

Aris Gold To Become Operator Of The Soto Norte Gold Project In Colombia

21.03.2022 | [CNW](#)

- Marks new era for the Soto Norte Gold project with Aris Gold as operator
- Aris Gold acquiring 20% ownership interest with option to increase to 50%
- Soto Norte hosts Indicated Mineral Resources of 8.5 Moz Au and Inferred Mineral Resources of 3.6 Moz Au
- Soto Norte Feasibility Study¹ demonstrates production of over 450,000 gold ounces per year at average AISC of \$650/oz and 5.0 Moz Mineral Reserve
- Aris Gold will work hand-in-hand with the local communities to ensure protection of the Soto Norte project's ecosystem
- Aris Gold on a path to attributable production exceeding 400,000 ounces per year at AISC of approximately \$650/oz

All amounts in US dollars, unless otherwise indicated

VANCOUVER, March 21, 2022 - [Aris Gold Corp.](#) (Aris Gold or the Company) (TSX: ARIS) (OTCQX: ALLXF) announced today that it has entered into a definitive agreement with MDC Industry Holding Company LLC (Mubadala), a wholly owned subsidiary of Mubadala, a Dhahi based investment company Mubadala Investment Company PJSC, whereby Aris Gold will acquire a 20% joint venture interest in the Soto Norte gold project in Colombia, with the option to acquire a further 30% interest (the Transaction).

The Soto Norte gold project is one of the world's largest feasibility-stage projects with high-grade mineral reserves, low environmental impact, low intensity, low operating costs, and district-scale potential. Aris Gold has completed a Feasibility Study technical report on the Soto Norte project, which has been privately held since 2011, which provides a complete description of the project.

Aris Gold has also strengthened its financial position by \$100 million by upsizing the existing precious metals stream at the Marmato Mine by \$65 million and arranging a \$35 million convertible debenture.

Aris Gold will use its position as an established member of the Colombian mining industry to ensure Soto Norte is advanced to meet the highest international standards to create exceptional value for its shareholders and workforce, the Colombian government, and community partners, while implementing sustainable mining practices that protect the environment and the local ecosystem. Aris Gold operates the Marmato gold mine in the Department of Caldas, where a major expansion is under way and a 30-year license extension was received in February 2021 by agreement with the Agencia Nacional de Minería (ANM).

Aris Gold Chair Ian Telfer stated: "Acquiring interests in large-scale deposits with low technical risk is the right move for Aris Gold. This is how successful gold mining companies are built, and I'm pleased to see Aris Gold is delivering on this responsible mining strategy."

Executive Director, Industrials at Mubadala and Chairman of Minesa, Danny Dweik, said: "We are delighted to bring in Aris Gold as our operating partner in Minesa. The Soto Norte project will benefit from their technical capabilities and Colombian experience. We look forward to working with them and the local communities on bringing this world-class project to fruition."

Aris Gold CEO Neil Woodyer stated: "Aris Gold will build a successful operation using state-of-the-art technology that will deliver long-lasting benefits to the local communities and significant social development opportunities for the region. Soto Norte will dramatically increase our growth profile with its potential to produce over 450,000 ounces of gold per year. Construction on Soto Norte is expected to follow the expansion of our 100%-owned Marmato gold mine."

Director, Industrials at Mubadala and current CEO of Minesa, Mohamed Mirza, said: "The team at Aris Gold has extensive experience in the mining industry and we are excited to work with them on the Soto Norte project."

market experience and a long track record of successfully executing complex Colombian projects. We believe they are well-positioned to support Minesa in becoming a leading gold mining company in Colombia."

Soto Norte highlights

- Large, high-grade underground gold project:
 - Indicated mineral resources of 48.1 million tonnes at 5.47 grams per tonne (g/t) of gold, 35.8 g/t of silver, and containing 8.5 million ounces (Moz) of gold, 55.3 Moz of silver, and 193 million pounds (Mlb) of copper, including mineral reserves
 - Inferred mineral resources of 27.3 million tonnes at 4.06 g/t of gold, 25.9 g/t of silver, and 0.18% Cu containing gold, 22.8 Moz of silver, and 107 Mlb of copper
 - The mineralized vein structures extend to surface and are open at depth and along strike, with high exploration to target the deep structures from underground drilling stations
 - Tier 1 scale and economics: Soto Norte is designed as an underground mine with 2.6 Mtpa processing capacity and an estimated \$1.2 billion initial capital cost, including contingency and pre-production costs. The Feasibility Study estimates:
 - Average production of 450,000 ounces of gold per year
 - Life of mine average all-in sustaining costs of \$471 per ounce of gold
 - 14-year mine life, based on Probable mineral reserves of 24.8 million tonnes at 6.22 g/t of gold, 34.4 g/t of silver, and 0.18% copper, containing 5.0 Moz of gold, 27.4 Moz of silver, and 107 Mlb of copper
 - After-tax project NPV_{5%} is \$1.5 billion and IRR is 20.8%, at base case gold price of \$1,675 per ounce
 - After-tax project NPV_{5%} is \$2.0 billion and IRR is 24.4%, at gold price of \$1,925 per ounce
 - District-scale potential: The Soto Norte project is hosted within an area of just over 10% of the mining titles held by the joint venture along the mineralized La Baja fault trend that hosts other mineralized deposits. The neighbouring Galway concession has a historical resource estimate prepared by SRK Consulting, effective June 11, 2018, of 2.3 million tonnes in the Indicated category at 4.6 g/t of gold and 35 g/t of silver, containing 0.335 Moz of gold and 2.5 Moz of silver.²
 - New and informed approach to environmental permitting: Since 2015, extensive technical studies and engagement with local communities were undertaken in preparing an initial Environment and Social Impact Assessment (ESIA). Following detailed technical feedback from the Colombian environmental regulatory authority (ANLA) in 2021, drafting of a new ESIA has commenced and will include a robust Quality Assurance and Quality Control process for regulatory compliance. Aris Gold's team will contribute its knowledge and experience as well as provide a respectful, licensing process with stakeholders.
- The Soto Norte project has been designed to minimize the surface footprint, incorporate the latest technology, and meet the highest environmental and safety standards. The processing facility will produce separate gold-rich copper and pyrite concentrates without the use of cyanide or mercury at the Soto Norte site. Dried and filtered tailings will be stored in a dry-stack tailings storage facility designed to comply with Colombian and international standards.
- Social development opportunities: Soto Norte will be a significant project for the local and regional communities, providing employment and skills training for up to 1,800 construction contractors and up to 940 full-time operations personnel. A strategy to procure goods and services from the regional community.
 - Sets Aris Gold on a path to produce 400,000 ounces per year: Together with the Marmato mine, which is expected to produce 175,000 ounces of gold per year when both the Upper Mine and Lower Mine are operating, the transaction will position Aris Gold as a significant mid-tier gold producer in Colombia with aggregate attributable production exceeding 400,000 ounces of gold per year at all-in sustaining costs per ounce sold³ of approximately \$650 and generating significant cash flow.

Soto Norte Joint Venture Transaction

On closing, Aris Gold and Mubadala will enter into a comprehensive joint venture agreement to govern the joint venture through which environmental licensing, project development and construction, and mine operation of Soto Norte will be managed. Aris Gold will be the project operator, and the joint venture partners will share project costs on a pro-rata ownership basis. Key highlights include:

- Cash payments of \$100 million from Aris Gold to Mubadala for a 20% interest in the joint venture company and Mubadala's closing of the Transaction expected to occur in April 2022 following satisfaction of customary closing conditions. The cash payments are structured in two tranches with \$50 million at closing and \$50 million within 12 months of closing.
- Aris Gold has the option to acquire an additional 30% interest in the joint venture company and Minesa for a cash payment of \$300 million (the Option). Aris Gold may exercise the Option at any time prior to the earlier of a) 10 weeks following the ESIA approval from ANLA for development of the Soto Norte Project or b) 42 months after closing (Option Expiry Date). The drafting, submission, and approval process for a new ESIA is expected to take approximately two years.
- In the event Aris Gold does not exercise the Option prior to the Option Expiry Date, Mubadala may repurchase Aris Gold's 20% interest in the joint venture company at a price equal to the aggregate amount invested by Aris Gold up to the Option Expiry Date (the Repurchase Price) plus the initial cash payments and paid cash calls).
- Following the start of commercial operations, the joint venture partners intend to invest in long-term strategic exploration programs designed to expand the current mineral resources, upgrade mineral resource classification to support the conversion to mineral reserves and extend the mine life.
- In consideration of the exploration potential at Soto Norte, Mubadala is retaining a precious metals streaming interest in the joint venture company of 7.35% of payable gold and 100% of payable silver. The stream will only apply to incremental production after the current mineral reserves have been produced which is expected to be achieved following depletion of the current mineral reserves and approximately 30% of the current Indicated mineral resource. Following the 5.7 Moz gold production threshold, Aris Gold's ownership in the joint venture may be decreased based on a remaining life of mine valuation formula that assigns the economic burden of the precious metals streaming to Aris Gold's joint venture interest, rather than Mubadala. Mubadala has the option to avoid this future potential ownership dilution by paying the stream burden valuation amount to Mubadala.
- Aris Gold and Mubadala will advance the Soto Norte project with consideration of the Equator Principles and the IFC Performance Standards.

Aris Gold Corporate Finance Update

In preparation for entering the Soto Norte joint venture, Aris Gold has amended the existing \$110 million precious metals debenture with Wheaton Precious Metals International (WPMI) to increase the aggregate total funding amount to \$150 million, with additional payments to Aris Gold of (i) \$15 million upon closing of the Transaction and (ii) \$50 million payable upon completion of the construction and development of the new Lower Mine.

In exchange for the increased upfront deposits, WPMI has agreed to purchase 10.5% of the gold production and 100% of the silver production from the Marmato Upper and Lower mines until 310,000 ounces of gold and 2.15 million ounces of silver have been delivered, after which the stream drops to 5.25% of the gold production and 50% of the silver production for the life of the mine.

Aris Gold has also arranged to issue, through its wholly owned subsidiary Aris Gold Acquisition Corp., a \$35 million convertible senior unsecured debenture to [GCM Mining Corp.](#) (TSX:GCM) due 18 months from closing of the Transaction (the Debenture). At any time after 12 months from closing, the Debenture is convertible, in whole or in part, into common shares of Aris Gold at a conversion price that will be determined in the context of the market and rules of the TSX following the issuance of this release. The Debenture will pay interest monthly with an annualized coupon of 7.5%. The issuance of the Debenture is subject to approval upon closing of the Transaction and is subject to the approval of the TSX. The ability of GCM to fully execute its conversion of the Debenture will be subject to disinterested Aris Gold shareholder approval at the next annual meeting of shareholders.

Soto Norte Mineral Resources and Mineral Reserves

Table 1: Soto Norte Mineral Resources, inclusive of Mineral Reserves, effective May 22, 2019⁴

Classification	Tonnes (kt)	Grade			Contained Metal		
		Gold (g/t)	Silver (g/t)	Copper (%)	Gold (koz)	Silver (koz)	Copper (klb)
Indicated Mineral Resources	48,062	5.47	35.8	0.18	8,454	55,324	193,422
Inferred Mineral Resources							

27,343

25.9

0.18

3,571

22,754

107,281

Notes:

- 1) Mineral resources are not mineral reserves and do not have demonstrated economic viability.
- 2) Indicated mineral resources are presented inclusive of probable mineral reserves.
- 3) The mineral resource estimate was prepared by Benjamin Parsons, MSc, MAusIMM (CP) of SRK Consulting, who is a Qualified Person as defined by National Instrument 43-101. Mr. Parsons has reviewed and verified the drilling, sampling, assaying, and QAQC protocols and results, and is of the opinion that the sample recovery, preparation, analyses, and security protocols use for the mineral resource estimate are reliable for that purpose.
- 4) Totals may not add up due to rounding.
- 5) Mineral Resources are reported above a cut-off value of \$47 per tonne, which considers metal price assumptions of \$1,300 per ounce of gold, \$18 per ounce of silver, and \$6,800 per tonne of copper, metallurgical recovery assumptions of 92% for gold and silver and 76% for copper, marginal mining costs, processing costs, general and administrative costs, and other factors.
- 6) Aside from the requirements to amend and extend the Soto Norte 0095-68 mining license and to prepare, submit, and receive approval of a new ESIA from ANLA, there are no known legal, political, environmental, or other risks that could materially affect the potential development of the mineral resources and mineral reserves.

Classification	Tonnes (kt)	Grade			Contained Metal		
		Gold (g/t)	Silver (g/t)	Copper (%)	Gold (koz)	Silver (koz)	Copper (klb)
Probable Mineral Reserves	24,767	6.22	34.4	0.19	4,950	27,386	102,868

Notes:

- 1) The mineral reserve estimate has been approved by Chris Bray, BEng, MAusIMM (CP) of SRK Consulting, who is a Qualified Person as defined by National Instrument 43-101.
- 2) Totals may not add up due to rounding.
- 3) Mineral Reserves are reported above a cut-off value of \$120 per tonne, which was selected based on a hill of value study to optimize value, and which considers metal price assumptions of \$1,300 per ounce of gold, \$18 per ounce of silver, and \$7,000 per tonne of copper, metallurgical recovery assumptions of 92.5% for gold, 92% for silver, and 76% for copper, mining costs, processing costs, general and administrative costs, and other factors.
- 4) Aside from the requirements to amend and extend the Soto Norte 0095-68 mining license and to prepare, submit, and receive approval of a new ESIA from ANLA, there are no known legal, political, environmental, or other risks that could materially affect the potential development of the mineral resources and mineral reserves.

Historical Resource Estimate

The historical resource estimate at Galway/Calvista has not been verified by Aris Gold and was prepared by SRK Consulting, effective June 11, 2018, prior to Aris Gold acquiring an interest in Minesa. While SRK used industry standard and reliable methods to estimate the mineral resources, categorized the estimates in accordance with CIM definition standards, and reported the resources above a NSR cut-off value of \$47 per tonne to consider initial underground mining costs, processing costs, and metallurgical recoveries of 92% for gold and silver and 76% for copper, treatment and payability terms, and metal price assumptions of \$1,300 per ounce of gold, \$18 per ounce of silver, and \$5,000 per tonne of copper, the Qualified Person has not done sufficient work to classify the historical estimate as current mineral resources, nor is there a publicly disclosed technical report to support the disclosure of the mineral resources, and therefore Aris Gold is not treating the historical estimate as current mineral resources.

Technical Information and Qualified Persons

The scientific disclosure and technical information included in this news release is based on information included in the Feasibility Study prepared by Ben Parsons MSc, MAusIMM (CP), Chris Bray BEng, MAusIMM (CP), Dr John Willis PhD, BE (MET), MAusIMM (CP), all of SRK Consulting, and by Dr Henri Sangam PhD, P.Eng of SNC Lavalin, each of whom is independent of the Company within the meaning of NI 43-101 and is a Qualified Person as defined by NI 43-101. The Feasibility Study was also prepared by Robert Anderson, P.Eng., of Minesa, who is designated as a non-independent Qualified Person within the meaning of NI 43-101 due to his extensive involvement with the mineral process and geometallurgical testwork and the consulting groups undertaking the process plant design.

The technical information in this news release was reviewed and approved by Pamela De Mark, P.Geo, Vice President Exploration of Aris Gold, who is a Qualified Person as defined by NI 43-101.

BMO Capital Markets acted as M&A advisor to Mubadala Investment Company.

About Aris Gold

Aris Gold is a Canadian mining company listed on the TSX under the symbol ARIS and on the OTCQX under the symbol ALLXF. The Company is led by an executive team with a demonstrated track record of creating value through building globally relevant gold mining companies. Aris Gold operates the Marmato mine in Colombia, where a modernization and expansion program is under way, and the Jubay project, an advanced exploration stage gold project in the Abitibi greenstone belt of Ontario, Canada. Aris Gold plans to pursue acquisition and other growth opportunities to unlock value creation from scale and diversification.

Additional information on Aris Gold, including the Soto Norte feasibility study, can be found at www.arisgold.com and www.sedar.com.

¹ NI 43-101 Technical Report Feasibility Study of the Soto Norte Gold Project, Santander, Colombia with an effective date of January 1, 2021 prepared by SRK Consulting (UK) Limited, SNC Lavalin, and Minesa (the Feasibility Study). The Feasibility Study will be available on SEDAR under Aris Gold's profile and on Aris Gold's website at www.arisgold.com.

⁵ For full details on the Soto Norte Mineral Reserve Estimate, see the Feasibility Study

This news release contains "forward-looking information" or "forward-looking statements" within the meaning of Canadian securities legislation. All statements included herein, other than statements of historical fact, including without limitation statements relating to the Transaction; Minesa and its management; the Soto Norte project; Aris Gold's relationship with local communities and the protection of the Soto Norte project's ecosystem; the Feasibility Study; the benefits of Aris Gold's interest in and operatorship of the Soto Norte project; expected production at Marmato and the Soto Norte project; Aris Gold's position as a mid-tier gold producer in Colombia; all-in sustaining costs; cash flows; the joint venture agreement and streaming arrangements between Aris Gold and Mubadala; joint venture strategy; compliance with the Equator Principles and the IFC's Performance Standards; statements related to the potential of the Soto Norte project; and Aris Gold's strategy are forward-looking. Generally, the forward-looking information and forward-looking statements can be identified by the use of forward looking terminology such as "become", "believe", "estimate", "expect", "forward", "intend", "plan", "potential" or variations of such words and phrases or state that certain actions, events or results "may", "could", "would", "might" or "will" be taken, "occur" or "be achieved".

Forward looking information and forward looking statements, while based on management's best estimates and assumptions, are subject to known and unknown risks, uncertainties and other factors that may cause the actual results, level of activity, performance or achievements of Aris Gold to be materially different from those expressed or implied by such forward-looking information or forward looking statements, including but not limited to: the ability of the Aris Gold management team to successfully integrate with the current operations, successful completion of the ESIA and receipt of approval from ANLA (including the Soto Norte 0095-68 mining license amendment and extension from the ANM), receipt of securities regulatory and stock exchange approvals, risks related to international operations, risks related to general economic conditions, uncertainties relating to operations during the COVID-19 pandemic, actual results of current exploration activities, availability of quality assets that will add scale, diversification and complement Aris Gold's growth trajectory; changes in project parameters as plans continue to be refined; fluctuations in prices of metals including gold; the ability to convert mineral resources to mineral reserves; fluctuations in foreign currency exchange rates, increases in market prices of mining consumables, risks associated with holding derivative instruments (such as credit risks, market liquidity risk and mark-to-market risk), possible variations in mineral reserves, grade or recovery rates; failure of plant, equipment or processes to operate as anticipated; changes in national and local government legislation, taxation, controls, regulations, regulations and political or economic developments in Canada or Colombia, accidents and operations, labour disputes, title disputes, claims and limitations on insurance coverage and other risks of the mining industry; delays in obtaining governmental approvals including obtaining required environmental and other licenses, or in the completion of development or construction activities, changes in national and local government regulation of mining operations, tax rules and regulations, and political and economic developments in countries in which the Company operates, as well as those factors discussed in the section entitled "Risk Factors" in Aris Gold's most recent AIF available on SEDAR at www.sedar.com.

Although Aris Gold has attempted to identify important factors that could cause actual results to differ materially from those contained in forward-looking information and forward-looking statements, there may be other factors that cause results not to be as anticipated, estimated or intended. There can be no assurance that such information or statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such information or statements. The Company has and continues to disclose in its Management's Discussion and Analysis and other publicly filed documents, changes to material factors or assumptions underlying the forward-looking information and forward-looking statements and to the validity of the information, in the period the changes occur. The forward-looking statements and forward-looking information are made as of the date hereof and Aris Gold disclaims any obligation to update any such factors or to publicly announce the result of any revisions to any of the forward-looking statements or forward-looking information contained herein to reflect future results. Accordingly, readers should not place undue reliance on forward-looking statements and information.

Certain information contained in the news release includes market and industry data that has been obtained from or is based upon estimates derived from third party sources. Although the data is believed to be reliable, Aris Gold has not independently verified such information and cannot provide any assurance of its accuracy, currency, reliability, or completeness.

Non-IFRS and Other Financial Measures and Ratios

Certain non-IFRS and other non-financial measures and ratios are included in this press release, including all-in sustaining costs per ounce sold. Please see Aris Gold's December 31, 2021 management's discussion and analysis (MD&A) for explanations and discussion of non-IFRS and other non-financial measures and ratios. The Company believes that these measures and ratios, in addition to conventional measures and ratios prepared in accordance with International Financial Reporting Standards ("IFRS"), provide investors an improved ability to evaluate the underlying performance of the Company. The non-IFRS and other non-financial measures and ratios are intended to provide additional information and should not be considered in isolation or as a substitute for measures or ratios of performance prepared in accordance with IFRS. These measures and ratios do not have any standardized meaning prescribed under IFRS, and therefore may not be comparable to other issuers. Certain additional disclosures for these non-IFRS measures have been incorporated by reference and can be found in the section 'Non-IFRS Measures' in the December 31, 2021 MD&A available on SEDAR at www.sedar.com and on the Company's website.
