Astra Exploration's prime objective is to discover and develop world-class precious metals deposits in northern Chile. Our flagship project, Pampa Paciencia, is located 175 km (108 miles) north of the El Peñón mine and is a recent epithermal discovery that produced significant gold and silver grades from limited trenching and drilling. Like El Peñón, Pampa Paciencia is in the same geological belt, is the same approximate age, hosts the same style of mineralization and shows potential to host a robust epithermal precious metals vein system. Additionally, we have 100% ownership of the Cerro Bayo project, a largely unexplored HSE/Porphyry gold system in the Maricunga Belt of Northern Chile. Astra is listed on the TSX Venture under symbol ASTR and an OTC listing in the U.S. is pending and expected in 2022.
