# Callon Petroleum Company Announces Fourth Quarter and Full Year 2021 Results and Provides 2022 Plan Focused on Free Cash Flow and Debt Reduction Initiatives

23.02.2022 | PR Newswire

HOUSTON, Feb. 23, 2022 - <u>Callon Petroleum Company</u> (NYSE: CPE) ("Callon" or the "Company") today reported resuperations for the three months and full-year ended December 31, 2021.

Presentation slides accompanying this earnings release are available on the Company's website at www.callon.com log "Presentations" page within the Investors section of the site.

## 2021 Highlights

- Full-year 2021 production of 95.6 MBoe/d (64% oil)
- Year-end proved reserves of 484.6 MMBoe (60% oil) with a standardized measure of future discounted cash flow proved reserves of \$6.3 billion
- PV-10 of total proved reserves of \$7.1 billion; Proved developed reserves represent 57% of total reserve volumes associated PV-10 of \$4.5 billion
- Generated net cash provided by operating activities of \$974.1 million and adjusted free cash flow of \$274.2 million.
- Net income of \$365.2 million, or \$7.26 per diluted share, adjusted EBITDA of \$998.8 million, and adjusted income million or \$8.69 per diluted share
- Achieved a full year operating margin of \$42.05 per Boe, a 141% increase over last year
- Announced approximately \$210 million in non-core asset sales
- Asset monetization proceeds, debt exchanges, and free cash flow contributed to a reduction in total debt of appro
   \$760 million, excluding cash consideration paid for acquisitions
- Exited the year with a net debt / last twelve months EBITDA ratio of 2.3x pro forma for the Primexx acquisition an fourth quarter annualized EBITDA of 2.0x

#### Fourth Quarter 2021 Highlights

- Fourth quarter 2021 production of 112.4 MBoe/d (64% oil) with 16.8 net wells placed on production
- Generated \$366.3 million of net cash provided by operating activities and adjusted free cash flow of \$123.6 millio
- Net income of \$285.4 million, or \$4.78 per diluted share, adjusted EBITDA of \$339.2 million, and adjusted income
  million or \$2.66 per diluted share
- Achieved an operating margin of \$48.71 per Boe, a 130% increase over last year
- Closed the acquisition of 35,000 net acres and approximately 18,000 net barrels of oil equivalent per day in the D Basin
- Realized \$153 million in proceeds through the divestiture of non-core Eagle Ford and Midland producing assets a
  infrastructure assets

#### 2022 Capital Plan Highlights

- Operational capital budget of \$725 million, with approximately 85% allocated to the Permian Basin
- Annual production guidance of 101 105 MBoe/d (64% oil)
- Transition to more efficient, larger scale development on recently acquired southern Delaware properties with an drilled and uncompleted well inventory and execute on identified opportunities to reduce lifting costs by 30%
- Maintenance capital spending program driving stable production profile relative to 2021 after adjusting for acquisi
  divestitures
- Expected adjusted free cash flow generation of greater than \$500 million and an estimated reinvestment rate<sup>1</sup> of 60% at \$75/Bbl oil (WTI benchmark)

Joe Gatto, President and Chief Executive Officer commented, "During the fourth quarter and throughout the year, our to

12.11.2025 Seite 1/38

outperformed expectations and set new records, all the while dealing with pandemic-related workplace challenges and industry environment. Our operations team once again delivered solid results with production for the fourth quarter and coming in at the high end of guidance while delivering our program under budget for the year.

"In 2021, Callon successfully completed a large acquisition that was both accretive and deleveraging. We followed thro monetization targets for the year, announcing approximately \$210 million in gross proceeds from non-core asset sales. we set several new records, generating record net income of \$365.2 million and annual adjusted EBITDA of \$999 million represents an increase of over 40% relative to last year. Our capital discipline and high margins enabled us to deliver \$100 in adjusted free cash flow, a new company record. These outstanding achievements allowed us to dramatically improve balance sheet and reduce Callon's leverage ratio by over 2x during the year. We look forward to raising the bar even full 2022.

"Our 2022 capital budget reflects both our continued commitment to capital discipline and a greater focus on Callon's h return Permian Basin assets. Inclusive of capitalized expenses, our capital budget implies a reinvestment rate<sup>1</sup> of approximately stated discretionary cash flow at \$75 per barrel WTI price and an adjusted free cash flow breakeven price of approximately \$40 per barrel. We are in the process of implementing our operating model on the recently acquired Dela assets and are actively taking measures to improve both production efficiency and operating cost structure. After comp work to transition the acquired assets to larger project developments in the first quarter, we expect to generate oil produgrowth in excess of 10% over the course of the year.

"The industry continues to face inflationary cost pressures in items like steel tubulars and fuel, as well as overall labor a costs. These inflationary pressures have increased estimated spot market well costs by over 15% based on recent data Given our scaled program of steady development activity and longer-term agreements with service providers, we expect from a wide range of efficiencies and limit the anticipated inflationary impact on our well costs to approximately 10%.

"Based on our planned operational activity and leading operating margins, we expect to generate over \$500 million in a cash flow in 2022, based on \$75 per barrel. This level of free cash flow puts us on a path to further reduce our absolute and achieve a leverage ratio of less than 1.5x by year end 2022," concluded Mr. Gatto.

Callon advanced its sustainability initiatives during 2021 with the Company achieving numerous milestones as detailed

Environmental, Social, and Governance ("ESG") Updates

a leaved its accord a vatainals life variant allowed with CACD and TOFD frameworks

- Issued its second sustainability report, aligned with SASB and TCFD frameworks
- Completed the second series of field electrification projects in the Eagle Ford and Delaware Basin
- Improved its carbon footprint through flaring reduction initiatives
- Reduced its spill occurrences and total fluid spill rate
- Invested in employee development and wellness with the initiation of the Employee Development Program and E Wellness Program
- Expanded community engagement through employee volunteering and financial support of education, social, and environmental initiatives

The Company remains committed to continued GHG emission reductions. As a result of these achievements, Callon m significant progress in environmental performance in 2021 and is announcing the adoption of more aggressive reductions.

- End routine flaring by end of 2022, an acceleration of three years versus the previous goal
- 50% reduction in GHG intensity by 2024, targeting the high end of previous guidance and accelerating the achiev timeline by one year
- Reduce all flaring to less than 1% by 2024
- Reduce methane intensity to less than 0.2% by 2024

To advance these goals, Callon will be investing nearly \$20 million in emission reduction projects this year as part of a multi-year emission reduction program. This capital allocation will help expand the field electrification and other system that will allow Callon to continue to reduce its greenhouse gas emissions and overall carbon footprint.

Operations Update and Outlook

At December 31, 2021, Callon had 1,326 gross (1,187.1 net) horizontal wells producing from established flow units in the

12.11.2025 Seite 2/38

and Eagle Ford. Net daily production for the three months ended December 31, 2021 grew 18% to 112.4 MBoe/d (64% compared to the same period of 2020. Full year production for 2021 averaged 95.6 MBoe/d (64% oil), a decrease of 69 volumes.

For the three months ended December 31, 2021, Callon drilled 27 gross (24.9 net) horizontal wells and placed a combi gross (16.8 net) horizontal wells on production. Wells placed on production during the quarter were completed in the Lo Spraberry and Wolfcamp A in the Midland Basin and the 3rd Bone Spring, Wolfcamp A and Wolfcamp C in the Delawa

Currently, the Company has seven active rigs with four in the Delaware Basin, one in the Eagle Ford, and two in the Mi Callon plans to release one of the Delaware rigs in late April. The Company is operating two completion crews with ope currently in the Delaware Basin.

#### 2022 Capital Expenditures Budget

Callon has established an operational capital expenditure budget of \$725 million for 2022 with approximately 83% of sp directed towards drilling, completion and equipment expenditures. The increase of approximately \$216 million from 202 reflects an increase in the number of drilled wells and the impact of cost inflation on items such as fuel, steel and labor. Company's 2022 development capital will be primarily focused on the Permian Basin, representing approximately 85% budget.

The Permian development plan is characterized by large multi-bench project developments as the Company employs the field development philosophy. Permian development activity will predominantly feature co-development of the Wolfcam the Delaware Basin and the Lower Spraberry and Wolfcamp A and B in the Midland Basin. The Eagle Ford program refocused on the well-established target zone, the Lower Eagle Ford Shale, with the Company also planning to test the A in the second half of the year. In total, Callon expects to drill 125 to 130 gross wells and complete 113 to 118 gross well

The 2022 capital plan will leverage the structural savings and operational efficiencies that result from an integrated sup management focus and extensive experience operating in the Permian Basin and Eagle Ford. In particular, the Compa that overlaying its development model on the newly acquired Delaware acreage will yield significant improvements in capificiency and operating cost structure. A repeatable program of moderated development activity, combined with service agreements to manage capital costs and strong operating cash margins, are expected to provide a foundation of durab flow in 2022 and beyond.

The remainder of Callon's full year 2022 outlook is provided later in this release under the section titled "2022 Guidance"

#### Capital Expenditures

For the year ended December 31, 2021, Callon incurred \$508.6 million in operational capital expenditures on an accrual compared to \$488.6 million in 2020. For the three months ended December 31, 2021, the Company incurred \$159.8 m operational capital expenditures on an accrual basis, which represented a \$44.8 million increase from the third quarter Total capital expenditures, inclusive of capitalized expenses, are detailed below on an accrual and cash basis:

- (a) Excludes sales of oil and gas purchased from third parties.
- (b) Excludes the impact of settled derivatives.
- (c) Excludes the change in fair value and amortization of share-based incentive awards and other non-recurring expenses.

Revenue. For the quarter ended December 31, 2021, Callon reported total revenue of \$632.9 million, which excluded revenue from sales of commodities purchased from a third-party of \$59.3 million. Total revenue increased \$129.0 million during the fourth quarter of 2021 as compared to the third quarter of 2021 primarily as a result of an 11% increase in the price of oil as well as a 13% increase in production. Revenues including the gain or loss from the settlement of derivative contracts ("Adjusted Total Revenue"1) were \$483.0 million, reflecting the impact of a \$149.9 million loss from the settlement of derivative contracts. Average daily production for the quarter was 112.4 MBoe/d compared to average daily production of 99.7 MBoe/d in the third quarter of 2021. Average realized prices, including and excluding the effects of hedging, are detailed above.

Commodity Derivatives. For the quarter ended December 31, 2021, the net (gain) loss on commodity derivative contracts includes the following (in thousands):

	Three Months Ended
	December 31, 2021
(Gain) loss on oil derivatives	\$35,364
(Gain) loss on natural gas derivatives	(14,918)
(Gain) loss on NGL derivatives	(8,346)
(Gain) loss on commodity derivative contracts	\$12,100

For the quarter ended December 31, 2021, the cash (paid) received for commodity derivative settlements includes the following (in thousands):

	Three Months Ended
	December 31, 2021
Cash (paid) received on oil derivatives	(\$129,228)
Cash (paid) received on natural gas derivatives	(21,709)
Cash (paid) received on NGL derivatives	(5,782)
Cash (paid) received for commodity derivative settlements	(\$156,719)

Lease Operating Expenses, including workover ("LOE"). LOE per Boe for the three months ended December 31, 2021 was \$7.11 per Boe, compared to \$4.66 per Boe in the third quarter of 2021. The increase in LOE per Boe is primarily attributable to the addition of the recently acquired Delaware production as well as overall cost inflation in materials and labor.

Production and Ad Valorem Taxes. Production and ad valorem taxes were \$3.26 per Boe for the three months ended December 31, 2021, representing approximately 5.3% of revenue excluding revenue from sales of commodities purchased from a third-party and before the impact of derivative settlements.

Gathering, Transportation and Processing. Gathering, transportation and processing for the three months ended December 31, 2021 were \$22.1 million, or \$2.14 per Boe, as compared to \$20.9 million, or \$2.28 per

12.11.2025 Seite 18/38

Boe in the third quarter of 2021. The decrease in gathering, transportation and processing per Boe was primarily attributable to the addition of the recently acquired Delaware production which carried lower gathering, transportation and processing fees.

Depreciation, Depletion and Amortization ("DD&A"). DD&A for the three months ended December 31, 2021 was \$10.89 per Boe compared to \$9.80 per Boe in the third quarter of 2021. The increase in DD&A per Boe was primarily attributable to a larger percentage increase in production as compared to the depletion rate of our proved reserves from the third quarter of 2021 to the fourth quarter of 2021.

General and Administrative Expense ("G&A"). G&A for the three months ended December 31, 2021 and September 30, 2021 was \$13.1 million and \$9.5 million, respectively. G&A, excluding certain non-cash incentive share-based compensation valuation adjustments, ("Adjusted G&A1") was \$13.4 million for the three months ended December 31, 2021 compared to \$12.0 million for the third quarter of 2021. The cash component of Adjusted G&A of \$12.2 million for the fourth quarter of 2021 increased as compared to \$10.4 million for the third quarter of 2021 primarily as a result of increased compensation costs during the fourth quarter.

The following table reconciles total G&A to Adjusted G&A - cash component, and full cash G&A (in thousands):

	Three Months	Year Ended		
	December 31, 2021	September 30, 2021		December 3
Total G&A	\$13,116	\$9,503	\$10,614	\$50,483
Change in the fair value of liability share-based awards (non-cash)	296	2,492	(2,500)	(6,710)
Adjusted G&A - total	13,412	11,995	8,114	43,773
Equity settled, share-based compensation (non-cash) and other non-recurring expenses	(1,230)	(1,589)	(580)	(6,208)
Adjusted G&A - cash component	\$12,182	\$10,406	\$7,534	\$37,565
	<u> </u>	<u> </u>	<u> </u>	<u> </u>
Capitalized cash G&A	11,035	9,034	6,465	34,386
Full cash G&A	\$23,217	\$19,440	\$13,999	\$71,951

Income Tax. Callon provides for income taxes at a federal statutory rate of 21% adjusted for permanent differences expected to be realized. The Company recorded income tax benefit of \$0.8 million for the three months ended December 31, 2021, compared to \$2.4 million income tax expense for the three months ended September 30, 2021. Since the second quarter of 2020, we have concluded that it is more likely than not that the net deferred tax assets will not be realized and have recorded a full valuation allowance against our deferred tax assets. As long as we continue to conclude that the valuation allowance is necessary, we will not have significant deferred tax expense or benefit.

Adjusted EBITDA. Net income was \$285.4 million and adjusted EBITDA was \$339.2 million for the fourth quarter of 2021 as compared to net income of \$171.9 million and adjusted EBITDA of \$292.2 million for the third quarter of 2021. The increases in net income and adjusted EBITDA from the third quarter of 2021 were primarily due to incorporating the assets recently acquired in the southern Delaware as well as an increase in the price of oil partially offset by higher payments on derivative settlements.

#### **Proved Reserves**

DeGolver and MacNaughton prepared the estimates of Callon's proved reserves as of December 31, 2021.

12.11.2025 Seite 19/38

As of December 31, 2021, Callon's estimated net proved reserves were 484.6 MMBoe and included 290.3 MMBbls of oil, 577.3 Bcf of natural gas, and 98.1 MMBbls of NGLs with a standardized measure of discounted future net cash flows of \$6.3 billion using average realized prices for sales of oil, natural gas, and NGLs on the first calendar day of each month during the year of \$65.44/Bbl for oil, \$3.31/Mcf for natural gas, and \$29.19/Bbl for NGLs.

Oil constituted approximately 60% of the Company's estimated equivalent proved developed reserves as well as the Company's estimated equivalent total proved reserves. The Company added 36.2 MMBoe of new reserves in extensions and discoveries through development efforts in 2021, with a total of 68 gross (61.3 net) wells drilled and 112 gross (103.8 net) wells completed.

The changes in Callon's estimated net proved reserves are as follows:

	Total (MBoe)
Proved reserves at December 31, 2020	475,879
Extensions and discoveries	36,180
Revisions to previous estimates	(14,181)
Purchase of reserves in place	57,652
Sales of reserves in place	(36,015)
Production	(34,894)
Proved reserves at December 31, 2021	484,621

12.11.2025 Seite 21/38

<sup>(</sup>b) Amortization of equity-settled, share based incentive awards and other non-recurring expenses.

<sup>(</sup>c) Includes facilities, equipment, seismic, land and other items, excludes capitalized expenses. 2022 Guidance

	i
	Full Year
	2022 Guidance
Total production (MBoe/d)	101 - 105
Oil	64%
NGL	19%
Natural gas	17%
Income statement expenses (in millions except where noted)	
LOE, including workovers	\$275 - \$295
Gathering, transportation and processing	\$75 - \$85
Production and ad valorem taxes (% of total oil, natural gas, and NGL rev	venues) 6.0%
Adjusted G&A: cash component <sup>(a)</sup>	\$50 - \$60
Adjusted G&A: non-cash component (b)	\$5 - \$15
Cash interest expense, net	\$55 - \$60
Estimated effective income tax rate	22%
Capital expenditures (in millions, accrual basis)	
Total operational capital <sup>(c)</sup>	\$725
Cash capitalized interest	\$110 - \$115
Cash capitalized G&A	\$35 - \$40
Gross operated wells drilled / completed	125 - 130 / 113 - 118

- (a) Excludes the change in fair value and amortization of share-based incentive awards and other non-recurring expenses.
- (b) Amortization of equity-settled, share based incentive awards and other non-recurring expenses.
- (c) Includes facilities, equipment, seismic, land and other items, excludes capitalized expenses. For the first quarter, the Company expects to produce between 100 and 102 Boe/d (63% oil) with between 16 and 18 gross wells placed on production. In addition, Callon projects an operational capital spending level of between \$175 and \$185 million on an accrual basis.

Adjusted Income and Adjusted EBITDA. The Company reported net income of \$285.4 million for the three months ended December 31, 2021, or \$4.78 per diluted share, and adjusted income of \$159.2 million, or \$2.66 per diluted share. The following tables reconcile the Company's net income (loss) to adjusted income and adjusted EBITDA:

- Adjusted free cash flow is a supplemental non-GAAP measure that is defined by the Company as adjusted EBITE operational capital, cash capitalized interest, net cash interest expense and capitalized cash G&A (which exclude expense related to share-based awards). We believe adjusted free cash flow provides useful information to inves it is a comparable metric against other companies in the industry and is a widely accepted financial indicator of ar natural gas company's ability to generate cash for the use of internally funding their capital development program service or incur debt. Adjusted free cash flow is not a measure of a company's financial performance under GAAF not be considered as an alternative to net cash provided by operating activities, or as a measure of liquidity, or as alternative to net income (loss).
- Adjusted discretionary cash flow is a supplemental non-GAAP measure that Callon believes provides useful infor investors because it is a comparable metric against other companies in the industry and is a widely accepted final indicator of an oil and natural gas company's ability to generate cash for the use of internally funding their capital program and to service or incur debt. Adjusted discretionary cash flow is defined by Callon as net cash provided activities before changes in working capital and merger, integration and transaction expenses. Callon has include information because changes in operating assets and liabilities relate to the timing of cash receipts and disburser the Company may not control and the cash flow effect may not be reflected the period in which the operating activitied. Adjusted discretionary cash flow is not a measure of a company's financial performance under GAAP anot be considered as an alternative to net cash provided by operating activities, or as a measure of liquidity, or as alternative to net income (loss).
- Adjusted G&A is a supplemental non-GAAP financial measure that excludes certain non-cash incentive share-base
  compensation valuation adjustments and non-recurring expenses. Callon believes that the non-GAAP measure of
  G&A is useful to investors because it provides a meaningful measure of our recurring G&A expense and provides
  comparability period-over-period.

12.11.2025 Seite 35/38

- Full cash G&A is a supplemental non-GAAP financial measure that Callon defines as adjusted G&A cash comportant capitalized G&A excluding capitalized expense related to share-based awards. Callon believes that the non-GAA full cash G&A is useful to investors because it provides a meaningful measure of our total recurring cash G&A co expensed or capitalized, and provides for greater comparability on a period-over-period basis.
- Adjusted income and adjusted income per diluted share are supplemental non-GAAP measures that Callon believes useful to investors because they provide readers with a meaningful measure of our profitability before recording of whose timing or amount cannot be reasonably determined. These measures exclude the net of tax effects of these non-cash valuation adjustments, which are detailed in the reconciliation provided. Adjusted income and adjusted diluted share are not measures of financial performance under GAAP. Accordingly, neither should be considered substitute for net income (loss), operating income (loss), or other income data prepared in accordance with GAAF the Company believes that adjusted income and adjusted income per diluted share provide additional information to our performance. Because adjusted income and adjusted income per diluted share exclude some, but not all, it affect net income (loss) and may vary among companies, the adjusted income and adjusted income per diluted share exclude some per diluted share exclude share exclude
- Adjusted diluted weighted average common shares outstanding ("Adjusted Diluted WASO") is a non-GAAP finance which includes the effect of potentially dilutive instruments that, under certain circumstances described below, are from diluted weighted average common shares outstanding ("Diluted WASO"), the most directly comparable GAA measure. When a net loss exists, all potentially dilutive instruments are anti-dilutive to the net loss per common s therefore excluded from the computation of Diluted WASO. The effect of potentially dilutive instruments are included computation of Adjusted Diluted WASO for purposes of computing adjusted income per diluted share.
- Callon calculates adjusted EBITDA as net income (loss) before interest expense, income tax expense (benefit), of depletion and amortization, (gains) losses on derivative instruments excluding net settled derivative instruments, of evaluated oil and gas properties, non-cash share-based compensation expense, merger, integration and transfexpense, (gain) loss on extinguishment of debt, and other operating expenses. Adjusted EBITDA is not a measur performance under GAAP. Accordingly, it should not be considered as a substitute for net income (loss), operating (loss), cash flow provided by operating activities or other income or cash flow data prepared in accordance with Generation with respect to our performance or ability to meet our future debt service, capital expenditures and we requirements. Because adjusted EBITDA excludes some, but not all, items that affect net income (loss) and may companies, the adjusted EBITDA presented above may not be comparable to similarly titled measures of other comparable.
- Callon believes that the non-GAAP measure of adjusted total revenue (which is revenue including the gain or loss settlement of derivative contracts) is useful to investors because it provides readers with a revenue value more contracts of the companies who engage in price risk management activities through the use of commodity derivative instrumtion reflects the results of derivative settlements with expected cash flow impacts within total revenues. See the recomprovided above for further details.
- Callon believes that operating margin is a comparable metric against other companies in the industry and is an in
  oil and natural gas company's operating profitability per unit of production. Operating margin is a supplemental no
  measure that is defined by the Company as oil, natural gas, and NGL revenues sales price less lease operating e
  production and ad valorem taxes; and gathering, transportation and processing fees divided by total production for
- Net debt is a supplemental non-GAAP measure that is defined by the Company as total debt excluding unamortize premiums, discount, and deferred loan costs, less cash and cash equivalents. Net debt should not be considered alternative to, or more meaningful than, total debt, the most directly comparable GAAP measure. Management us to determine the Company's outstanding debt obligations that would not be readily satisfied by its cash and cash on hand. We believe this metric is useful to analysts and investors in determining the Company's leverage position Company has the ability to, and may decide to, use a portion of its cash and cash equivalents to reduce debt. This sometimes presented as a ratio with Adjusted EBITDA in order to provide investors with another means of evaluations company's ability to service its existing debt obligations as well as any future increase in the amount of such obligations.
- Callon believes that the presentation of pre-tax PV-10 value is relevant and useful to its investors because it pres discounted future net cash flows attributable to reserves prior to taking into account future corporate income taxe. Company's current tax structure. The Company further believes investors and creditors use pre-tax PV-10 values for comparison of the relative size and value of its reserves as compared with other companies. The GAAP finance most directly comparable to pre-tax PV-10 is the standardized measure of discounted future net cash flows before deducting future income tax discounted at 10 percent.
- Callon is unable to reconcile the projected adjusted free cash flow (non-GAAP) metric included in this release to perfect cash provided by operating activities (GAAP) because components of the calculation are inherently unpredictable changes to current assets and liabilities, the timing of capital expenditures, movements in oil and gas pricing, unknewents, and estimating future certain GAAP measures. The inability to project certain components of the calculating significantly affect the accuracy of the reconciliation. Additionally, Callon does not provide guidance on the items reconcile forecasted Adjusted G&A and forecasted G&A due to the uncertainty regarding timing and estimates of items. Therefore, Callon cannot reconcile forecasted Adjusted G&A to forecasted G&A without unreasonable efforeasted.

Earnings Call Information

The Company will host a conference call on Thursday, February 24, 2022, to discuss fourth quarter 2021

12.11.2025 Seite 36/38

financial and operating results, reserves, inventory, 2022 outlook, and current corporate strategy and initiatives.

Date/Time:	Thursday, February 24, 2022, at 8:00 a.m. Central Time (9:00 a.m. Eastern Time)
Webcast:	Select "News and Events" under the "Investors" section of the Company's website: www.callon.com.

An archive of the conference call webcast will also be available at www.callon.com under the "Investors" section of the website.

About Callon Petroleum Company

<u>Callon Petroleum Company</u> is an independent oil and natural gas company focused on the acquisition, exploration and development of high-quality assets in the leading oil plays of South and West Texas.

Cautionary Statement Regarding Forward Looking Information

This news release contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. Forward-looking statements include all statements regarding wells anticipated to be drilled and placed on production; future levels of development activity and associated production, capital expenditures and cash flow expectations; the Company's production and expenditure guidance; estimated reserve quantities and the present value thereof; future debt levels and leverage; and the implementation of the Company's business plans and strategy, as well as statements including the words "believe," "expect," "plans," "may," "will," "should," "could," and words of similar meaning. These statements reflect the Company's current views with respect to future events and financial performance based on management's experience and perception of historical trends, current conditions, anticipated future developments and other factors believed to be appropriate. No assurances can be given, however, that these events will occur or that these projections will be achieved, and actual results could differ materially from those projected as a result of certain factors. Any forward-looking statement speaks only as of the date on which such statement is made and the Company undertakes no obligation to correct or update any forward-looking statement, whether as a result of new information, future events or otherwise, except as required by applicable law. Some of the factors which could affect our future results and could cause results to differ materially from those expressed in our forward-looking statements include the volatility of oil and natural gas prices; changes in the supply of and demand for oil and natural gas, including as a result of the COVID-19 pandemic and various governmental actions taken to mitigate its impact or actions by, or disputes among, members of OPEC and other oil and natural gas producing countries with respect to production levels or other matters related to the price of oil; our ability to drill and complete wells, operational, regulatory and environment risks; the cost and availability of equipment and labor; our ability to finance our development activities at expected costs or at expected times or at all; our inability to realize the benefits of recent transactions; currently unknown risks and liabilities relating to the newly acquired assets and operations; adverse actions by third parties involved with the transactions; risks that are not yet known or material to us; and other risks more fully discussed in our filings with the SEC, including our most recent Annual Reports on Form 10-K and subsequent Quarterly Reports on Form 10-Q, available on our website or the SEC's website at www.sec.gov. Any forward-looking statement speaks only as of the date on which such statement is made, and the Company undertakes no obligation to correct or update any forward-looking statement, whether as a result of new information, future events or otherwise, except as required by applicable law.
