

Resouro Mobilizes for Exploration at its Flagship Novo Mundo Gold Project

15.06.2022 | [Newsfile](#)

Vancouver, June 15, 2022 - [Resouro Gold Inc.](#) (TSXV: RAU) ("Resouro" or the "Company") is pleased to report that it has mobilized its exploration team and contracted a diamond drill rig for an initial program at its 100% owned Novo Mundo Gold Project in Mato Grosso, Brazil.

The initial exploration and drill program will be aimed at further understanding the structural control of the high-grade shoots identified in previous drilling at Novo Mundo to complete a report prepared in accordance with the requirements of National Instrument 43-101 - Standards of Disclosure for Mineral Projects ("NI 43-101").

The preliminary program will include:

- 1500m of drilling along Luisão, one of the major mineralized trends. The objective is to; to test continuity along strike and down plunge of the existing non-NI 43-101 resource.
- The preliminary program will include 13 drill holes which will test about 800m of the 4km long anomalous trend. Drilling will test high-grade surface mineralization on two of the main artisanal open pits along the trend.
- Exploration program also includes re-logging of historical drill cores for hydrothermal alteration definition and multi-element analysis.
- A regional geological mapping and rock chip sampling will be carried out in parallel with the drilling to further understand other defined drill targets along the major mineralized trends.
- Resouro's exploration team will also prepare lines for an IP geophysical survey. The IP survey will be designed to identify hot spots of high sulphide mineralisation which are associated with high gold grades along the 6km long mineralised trend contained within Resouro's Novo Mundo Mineral Rights.

Qualified Persons

The technical content of this news release has been reviewed and approved by Marcelo Juilano de Carvalho, BSc and MSc in Geology, PhD in Regional Metalogenesis, a Director, Chief Operating Officer and Chief Geologist of the Company, and a Qualified Person as defined by National Instrument 43-101.
