

CONSOL Energy Announces Results for the Fourth Quarter and Full Year 2021

08.02.2022 | [PR Newswire](#)

CANONSBURG, Feb. 8, 2022 - Today, [CONSOL Energy Inc.](#) (NYSE: CEIX) reported financial and operating results for the quarter and fiscal year ended December 31, 2021.

Fourth Quarter 2021 Highlights Include:

- GAAP net income of \$117.3 million, \$30.7 million¹ excluding unrealized mark-to-market gain related to commodity price derivatives;
- Quarterly adjusted EBITDA¹ of \$120.6 million;
- Our Itmann low-vol metallurgical coal project remains on track with start-up expected in 2H2022;
- Net cash provided by operating activities of \$52.4 million;
- Quarterly free cash flow¹ of \$24.5 million, despite a working capital increase of \$38.2 million;
- Coal shipments of 5.6 million tons, despite ongoing transportation delays;
- Near fully-contracted for 2022 and 11.4 million tons contracted for 2023;
- Cash and cash equivalents of \$149.9 million plus \$48.3 million in restricted cash as of December 31, 2021;
- Reduced total debt outstanding by \$30.8 million during 4Q21; and
- Net leverage ratio¹ of 1.49x as of December 31, 2021.

Full Year 2021 Highlights Include:

- GAAP net income of \$34.1 million, \$73.3 million¹ excluding unrealized mark-to-market loss related to commodity price derivatives;
- Adjusted EBITDA¹ of \$378.2 million;
- Net cash provided by operating activities of \$305.6 million;
- Free cash flow¹ of \$186.4 million;
- Record Pennsylvania Mining Complex (PAMC) export tons of 11.0 million tons;
- Coal shipments of 23.7 million tons, of which 37% were used in non-power generation applications;
- Payments on total consolidated indebtedness of \$101.2 million - reduced Term Loan A, Term Loan B, 2nd lien notes and equipment-financed debt outstanding by \$25.0 million, \$30.9 million, \$17.1 million and \$28.2 million, respectively;
- Issued \$75.0 million in tax-exempt bonds, of which \$46.1 million is available in escrow as restricted cash.

Management Comments

"In the fourth quarter of 2021, CEIX delivered a strong operational and financial performance following challenging geological issues in the third quarter, which continued into October. With these issues now behind us, we have normalized our operations and finished the year with 23.9 million tons of production. Continued transportation delays limited our upside potential in the fourth quarter and ultimately our full-year production tonnage. Nonetheless, on total costs and expenses of \$1,224 million, we finished the year with an average cash cost of coal sold per ton¹ of just above \$28 at the PAMC despite ongoing inflationary pressures, generating \$186 million in free cash flow¹ and added approximately \$100 million of unrestricted cash and cash equivalents to our balance sheet. Furthermore, we continued to execute our debt reduction strategy and made payments of more than \$100 million on legacy debt outstanding, while additionally raising \$75 million in tax-exempt bonds, which will fund future expenditures in the refuse disposal areas at the PAMC. Looking ahead, we are near fully-contracted for calendar year 2022 and have successfully layered in additional contract tons for 2023 and beyond. We recently entered into long-term coal supply contracts in the market with multiple buyers for approximately 7 million tons to be delivered through 2024, primarily in the industrial market. The construction of the Itmann preparation plant remains on schedule and on budget, which should add upside to the second half of 2022 when the plant starts up."

"On the safety front, our Bailey Preparation Plant and CONSOL Marine Terminal (CMT) each had ZERO employee recordable incidents during the full-year of 2021. Our full-year total recordable incident rate at the PAMC continues to track significantly below the national average for underground bituminous coal mines, finishing the year approximately 54% below the national year-to-date average (based on the latest available MSHA data)."

Pennsylvania Mining Complex Review and Outlook

PAMC Sales and Marketing

Our sales team sold 5.6 million tons of coal during the fourth quarter of 2021 at an average revenue per ton of \$51.27, up from 5.9 million tons at an average revenue per ton of \$39.05 in the year-ago period. The significant improvement in the average revenue per ton was due to vast improvements in the coal, natural gas, and electric power markets compared to the prior quarter.

In the domestic market, the commodity markets continued to significantly improve during the fourth quarter of 2021 compared to the

the prior-year period. The average Henry Hub natural gas spot price and average PJM West day-ahead power price ended the year improved by 88% and 136%, respectively, compared to the year-ago quarter. Consistent with these improved market conditions, the U.S. Energy Information Administration (EIA) reports that domestic coal consumption was approximately 546 million tons in 2021, a 14% increase from 2020. Furthermore, the EIA estimates that domestic coal consumption will remain largely unchanged in 2022 and 2023 at approximately 533 million tons annually. However, despite sustained coal demand, supply is expected to remain tight. According to IHS Markit, total U.S. coal production is expected to increase to 596 million tons, a 3% increase in 2022, before dropping by 55 million tons to 541 million tons in 2023. Furthermore, the EIA reports that November coal inventories at domestic power plants stood at approximately 92 million tons, down by nearly 32% compared to year-ago levels. While the majority of our domestic customer stockpiles are below target levels for this time of year, and as such, domestic customer demand has remained robust. We have continued to secure additional coal sales contracts, and, as such, we are near fully-contracted for 2022 and have 11.4 million tons contracted for 2023.

On the export front, seaborne thermal coal markets were unusually volatile in the fourth quarter of 2021, with API2 prompt-month prices starting the quarter above \$230/ton before falling to \$118/ton by quarter-end. However, average API2 prompt-month prices were still improved compared to the prior-year period, with 4Q21 prices improved by 172% compared to 4Q20. Global thermal coal prices have continued to remain elevated with the Asian spot market benchmark price (JKM) averaging 371% higher in 4Q21 compared to the fourth quarter of 2020. Despite the ongoing strength in the international coal markets, IHS Markit estimates that U.S. thermal coal producers will reduce tons sold into the export market in 2022, expecting that these tons will remain in the domestic market. As such, it estimates that U.S. thermal coal exports will decline by approximately 9% in 2022, as domestic coal stockpiles are expected to decline 11% in the year versus 2021. This dynamic should help to keep the international market tight in 2022.

Operations Summary

During the fourth quarter of 2021, we ran our four operational longwalls at the PAMC at a more normalized run-rate starting in late November after encountering operational and geological issues during 3Q21 and early-4Q21. While these issues are now behind us, we encountered consistent transportation delays, largely due to COVID-related labor issues, that limited our shipment volumes and production in the fourth quarter and ultimately prevented us from hitting our 24.0-million-ton mid-point guidance target for the year. The PAMC produced 5.6 million tons in 4Q21, compared to 5.9 million tons in the year-ago quarter. This brought our full-year production to 23.9 million tons in 2021.

CEIX's total costs and expenses during the fourth quarter of 2021 were \$318.0 million compared to \$306.0 million in the prior-year period, and CEIX's total coal revenue during the fourth quarter was \$288.1 million compared to \$230.5 million in the year-ago period. The significant improvement in coal revenue, despite lower production volume compared to the prior-year quarter, was the result of a \$12.22 improvement in average revenue per ton sold as demand for our product has continued to strengthen throughout the year. Additionally, total revenue in 4Q21 benefited from a \$115.5 million pre-tax unrealized mark-to-market gain related to our coal commodity derivatives, which reversed much of the large unrealized loss that was recorded in 3Q21. Average cash cost of coal sold per ton¹ for the fourth quarter was \$30.81, compared to \$27.49 in the year-ago quarter. The increase was primarily driven by the ongoing development work associated with creating additional optionality for increasing production and inflationary pressures. The increase in cash cost per ton was partially weighed on labor, maintenance, supply and contractor expenses. For 2021, CEIX's total costs and expenses were \$1,228.0 million compared to \$1,030.9 million in the prior year due to additional operating and other costs resulting from a significant increase in coal production in 2021 versus 2020. Our full-year 2021 average cash cost of coal sold per ton¹ came in at \$28.25, compared to \$27.49 for full-year 2020 as we gained economies of scale due to increased production and reduced idling costs.

		Three Months Ended		Year Ended	
		December 31, 2021	December 31, 2020	December 31, 2021	December 31, 2020
Total Revenue and Other Income	thousands	\$ 480,625	\$ 324,607	\$ 1,258,947	\$ 1,021,643
Total Costs and Expenses	thousands	\$ 318,039	\$ 306,044	\$ 1,223,540	\$ 1,030,885

Average Cash Cost of Coal Sold ¹	per ton	\$ 30.81	\$ 27.49	\$ 28.25	\$ 29.12
Average Cash Margin per Ton Sold ¹ per ton		\$ 20.46	\$ 11.56	\$ 17.50	\$ 12.19

CONSOL Marine Terminal Review

For the fourth quarter of 2021, throughput volumes at the CMT were 3.1 million tons, compared to 3.1 million tons in the year-ago period. Terminal revenues and CMT total costs and expenses were \$15.5 million and \$7.4 million, respectively, compared to \$17.4 million and \$9.2 million, respectively, during the year-ago period. Revenue was impaired in 4Q21 compared to 4Q20 due to the take-or-pay contract that was in place in the prior-year period, and CMT operating cash costs¹ were \$5.4 million in 4Q21, compared to \$4.6 million in 4Q20. The increase in CMT operating cash costs was driven by higher labor and supply expense versus 4Q20. CONSOL Marine Terminal net income and CONSOL Marine Terminal Adjusted EBITDA¹ were \$10.4 million and \$13.2 million, respectively, in the fourth quarter of 2021 compared to \$8.9 million and \$11.8 million, respectively, in the year-ago period. For the full year of 2021, CONSOL Marine Terminal net income and CONSOL Marine Terminal Adjusted EBITDA¹ were \$32.3 million and \$43.5 million, respectively, compared to \$32.5 million and \$44.4 million, respectively, in the year-ago period.

Itmann Update

Our Itmann project continued to progress according to expectations during the fourth quarter of 2021, and the project remains on track for preparation plant start-up and scale-up to full run-rate production during the second half of 2022. Relocation of the existing prep plant to the Itmann site is proceeding on schedule, with disassembly of the existing plant largely complete, and construction of foundations and structural steel erection underway at the Itmann plant site. The mine produced and sold approximately 100,000 tons of low-vol metallurgical coal (on a clean coal equivalent basis) during calendar year 2021, and due to the strength in the metallurgical coal markets, our Itmann project generated positive operating cash flow in the year. Additionally, we have succeeded in growing staffing levels consistent with our production ramp-up plan for 2022. Our sales team has initiated efforts to market the Itmann product to domestic and international customers in anticipation of completion of the prep plant. We continue to anticipate the prep plant to be commissioned in 2H22 and within the previously provided budget.

Debt Repurchase Update

During the fourth quarter of 2021, CEIX made repayments of \$24.0 million and \$6.8 million on our Term Loan B and equipment-financed debt, respectively, which brings our total debt payments in the quarter to \$30.8 million.

For the year ended December 31, 2021, we made repayments of \$25.0 million, \$30.9 million, \$17.1 million and \$28.2 million on our Term Loan A, Term Loan B, second lien notes and equipment-financed debt, respectively. This brings our total debt payments and repurchases in the year to \$101.2 million.

2022 Guidance and Outlook

- Based on our current contracted position, estimated prices and production plans, we are providing the following financial operating performance guidance for 2022:
- 2022 targeted PAMC coal sales volume of 23.0-25.0 million tons
- PAMC average revenue per ton sold expectation of \$55.00-\$57.00
- PAMC average cash cost of coal sold per ton² expectation of \$29.00-\$31.00
- Capital expenditures: PAMC maintenance - \$110-\$125 million / Itmann remaining development - \$42-\$47 million (including ESG initiatives) - \$10-\$23 million
- Expect to produce between 0.3-0.5 million tons of coal at the Itmann Mine (on a clean coal equivalent basis) with 50% of it in 2H2022

Fourth Quarter Earnings Conference Call

A conference call and webcast, during which management will discuss the fourth quarter 2021 financial and operational results, is scheduled for February 8, 2022 at 11:00 AM eastern time. Prepared remarks by members of management will be followed by a question and answer session. Interested parties may listen via webcast on the "Events and Presentations" page of our website, www.consolenergy.com. An archive of the webcast will be available for 30 days after the event.

Availability of Additional Information

Please refer to our website, www.consolenergy.com, for additional information regarding the company. In addition, we may provide other information about the company from time to time on our website.

We will also file our Form 10-K with the Securities and Exchange Commission (SEC) reporting our results for the year ended December 31, 2021 on February 11, 2022. Investors seeking our detailed financial statements can refer to the Form 10-K once it has been filed with the SEC.

Footnotes:

1 "Adjusted EBITDA", "Free Cash Flow", "Net Leverage Ratio", "CONSOL Marine Terminal Adjusted EBITDA", "CMT Operating Cash Costs", "Total Cash Cost of Coal Sold" and "Net Income (Loss) Adjusted for the Effect of Unrealized Mark-to-Market Gains (Losses) on Commodity Derivative Instruments" are non-GAAP financial measures and "Average Cash Cost of Coal Sold per Ton" and "Average Cash Margin per Ton Sold" are operating ratios derived from non-GAAP financial measures, each of which are reconciled to the most directly comparable GAAP financial measures below, under the caption "Reconciliation of Non-GAAP Financial Measures".

2 CEIX is unable to provide a reconciliation of Average Cash Cost of Coal Sold per Ton guidance, an operating ratio derived from non-GAAP financial measures, due to the unknown effect, timing and potential significance of certain income statement items.

About CONSOL Energy Inc.

[CONSOL Energy Inc.](http://www.consolenergy.com) (NYSE: CEIX) is a Canonsburg, Pennsylvania-based producer and exporter of high-Btu bituminous thermal coal and metallurgical coal. It owns and operates some of the most productive longwall mining operations in the Northern Appalachian Basin and is developing a new metallurgical coal mine (the Itmann project) in the Central Appalachian Basin. CONSOL's flagship operation is the Pennsylvania Mining Complex, which has the capacity to produce approximately 28.5 million tons of coal per year and is comprised of 3 large-scale underground mines: Bailey, Enlow Fork, and Harvey. The company

also owns and operates the CONSOL Marine Terminal, which is located in the port of Baltimore and has a throughput capacity of approximately 15 million tons per year. In addition to the ~612 million reserve tons associated with the Pennsylvania Mining Complex and the ~21 million reserve tons associated with the Itmann project, the company also controls approximately 1.4 billion tons of greenfield thermal and metallurgical coal reserves and resources located in the major coal-producing basins of the eastern United States. Additional information regarding CONSOL Energy may be found at www.consolenergy.com.

Cash and Cash Equivalents and Restricted Cash at End of Period	\$ 198,206	\$ 50,850	\$ 198,206	\$ 50,850

Reconciliation of Non-GAAP Financial Measures

We evaluate our cost of coal sold and cash cost of coal sold on an aggregate basis. We define cost of coal sold as operating and other production costs related to produced tons sold, along with changes in coal inventory, both in volumes and carrying values. The cost of coal sold includes items such as direct operating costs, royalty and production taxes, direct administration costs, and depreciation, depletion and amortization costs on production assets. Cost of coal sold excludes any indirect costs, such as selling, general and administrative costs, freight expenses, interest expenses, depreciation, depletion and amortization costs on non-production assets and other costs not directly attributable to the production of coal. The cash cost of coal sold includes cost of coal sold less depreciation, depletion and amortization costs on production assets. We define average cash cost of coal sold per ton as cash cost of coal sold divided by tons sold. The GAAP measure most directly comparable to cost of coal sold, cash cost of coal sold and average cash cost of coal

sold per ton is total costs and expenses.

The following table presents a reconciliation of cost of coal sold, cash cost of coal sold and average cash cost of coal sold per ton to total costs and expenses, the most directly comparable GAAP financial measure, on a historical basis, for each of the periods indicated (in thousands, except per ton information).

	Three Months Ended December 31, December 31,		Year Ended December 31, December 31,	
	2021	2020	2021	2020
Total Costs and Expenses	\$ 318,039	\$ 306,044	\$ 1,223,540	\$ 1,030,885
Less: Freight Expense	(31,448)	(20,849)	(103,819)	(39,990)
Less: Selling, General and Administrative Costs	(20,131)	(32,980)	(89,113)	(72,706)
Less: Gain on Debt Extinguishment	-	3,441	657	21,352
Less: Interest Expense, net	(15,849)	(15,070)	(63,342)	(61,186)
Less: Other Costs (Non-Production)	(22,821)	(24,031)	(74,528)	(124,739)
Less: Depreciation, Depletion and Amortization (Non-Production)	(8,461)	(4,457)	(29,355)	(39,668)
Cost of Coal Sold	\$ 219,329	\$ 212,098	\$ 864,040	\$ 713,948
Less: Depreciation, Depletion and Amortization (Production)	(48,049)	(50,246)	(195,228)	(171,092)
Cash Cost of Coal Sold	\$ 171,280	\$ 161,852	\$ 668,812	\$ 542,856
Total Tons Sold (in millions)	5.6	5.9	23.7	18.7
Average Cost of Coal Sold per Ton	\$ 39.34	\$ 36.04	\$ 36.43	\$ 38.24
Less: Depreciation, Depletion and Amortization Costs per Ton Sold	8.53	8.55	8.18	9.12
Average Cash Cost of Coal Sold per Ton	\$ 30.81	\$ 27.49	\$ 28.25	\$ 29.12

We evaluate our average margin per ton sold and average cash margin per ton sold on a per-ton basis. We define average margin per ton sold as average revenue per ton sold, net of average cost of coal sold per ton. We define average cash margin per ton sold as average revenue per ton sold, net of average cash cost of coal sold per ton. The GAAP measure most directly comparable to average margin per ton sold and average cash margin per ton sold is total coal revenue.

The following table presents a reconciliation of average margin per ton sold and average cash margin per ton sold to total coal revenue, the most directly comparable GAAP financial measure, on a historical basis, for each of the periods indicated (in thousands, except per ton information).

	Three Months Ended December 31, December 31,		Year Ended December 31, 2021

Depreciation, Depletion and Amortization Costs per Ton Sold	8.53	8.55	8.18	9.12
Average Cost of Coal Sold per Ton	39.34	36.04	36.43	38.24
Average Margin per Ton Sold	11.93	3.01	9.32	3.07
Add: Depreciation, Depletion and Amortization Costs per Ton Sold	8.53	8.55	8.18	9.12
Average Cash Margin per Ton Sold	\$ 20.46	\$ 11.56	\$ 17.50	\$ 12.19

We define CMT operating costs as operating and other costs related to throughput tons. CMT operating costs exclude any indirect costs, such as freight expense, selling, general and administrative costs, direct administration costs, interest expenses, and other costs not directly attributable to throughput tons. CMT operating cash costs include CMT operating costs, less depreciation, depletion and amortization costs. The GAAP measure most directly comparable to CMT operating costs and CMT operating cash costs is total costs and expenses.

The following table presents a reconciliation of CMT operating costs and CMT operating cash costs to total costs and expenses, the most directly comparable GAAP financial measure, on a historical basis, for each of the periods indicated (in thousands).

	Three Months Ended December 31,		Year Ended December 31,	
	2021	2020	2021	2020
Total Costs and Expenses	\$ 318,039	\$ 306,044	\$ 1,223,540	\$ 1,030,885
Less: Freight Expense	(31,448)	(20,849)	(103,819)	(39,990)
Less: Selling, General and Administrative Costs	(20,131)	(32,980)	(89,113)	(72,706)

Less: Interest Expense, net	(15,849)	(15,070)	(63,342)	(61,186)
Less: Other Costs (Non-Throughput)	(188,727)	(181,254)	(721,522)	(649,207)
Less: Depreciation, Depletion and Amortization (Non-Throughput)	(55,292)	(53,408)	(219,749)	(205,665)
CMT Operating Costs	\$ 6,592	\$ 5,924	\$ 26,652	\$ 23,483
Less: Depreciation, Depletion and Amortization (Throughput)	(1,218)	(1,295)	(4,834)	(5,095)
CMT Operating Cash Costs	\$ 5,374	\$ 4,629	\$ 21,818	\$ 18,388

We define adjusted EBITDA as (i) net income (loss) plus income taxes, net interest expense and depreciation, depletion and amortization, as adjusted for (ii) certain non-cash items, such as stock-based compensation and unrealized gains or losses on commodity derivative instruments. The GAAP measure most directly comparable to adjusted EBITDA is net income (loss).

The following tables present a reconciliation of net income (loss) to adjusted EBITDA, the most directly comparable GAAP financial measure, on a historical basis, for each of the periods indicated (in thousands).

We define net income (loss) attributable to [CONSOL Energy Inc.](#) stockholders adjusted for the effect of unrealized mark-to-market gains (losses) on commodity derivative instruments as net income (loss) adjusted for the effect of current period unrealized gains or losses related to commodity derivatives. The GAAP measure most directly comparable to net income (loss) attributable to [CONSOL Energy Inc.](#) stockholders adjusted for the effect of unrealized mark-to-market gains (losses) on commodity derivative instruments is net income (loss).

The following table presents a reconciliation of net income (loss) attributable to [CONSOL Energy Inc.](#) stockholders adjusted for the effect of unrealized mark-to-market gains (losses) on commodity derivative instruments to net income (loss), the most directly comparable GAAP financial measure, on a historical basis for each of the periods indicated (in thousands).

	Three Months Ended December 31, December 31,		Year Ended December 31,	
	2021	2020	2021	2020
Net Income (Loss)	\$ 117,323	\$ 14,734	\$ 34,110	\$ (13,214)
Less: Unrealized (Gain) Loss on Commodity Derivative Instruments	(115,539)	-	52,204	-
Add: Effect of Income Taxes	28,873	-	(13,046)	-
Net Income (Loss) Adjusted for the Effect of Unrealized Mark-to-Market Gains (Losses) on Commodity Derivative Instruments	\$ 30,657	\$ 14,734	\$ 73,268	\$ (13,214)
Less: Net Income (Loss) Attributable to Noncontrolling Interest	-	1,649	-	(3,459)
Net Income (Loss) Attributable to <u>CONSOL Energy Inc.</u> Stockholders Adjusted for the Effect of Unrealized Mark-to-Market Gains (Losses) on Commodity Derivative Instruments	\$ 30,657	\$ 13,085	\$ 73,268	\$ (9,755)

We define net leverage ratio as the ratio of net debt to the last twelve months' ("LTM") earnings before interest expense and depreciation, depletion and amortization, adjusted for certain non-cash items, such as stock-based compensation, unrealized loss on commodity derivative instruments, amortization of debt issuance costs and capitalized interest.

The following table presents a reconciliation of net leverage ratio (in thousands).

	Twelve Months Ended	Twelve Months Ended
	December 31, 2021	December 31, 2020
Net Income (Loss)	\$ 34,110	\$ (13,214)
Plus:		
Interest Expense, net	63,342	61,186
Depreciation, Depletion and Amortization	224,583	210,760
Income Taxes	1,297	3,972
Stock/Unit-Based Compensation	6,632	11,579

Consolidated Net Indebtedness per Credit Agreement	\$ 506,322	\$ 613,793
Net Leverage Ratio (Net Indebtedness/EBITDA)	1.49	2.54

Free cash flow, organic free cash flow and organic free cash flow net to CEIX shareholders are non-GAAP financial measures. Management believes that these measures are meaningful to investors because management reviews cash flows generated from operations and non-core asset sales after taking into consideration capital expenditures due to the fact that these expenditures are considered necessary to maintain and expand CONSOL's asset base and are expected to generate future cash flows from operations. It is important to note that free cash flow, organic free cash flow and organic free cash flow net to CEIX shareholders do not represent the residual cash flow available for discretionary expenditures since other non-discretionary expenditures, such as mandatory debt service requirements, are not deducted from the measure. The following tables present a reconciliation of free cash flow, organic free cash flow and organic free cash flow net to CEIX shareholders to net cash provided by operating activities, the most directly

comparable GAAP financial measure, on a historical basis, for each of the periods indicated (in thousands).

Organic Free Cash Flow	Three Months Ended December 31, 2021	Three Months Ended December 31, 2020	Year Ended December 31, 2021	Year Ended December 31, 2020

Cautionary Statement Regarding Forward-Looking Statements

Certain statements in this press release are "forward-looking statements" within the meaning of the federal securities laws. With the exception of historical matters, the matters discussed in this press release are forward-looking statements (as defined in Section 21E of the Securities Exchange Act of 1934, as amended) that involve risks and uncertainties that could cause actual results to differ materially from results projected in or implied by such forward-looking statements. Accordingly, investors should not place undue reliance on forward-looking statements as a prediction of actual results. The forward-looking statements may include projections and estimates concerning the timing and success of specific projects and our future production, revenues, income and capital spending. When we use the words "anticipate," "believe," "could," "continue," "estimate," "expect," "intend," "may," "plan," "predict," "project," "should," "will," or their negatives, or other similar expressions, the statements which include those words are usually forward-looking statements. When we describe our expectations with respect to the Itmann Mine or any other strategy that involves risks or uncertainties, we are making forward-looking statements. We have based these forward-looking statements on our current expectations and assumptions about future events. While our management considers these expectations and assumptions to be reasonable, they are inherently subject to significant business, economic, competitive, regulatory and other risks, contingencies and uncertainties, most of which are difficult to predict and many of which are beyond our control. Specific risks, contingencies and uncertainties are discussed in more detail in our filings with the Securities and Exchange Commission. The forward-looking statements in this press release speak only as of the date of this press release and CEIX disclaims any intention or obligation to update publicly any forward-looking statements, whether in response to new information, future events, or otherwise, except as required by applicable law.
