Perth, Australia - [Torian Resources Ltd.](#)'s (ASX:TNR) ongoing drilling campaign at its flagship Mt Stirling Project in Western Australia's Eastern Goldfields has returned additional significant gold intercepts, extending mineralisation beyond previous resource boundaries.

Ahead of announcing a new Total Mineral Resource Estimate (MRE) next month, drilling across 160 holes at Mt Stirling's identified MS Viserion Gold System was highlighted by a 33m intersection from 196m @ 1.78 g/t Au; and 5m @ 8.52 g/t Au which includes 2m @ 16.19 g/t Au and 1m @ 20.70 g/t Au.

Torian Executive Director, Mr Peretz Schapiro, said the drilling results had increased the company's confidence in Mt Stirling's upcoming Mineral Resource Estimate.

"We have identified a multitude of structural prospective down-dip and along plunge gold target zones at MS Viserion for continued resource ounce discovery and expansion," Mr Schapiro said.

"Two RC rigs are now conducting a further 3,481m of extensional drilling over 21 holes, ahead of the upcoming resource update, and an Optimisation Study thereafter."

Mr Schapiro said results from the Skywing prospect were currently being reviewed while further drilling was also planned to potentially delineate a maiden resource at Estera, as well as follow up on the Hydra and Tyrannus high grade targets where significant assays were returned.
