

Red Pine Intersects 40.07 g/t Gold Over 1.18 Meters at the North End of Surluga and Presents Additional Results from Darwin-Grace

30.03.2022 | [GlobeNewswire](#)

TORONTO, March 30, 2022 - [Red Pine Exploration Inc.](#) (TSXV: RPX, OTCQB: RDEXF) ("Red Pine" or the "Company") is pleased to report on new results from its 2022 Phase 1 exploration program, which have provided confirmation of potential to expand the current resource models of the Wawa Gold Project. Of significance is an intersection of quartz veining with visible gold in hole SD-22-321, located at the north end of Surluga, above the Jubilee Shear Zone. Intersections in holes SD-22-326 and SD-22-337 of the same system also contain visible gold (assays pending). Refer to Figure 1.

Table 1 - Quartz veining above the Jubilee Shear Zone*

Hole	From (m)	To (m)	Length (m)*	Visible Gold	Gold (g/t)	Zone
SD-22-321	219.79	226.21	6.42	Yes	8.46	Surluga North - Quartz vein network
	Including 225.03	226.21	1.18		40.07	

Grace-Nyman Gold System: Extension of mineralization in the Grace Shear Zone, Nyman Shear Zone and the discovery of a new mineralized structure

Drilling in the Grace-Nyman gold system, host of the historical Darwin-Grace mine, continues to uncover new mineralized structures (refer to Figure 2). Red Pine's 2022 Phase 1 exploration program has now traced gold mineralization along the Grace Shear Zone over a total strike length of 650 meters.

East of the Darwin-Grace Mine, hole DG-22-329 discovered a shear zone containing a quartz vein with visible gold. That same structure was intersected in additional drill holes completed on the same drill pad. Hole SD-22-329 also extended the footprints of gold mineralization in the Nyman Shear Zone 210 meters along strike of the intersection of 11.47 g/t gold over 2.73 meters in that structure in DG-22-317 (refer to press release dated March 16th, 2022).

"The consistent drilling success of the Wawa Gold Project demonstrates the continuity of the system with both high-grade and bulk underground components. These recent results demonstrate the advancement of our knowledge and data collection of the system, in addition to the pervasive mineralization throughout the Wawa Gold Corridor. With our 2022 Phase 1 drill program well underway, further assays pending and encouraging visible gold indicators in 5 holes as of the time of this press release, we look forward to sustained performance with the drill bit." - Quentin Yarie, President and CEO of Red Pine Exploration.

Table 2 - Expansion of gold mineralization in the Darwin-Grace hosts*

Hole	From (m)	To (m)	Length (m)*	Visible Gold	Gold (g/t)	Zone
------	----------	--------	-------------	--------------	------------	------

DG-22-327	95.10	97.23	2.13	Yes	5.35	
	Including					Grace Shear Zone
	95.10	96.19	1.09	Yes	10.00	
DG-22-329	51.68	53.68	2.00	Yes	6.60	
	Including					Shear Zone
	52.68	53.68	1.00	Yes	13.14	
	129.00	134.34	5.34		0.89	Nyman Shear Zone

Wawa Gold Corridor Expansion: Discovery of multiple zones of gold mineralization west of the Jubilee Shear Zone

Hole SD-21-310 discovered multiple zones of gold mineralization west of the Jubilee Shear Zone in the Wawa Gold Corridor. This includes the discovery of 9.30 g/t gold over 3.08 meters, 300 meters west of the Jubilee Shear Zone. These intersects of gold mineralization are hosted in a network of shear zones outside of the Jubilee Shear zone and extend the footprint of gold mineralization in the Wawa Gold Project, refer to Figure 1.

Table 3 - Additional Drilling Highlights in the Wawa Gold Corridor* (refer to Figure 4)

Hole	From (m)	To (m)	Length (m)*	Est. True Width (m)	Visible Gold	Gold (g/t)	Zone
SD-21-309	334.34	334.83	0.49		Yes	4.27	Quartz vein
	362.96	365.62	2.66	1.89		4.36	
	Including						Minto Mine Shear Zone
	363.59	364.27	0.68	0.48		16.40	
	484.37	484.87	0.50			7.10	Shear zone

	112.31	125.49	13.18		1.18	
SD-21-310						
Including						Wawa Gold Corridor west of Jubil
	115.35	119.3	3.95		3.60	
	158.14	202.33	44.19		0.48	
Including						Wawa Gold Corridor west of Jubil
SD-21-310	158.14	159.74	1.60		2.56	
	188.17	202.33	14.16		1.04	
	312.41	315.49	3.08		9.30	
Including						Wawa Gold Corridor west of Jubil
	314.54	315.49	0.95		25.95	

** Assay results presented over core length are estimated to represent:*

> 75% true width in the Grace Shear Zone, the Nyman Shear Zone, the shear zones in SD-21-309 and DG-22-329, Zones 2 and 3 of the Wawa Gold Corridor;> 65% true width in the Surluga North - Quartz vein network and Zone 1 of the Wawa Gold Corridor.

All drilling data for the Wawa Gold project, including collar, survey, and individual assays, is available on Red Pine's website at <https://www.redpineexp.com/projects-wawa>

Quality Assurance/Quality Control ("QA/QC") Measures

Drill core samples were transported in security sealed bags for analyses at Actlabs in Ancaster, Ontario. Individual samples were labelled, placed in plastic sample bags and sealed. Groups of samples were then placed into durable rice bags and then shipped. The residual coarse reject portions of the samples remain in storage if further work or verification is needed.

Red Pine has implemented a quality-control program to comply with best practices in the sampling and analysis of drill core. As part of its QA/QC program, Red Pine inserts external gold standards (low to high grade) and blanks every 20 samples in addition to random standards, blanks, and duplicates.

Qualified Person

Quentin Yarie, P.Geo. and Chief Executive Officer of Red Pine and the Qualified Person, as defined by National Instrument 43-101, has reviewed, and approved the news release's technical information.

COVID-19 Precautions

Red Pine has developed and implemented compliant precautions and procedures according to guidelines for the Province of Ontario. Protocols were put in place to ensure our employees' and contractors' safety, thereby reducing the potential for community contact and spreading of the virus.

About Red Pine Exploration Inc.

[Red Pine Exploration Inc.](#) is a gold exploration company headquartered in Toronto, Ontario, Canada. The Company's common shares trade on the TSX Venture Exchange under the symbol "RPX" and on the OTCQB Markets under the symbol "RDEXF".

The Wawa Gold Project is in the Michipicoten Greenstone Belt of Ontario, a region that has seen major investment by several producers in the last five years. Its land package hosts numerous historic gold mines and is over 6,900 hectares in size. The Company's Chairman of the Board is Paul Martin, the former CEO of Detour Gold. The Board has extensive and diverse experience at such entities as Alamos, Barrick, Generation Mining, Detour Gold and [Paramount Gold Nevada Corp.](#) Led by Quentin Yarie, CEO, who has over 25 years of experience in mineral exploration, Red Pine is strengthening its position as a major mineral exploration and development player in the Michipicoten region.
