The Company’s Stock Option Plan (the “Amended Plan”), as approved by the shareholders at the Meeting, was amended to comply with new TSX Venture Exchange (“TSX-V”) rules with respect to security based compensation. The Amended Plan allows the directors of the Company to issue stock options to directors, officers, employees, and consultants of the Company. The maximum number of shares issuable under the Amended Plan, together with the number of shares issuable under outstanding options granted otherwise than under the Plan, shall not exceed 10% of the issued and outstanding Common Shares, being 53,124,849 Common Shares as at the date hereof. The Amended Plan was conditionally approved by the TSX-V on June 16, 2022 and is subject to final approval of the TSX-V.

## ABOUT CORNISH METALS

Cornish Metals completed the acquisition of the South Crofty tin and United Downs copper / tin projects, plus additional mineral rights located in Cornwall, UK, in July 2016 (see news release dated July 12, 2016). The additional mineral rights cover an area of approximately 15,000 hectares and are distributed throughout Cornwall. Some of these mineral rights cover old mines that were historically worked for copper, tin, zinc, and tungsten.

The South Crofty project covers the former producing South Crofty tin mine located beneath the towns of Pool and Camborne, Cornwall. South Crofty mine closed in 1998 following over 400 years of continuous production. Since acquiring the project in 2016, Cornish Metals has completed and published maiden NI 43-101 Mineral Resources for South Crofty using the vast archive of historical production data and more recent drilling completed between 2007 and 2013. Additionally, Cornish Metals has undertaken extensive pilot-scale water treatment trials and successfully applied for and received the necessary environmental permits to abstract, treat and discharge mine water in order to dewater the mine. Planning permissions for the operation of the mine and re-development of the surface facilities have been secured and construction of the water treatment plant foundations commenced. The dewatering pumps, variable speed drives and new high-voltage power supply have been delivered to site.

An updated Mineral Resource was completed in June 2021 as summarised below:

## South Crofty Summary (JORC 2012) Mineral Resource Estimate
