

# Tactical Resources Corp. Initiates Independent NI 43-101 Technical Report on Texas Project

23.06.2022 | [GlobeNewswire](#)

VANCOUVER, June 23, 2022 - [Tactical Resources Corp.](#) (CSE: RARE) (OTC: USREF) (“Tactical Resources” or the “Company”), a mineral exploration and development company focused on the rare earth elements (“REEs”) that drive the critical technologies of the future, has initiated work to complete an independent NI 43-101 report on its Peak Project in Texas.

Tactical Resources has engaged Apex Geoscience Ltd. (“Apex”) of Edmonton, Alberta to provide independent consulting services to complete a geological introduction technical report in accordance with the Canadian Institute of Mining, Metallurgy and Petroleum “Best Practices and Reporting Guidelines” for disclosing mineral exploration and the Canadian Securities Administration National Instrument 43-101 (NI 43-101) Standards of Disclosure for Mineral projects and guidelines for technical reporting. This work will include geological assessment including a site inspection which was completed on June 11th, as well as compilation, analysis, and verification of results from field work completed on the tailings. The resulting analysis will form a geological introduction NI 43-101 technical report of the project including conclusions and advisements based upon their findings.

Company CEO, Ranjeet Sundher, states, “We are increasingly motivated by world events that are clearly signalling the need for the development of domestic supply. As noted in recent media and research reports, China, the world’s biggest producer of magnet rare earth oxides could stop exporting these increasingly critical minerals within the next decade due to increasing internal demand and a shortage in global supply. Now is the time to identify and develop these key national assets and pave the way for the investment and effort that are sure to follow as the current and future projects advance into production. We are convinced there is a clear path forward to unlock shareholder value in this important sector of the resource industry.”

Tactical Resources is committed to becoming a premier North American developer of REE products to meet domestic supply chain needs. The Peak Project is a tailings offtake venture based upon active cut rock operations of the Sierra Blanca Quarry, LLC located in Hudspeth County, Texas within the Sierra Blanca Complex located 68 miles southeast of El Paso, Texas and two miles southeast of the Round Top Rare Earth Element project owned by Texas Minerals Resources Corporation & USA Rare Earth. For more information on the Peak Project, watch this video here, or visit the Tactical Resources website.

On Behalf of The Board of Directors, Sincerely,

~Ranjeet Sundher~

## ***Forward Looking Information Disclaimer***

*This news release contains statements and information that, to the extent that they are not historical fact, may constitute “forward-looking information” within the meaning of applicable securities legislation.*

*Forward-looking information may include financial and other projections, as well as statements regarding future plans, objectives, or economic performance, or the assumption underlying any of the foregoing. In some cases, forward-looking statements can be identified by terms such as “may”, “would”, “could”, “will”, “likely”, “except”, “anticipate”, “believe”, “intend”, “plan”, “forecast”, “project”, “estimate”, “outlook”, or the negative thereof or other similar expressions concerning matters that are not historical facts. Examples of such statements include, but are not limited to, statements with respect to the preparation of an NI 43-101 technical report for the Peak Project, and increased demand for domestically produced REEs.*

*Forward-looking information is based on the assumptions, estimates, analysis, and opinions of management made in light of its experience and its perception of trends, current conditions and expected developments, as well as other factors that management believes to be relevant and reasonable in the circumstances at the date that such statements are made, but which may prove to be incorrect. The material factors and assumptions used to develop the forward-looking information contained in this news release include, but are not limited to, key personnel and qualified employees continuing their involvement with the Company; the Company’s ability to secure additional financing on reasonable terms; the competitive conditions of the sector in which the Company operates; and laws and any amendments thereto applicable to the Company.*

*Forward-looking information involves known and unknown risks, uncertainties and other factors that may cause the actual results, performance or achievements of the Company to differ materially from any future results, performance or achievements expressed or implied by the forward-looking information, including, without limitation, risks relating to the future business plans of the Company; risks that the Company will not be able to retain its key personnel; risks that the Company will not be able to secure financing on reasonable terms or at all, as well as all of the other risks as described in the Company’s long form prospectus dated February 28, 2022, under the heading “Risks Factors.” Accordingly, readers should not place undue reliance on any such forward-looking information. Further, any forward-looking information speaks only as of the date on which such statement is made. New factors emerge from time to time, and it is not possible for the Company’s management to predict all such factors and to assess in advance the impact of each such factor on the Company’s business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking information. The Company does not undertake any obligation to update any forward-looking information to reflect information or events after the date on which it is made or to reflect the occurrence of unanticipated events, except as required by law, including securities laws.*

*The CSE has neither approved nor disapproved the contents of this news release. Neither the CSE nor its Market Regulator (as that term is defined in the policies of the CSE) accepts responsibility for the adequacy or accuracy of this release.*
