Sandeep Singh, President and CEO of Osisko commented: "We achieved record cash margins in the first quarter highlighting the strength of our high-quality asset base coupled with a surge in the gold price. As previously mentioned, GEO deliveries are expected to increase over the course of the year as seasonality impacts dissipate and ramp-ups progress at various assets. We are also excited to announce that stream repayments have been reactivated from the Renard mine, including from a diamond sale in May, and we have received repayment in full of amounts owing on the working capital facility.

Given the current inflationary market dynamics, both globally and specific to the mining sector, we feel Osisko offers a compelling value and growth investment, which is not subject to many of the same inflationary risks."
