

GoldSpot Discoveries Engaged by Global Energy Metals Corporation for the Lovelock and Treasure Box Projects in Nevada

22.02.2022 | [Newsfile](#)

Toronto, Feb. 22, 2022 - [GoldSpot Discoveries Corp.](#) (TSXV: SPOT) (OTCQX: SPOFF) ("GoldSpot" or the "Company"), a leading technology services company leveraging machine learning to transform the mineral discovery process, is pleased to announce it has been engaged by [Global Energy Metals Corp.](#) ("Global Energy Metals") to apply its proprietary machine learning and geoscience expertise to advance the Treasure Box and Lovelock Mine projects located approximately 150km east of Reno, Nevada.

GoldSpot will utilize its artificial intelligence and machine learning technologies to optimize exploration targets to allow Global Energy Metals to focus drilling efforts better and unlock value in their highly prospective Stillwater Range landholdings in Nevada.

"GoldSpot is excited to be partnering and applying our proprietary technology to Global Energy Metals' critical metal projects," commented Vincent Dubé-Bourgeois, Chief Executive Officer and Director of GoldSpot. "We believe the market has underestimated the value of the company and that of its strategic property portfolio, including those projects in Nevada. The opportunity that the Lovelock Mine and Treasure Box land package holds is substantial, and we believe a large number of potential targets on the property are ripe for further analysis and refining under our team's technological and geological guidance."

Mitchell Smith, President and Chief Executive Officer of Global Energy Metals, commented, "We are delighted to welcome GoldSpot as a strategic service provider and shareholder of Global Energy Metals. It will be a busy season for our Nevada-based cobalt, copper, and nickel projects, and we believe the properties will benefit tremendously from the assistance of GoldSpot's technologies and data-driven approach to exploration. We welcome the strong interest and investment into the private placement from GoldSpot and look forward to working with them to evaluate and unlock the potential of both the Treasure Box and Lovelock Mine projects."

About GoldSpot Discoveries Corp.

GoldSpot Discoveries Corp. (TSXV: SPOT) (OTCQX: SPOFF) is a technology company using artificial intelligence to revolutionize the future of global mineral exploration with a full suite of data and knowledge-driven SaaS tools and services. GoldSpot works with industry leaders across all commodity and deposit types to identify new exploration targets, develop cutting-edge technologies and to strategically invest in mineral exploration companies. Our leading team of expert scientists merge geoscience and data science to deliver bespoke solutions that save time, reduce costs and produce far more accurate results than ever before possible.

About Global [Energy Metals Corp.](#)

[Global Energy Metals Corp.](#) offers investment exposure to the growing rechargeable battery and electric

vehicle market by building a diversified global portfolio of exploration and growth-stage battery mineral assets.

Global Energy Metals recognizes that the proliferation and growth of the electrified economy in the coming decades is underpinned by the availability of battery metals, including cobalt, nickel, copper, lithium, and other raw materials. To be part of the solution and respond to this electrification movement, Global Energy Metals has taken a 'consolidate, partner and invest' approach and, in doing so, have assembled and is advancing a portfolio of strategically significant investments in battery metal resources.

As demonstrated with the Company's current copper, nickel and cobalt projects in Canada, Australia, Norway, and the United States, GEMC is investing-in, exploring, and developing prospective, scaleable assets in established mining and processing jurisdictions in close proximity to end-use markets. Global Energy Metals is targeting projects with low logistics and processing risks so that they can be fast-tracked to enter the supply chain in this cycle. The Company is also collaborating with industry peers to strengthen its exposure to these critical commodities and the associated technologies required for a cleaner future.

Securing exposure to these critical minerals powering the eMobility revolution is a generational investment opportunity. Global Energy Metals believe the time to be part of this electrification movement.
