Lithium Power's Chairman, David Hannon, commented:

"The June 2022 quarter marked a significant period for the Company, with LPI entering agreements to consolidate 100% ownership of Maricunga Lithium Brine Project in Chile by way of a three-party all-scrip merger with its JV Partners. By holding 100% of the Project, LPI will be able to rapidly advance this significant asset by simplifying decision making, unlocking funding pathways and creating further shareholder

value as we capitalise on the rapid global shift towards the electrification of transport and infrastructure.

Importantly, during the reporting period, LPI also significantly increased its tenement holding in Western Australia, with the largest ground coverage in the Greenbushes Region through the acquisition of CMC Lithium and its Greenbushes Project. We also acquired two new tenements in the mineral rich Eastern Goldfields of WA. With plans to demerge the company's West Australian lithium assets, these acquisitions further bolster the portfolio of Western Lithium Limited, which we plan to list on the ASX later this year.

I would like to thank shareholders for their ongoing support as we look forward to an exciting 2023 Financial Year."
