About Vango Mining Limited:

[Vango Mining Ltd.](#) (ASX:VAN) is a minerals exploration mining company with ambitions of becoming a high-grade WA gold miner by developing the 100% owned Marymia Gold Project (Marymia) in the mid-west region of Western Australia. The Project comprises 45 granted mining leases over 300km. It has an established high-grade resource of 1Moz @ 3g/t Au, underpinned by the Trident Deposit, whose resource is 410koz @ 8g/t Au, with immediate extensions open at depth/along strike.

The Marymia Project has the potential to become one of Australia's largest high-grade producers. The Greenstone Belt in the Marymia region includes six major gold corridors, which remain largely un-tested beyond 100m depth - supported with an extensive drilling and geophysical database. Previous mining between 1992-2001, produced 580,000 ounces of gold almost entirely from open-pits.

Vango is focused on growing its high-grade gold resource to support a proposed stand-alone gold mining and production operation at Marymia. The Project is located along strike, immediately to the north of Superior Gold's (CVE:SGI) Plutonic Gold Mine which has produced more than 5.5Moz of gold.
