

Central Petroleum Limited: Gas Sales Commence into the East Coast Trading Markets

04.05.2022 | [ABN Newswire](#)

Brisbane, Australia - [Central Petroleum Ltd.](#) (ASX:CTP) (FRA:C9J) (OTCMKTS:CNPTF) announces that it, on behalf of the Mereenie Joint Venture, has negotiated as-available transportation and market trading arrangements that allow for the sale of non-firm gas from the Mereenie gas field into the high-priced east coast trading hubs, including Brisbane and Sydney Short Term Trading Markets (STTMs).

Central completed its maiden east coast spot sale on Tuesday, 3 May 2022, achieving an exfield price (i.e., sale price net of transportation costs) of over \$13/GJ. Central highlights the following key points:

- Central's gas marketing strategy targets selling 15% of production capacity on a non-firm basis. Sales of non-firm volumes have been limited to delivery in the Northern Territory due to a lack of flexible non-firm gas transportation into the east coast market.
- Central and its Mereenie Joint Venture partners have recently entered into gas transportation arrangements allowing for the cost-efficient delivery of up to 7TJ/d (gross JV) of non-firm gas on a day-to-day basis into eastern Australia for an initial term of 2 years.
- Central and its Mereenie Joint Venture partners have also entered into a master gas sales agreement with Strategic Gas Market Trading Pty Ltd allowing for the sale of non-firm gas through the Brisbane, Sydney, and Melbourne trading hubs (including the Brisbane and Sydney STTMs).
- These arrangements help Central maximise sales and margins for non-firm gas, potentially providing more cashflow to invest in further exploration, appraisal, and development activities.
- Monday's ex-field price reflects what we believe are strong gas market fundamentals, as well as elevated volatility due to recent global events in Europe. Pricing at the various hubs is currently in excess of \$16.00/GJ, having reached a high of almost \$20/GJ in Sydney and Brisbane on 8 April 2022 (refer to Figure 1*).
- An ex-field price (net of transportation) of over \$13/GJ is roughly double the average price Central received for non-firm gas in the March Quarter. Based on this pricing dynamic, an average of 1TJ/d of spot sales sold over 12 months could generate over \$2m in additional profit.

Comments from the CEO

Mr Leon Devaney, Central's Managing Director, commented "This is a very exciting development for the Mereenie Joint Venture. Commencement of the Northern Gas Pipeline in 2019 was a milestone for the company as it unlocked the opportunity for firm gas sales into the broader east coast market. We haven't had the same ability to sell non-firm gas into the east coast spot market, which as we have seen over the past few months can be very attractive. Today's announcement is another milestone for gas marketing from Mereenie, with non-firm production now able to go to those east coast markets with the greatest need."

About Central Petroleum Limited:

[Central Petroleum Ltd.](#) (Central) is a well-established, and emerging ASX-listed Australian oil and gas producer (ASX:CTP). In our short history, Central has grown to become the largest onshore gas producer in the Northern Territory (NT), supplying industrial customers and senior gas distributors in NT and the wider Australian east coast market.

Central is positioned to become a significant domestic energy supplier, with exploration and development plans across 180,000 km² of tenements in Queensland and the Northern Territory, including some of Australia's largest known onshore conventional gas prospects. Central has also completed an MoU with Australian Gas Infrastructure Group (AGIG) to progress the proposed Amadeus to Moomba Gas Pipeline to

a Final Investment Decision.

We are also seeking to develop the Range gas project, a new gas field located among proven CSG fields in the Surat Basin, Queensland with 135 PJ (net to Central) of development-pending 2C contingent resource.
