About Viva Gold Corp:

[Viva Gold Corp.](#) holds 100% of the Tonopah Gold Project, a large land position consisting of approximately 10,500 acres located on the world class Walker Lane Trend in western Nevada, 30 minutes' drive south-east of the Kinross Round Mountain mine and 20 minutes' drive from the Town of Tonopah. The project has a measured and indicated contained mineral gold resource of 394,000 ounces at a gold grade of 0.78 grams/tonne and 206,000 ounces of Inferred resource at 0.87 grams/tonne. Viva is advancing the project towards feasibility and permitting.

Viva is committed to Environmental, Social and Responsible Governance ("ESG") of its business and strives to operate in a manner that supports environmental and social initiatives and responsible corporate governance. Viva made significant progress in 2021 in working with its regulators to advance the environmental and social baseline study efforts required to support future Mining Plan of Operations review under the National Environmental Policy Act for the Project, and other Nevada State environmental permitting requirements. These efforts demonstrate our focus and commitment to de-risk and add value to the Tonopah project as detailed in our December 7, 2021 press release.

Viva Gold trades on the TSX Venture exchange "VAU", on the OTCQB "VAUCF" and on the Frankfurt exchange "7PB". Viva has a tight capital structure with 91.6 million shares outstanding and a strong management team and board with both gold exploration and production experience. Viva is building market awareness as the Company advances the Tonopah Gold Project. For additional information on Viva Gold and the Tonopah Gold Project, please visit our website: www.vivagoldcorp.com.

Forward-Looking Information:

This news release contains certain information that may constitute forward-looking information or forward-looking statements under applicable Canadian securities legislation (collectively, "forward-looking information"), including but not limited to drilling operations and estimates of gold mineral resource at the Tonopah Gold Project. This forward-looking information entails various risks and uncertainties that are based on current expectations, and actual results may differ materially from those contained in such information. These uncertainties and risks include, but are not limited to, the strength of the global economy, inflationary pressures, pandemics, and issues and delays related to permitting activities; the price of gold; operational, funding and liquidity risks; the potential for achieving targeted drill results, the degree to which mineral resource estimates are reflective of actual mineral resources; the degree to which factors which would make a mineral deposit commercially viable are present; the risks and hazards associated with drilling and mining operations; and the ability of Viva to fund its capital requirements. Risks and uncertainties about the Company's business are more fully discussed in the Company's disclosure materials filed with the securities regulatory authorities in Canada available at www.sedar.com. Readers are urged to read these materials. Viva assumes no obligation to update any forward-looking information or to update the reasons why actual results could differ from such information unless required by law.

Cautionary Note to Investors --- Investors are cautioned not to assume that any "measured mineral resources", "indicated mineral resources", or "inferred mineral resources" that the Company reports in this news release are or will be economically or legally mineable. United States investors are cautioned that while the SEC now recognizes "measured mineral resources", "indicated mineral resources" and "inferred mineral resources", investors should not assume that any part or all of the mineral deposits in these categories will ever be converted into a higher category of mineral resources or into mineral reserves. These terms have a great amount of uncertainty as to their economic and legal feasibility. Under Canadian regulations, estimates of inferred mineral resources may not form the basis of feasibility or pre-feasibility studies, except in limited circumstances. Further, "inferred mineral resources" have a great amount of uncertainty as to their existence and as to their economic and legal feasibility. It cannot be assumed that any part or all of an inferred mineral resource will ever be upgraded to a higher category. The mineral reserve and mineral resource data set out in this news release are estimates, and no assurance can be given that the anticipated tonnages and grades will be achieved or that the indicated level of recovery will be realized.

Neither TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this release.
