

Starcore Announces 4th Quarter Production Results

09.05.2022 | [Newsfile](#)

Vancouver, May 9, 2022 - [Starcore International Mines Ltd.](#) (TSX: SAM) ("Starcore" or "the Company") announces production results for the fourth fiscal quarter ended April 30, 2022, at its San Martin Mine ("San Martin") in Queretaro, Mexico. "This quarter's production was higher than previous quarters, but more importantly, we have achieved more stable production due to the consolidation of the exploration carried out during the year resulting in new higher-grade reserves," stated Salvador Garcia, Chief Operating Officer of the Company. "This has further entrenched our main objective of producing profitable ounces in all areas of the mine."

An important contributor to the good results this quarter was the unexplored area of the San Martin vein, mentioned in the Q3 Production Results press release of February 17, 2022. Preparation and development of this vein during this quarter allowed us to commence exploitation which found that the ore grade was better than we expected. Further development is ongoing.

"Another important area of the mine is the east part of the mine where we drilled positive holes last year. The development to this area has finally been completed to begin the preparation and exploitation of the vein," further commented Salvador Garcia.
