

# Tactical Resources Corp. Engages Metallurgical Firm to Advance REE Extraction and Process Development

20.07.2022 | [GlobeNewswire](#)

VANCOUVER, July 20, 2022 - [Tactical Resources Corp.](#) (CSE: RARE) (OTC: USREF) (“Tactical Resources” or the “Company”), a mineral exploration and development company focused on the rare earth elements (“REEs”) that drive the critical technologies of the future, has engaged a specialized metallurgical research and development team as part of its strategic plans for the development of its Texas-based Peak Project.

As part of Tactical Resources’ commitment to becoming a premier American developer of REE products for the US supply chain, the Company is committed to identifying solutions aimed at advancing its prospective properties towards development-stage and ultimately commercial-stage activities.

As such, Tactical Resources has engaged Kemetco Research Inc. (“Kemetco”) of Richmond, British Columbia to provide metallurgical test work services in support of the Company’s REE extraction and technological development plans.

Kemetco Research is a private sector integrated science, technology, and innovation company. Kemetco’s Contract Sciences operation provides laboratory analysis and testing, field work, bench scale studies, pilot plant investigations, consulting services, applied research and development for both industry and government. Kemetco provides scientific expertise in the fields of Specialty Analytical Chemistry, Chemical Process and Extractive Metallurgy, and its clients range from start-up companies developing new technologies through to large multinational corporations with proven processes.

This initial phase of test work will consist of assessing two key areas related to the Peak Project:

- 1) Evaluating direct leach extraction amenability
- 2) Evaluating maximum extraction potential

This initial test work will include analysis and verification of results from field acquired feed stock grab samples from the project tailings area. The resulting laboratory analysis alongside additional field work targets eventual bench scale studies and potential pilot plant investigations.

Company CEO, Ranjeet Sundher, notes, “The global economic outlook continues to move from crises to crises, and as a result, we believe it is essential for the investment community to dig in and support the efforts of all domestic producers of crucial materials including rare earth products. The US government is working to ensure a domestic supply of REEs, including introducing a bill known as the “Restoring Essential Energy and Security Holdings Onshore for Rare Earths (REEShore) Act” which includes the establishment of a strategic reserve and to prohibit the use of REEs processed or refined in China. When global events call for us to step up and do what’s right, its in everyone’s interest to support the call. We are proud to support the national will and plan to move as quickly as possible so that our efforts can be counted upon in these turbulent times.”

Tactical Resources is committed to becoming a premier North American developer of REE products to meet domestic supply chain needs. The Peak Project is a tailings offtake venture based upon active cut rock operations of the Sierra Blanca Quarry, LLC located in Hudspeth County, Texas within the Sierra Blanca Complex located 68 miles southeast of El Paso, Texas and two miles southeast of the Round Top Rare Earth Element project owned by Texas Minerals Resources Corporation & USA Rare Earth. For more information on the Peak Project, watch this video [here](#), or visit the [Tactical Resources website](#).

On Behalf of The Board of Directors, Sincerely,

~Ranjeet Sundher~

### **Forward Looking Information Disclaimer**

*This news release contains statements and information that, to the extent that they are not historical fact, may constitute "forward-looking information" within the meaning of applicable securities legislation. Forward-looking information may include financial and other projections, as well as statements regarding future plans, objectives, or economic performance, or the assumption underlying any of the foregoing. In some cases, forward-looking statements can be identified by terms such as "may", "would", "could", "will", "likely", "except", "anticipate", "believe", "intend", "plan", "forecast", "project", "estimate", "outlook", or the negative thereof or other similar expressions concerning matters that are not historical facts. Examples of such statements include, but are not limited to, statements with respect to the metallurgical extraction test work to be completed by Kemetco.*

*Forward-looking information is based on the assumptions, estimates, analysis, and opinions of management made in light of its experience and its perception of trends, current conditions and expected developments, as well as other factors that management believes to be relevant and reasonable in the circumstances at the date that such statements are made, but which may prove to be incorrect. The material factors and assumptions used to develop the forward-looking information contained in this news release include, but are not limited to, key personnel and qualified employees continuing their involvement with the Company; the Company's ability to secure additional financing on reasonable terms; the competitive conditions of the sector in which the Company operates; and laws and any amendments thereto applicable to the Company.*

*Forward-looking information involves known and unknown risks, uncertainties and other factors that may cause the actual results, performance or achievements of the Company to differ materially from any future results, performance or achievements expressed or implied by the forward-looking information, including, without limitation, risks relating to the future business plans of the Company; risks that the Company will not be able to retain its key personnel; risks that the Company will not be able to secure financing on reasonable terms or at all, as well as all of the other risks as described in the Company's long form prospectus dated February 28, 2022, under the heading "Risks Factors." Accordingly, readers should not place undue reliance on any such forward-looking information. Further, any forward-looking information speaks only as of the date on which such statement is made. New factors emerge from time to time, and it is not possible for the Company's management to predict all such factors and to assess in advance the impact of each such factor on the Company's business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking information. The Company does not undertake any obligation to update any forward-looking information to reflect information or events after the date on which it is made or to reflect the occurrence of unanticipated events, except as required by law, including securities laws.*
