

Update Report on the 2022 Field Exploration Programs, Increases Land Position

03.08.2022 | [ACCESS Newswire](#)

VANCOUVER, August 3, 2022 - [Fabled Copper Corp.](#) ("Fabled Copper" or the "Company") (CSE:FABL)(FSE:XZ7) announces an update on the 2022 field exploration programs on its Muskwa Copper Project. See Figure 1 below.

Figure 1 - General Property Location

The Muskwa Project is comprised of the Neil Property, the Toro Property and the Bronson Property located in northern British Columbia. See Figure 2 below.

Figure 2 - Location Map

Peter Hawley, President, CEO reports; "Louis Martin our senior technical Board member and myself just returned from a site visit on the Muskwa Project and are pleased to say things are progressing nicely. This year's program was started one month earlier than last year and much more focused as you will see below, see Photo 1, below.

Photo 1 - left, Louis Martin, P. Geo. Right. Peter Hawley, P. Geo.

Ten first priority projects were identified and implemented over the property, which are the follow;

1. Prospecting, on going
2. Field Mapping and sampling, on going
+200 samples sent in for analysis
3. Surface Geophysics on select targets, on going
4. Eleven Drone Missions, completed

5. Structural Mapping, on going
6. Secure adit entrances, completed
7. Underground channel sampling, pending
8. Underground LIDAR, drone supported 3-D mapping, in progress
9. Inspection of historical drill core, completed

10. Drill permit for 45 drill holes pending

In March 2022 the Company applied for a 15 drill pad, 3 holes per pad good for 5 year drill permit to Department of Mines, Permitting. In July, bonding was requested and was posted. At present, the Inspector of Mines, Permitting and the First Nations are in consultation. Already this summer we have found a new copper occurrence and as a result have increased our land package by 254 hectares.

In closing, we will continue to release 2021 field results until all has been made public and the new 2022 results from the various on going projects are they become available.

QA QC Procedure

Analytical results of sampling reported by [Fabled Copper Corp.](#) represent rock samples submitted by [Fabled Copper Corp.](#) staff directly to ALS Chemex, Vancouver, British Columbia Canada. Samples were crushed, split, and pulverized as per ALS Chemex method PREP-31, then analyzed for ME-ICP61 33 element package by four acid digestion with ICP-AES Finish. ME-GRA21 method for Au and Ag by fire assay and gravimetric finish, 30g nominal sample weight.

Over Limit Methods

For samples triggering precious metal over-limit thresholds of 10 g/t Au or 100 g/t Ag, the following is being used:

Au-GRA21 Au by fire assay and gravimetric finish with 30 g sample.

Ag-GRA21 Ag by fire assay and gravimetric finish.

[Fabled Copper Corp.](#) monitors QA/QC using commercially sourced standards and locally sourced blank materials inserted within the sample sequence at regular intervals.

About Fabled Copper Corp.

Fabled Copper is a junior mining exploration company. Its current focus is to creating value for stakeholders through the exploration and development of its existing copper properties located in northern British Columbia. The Muskwa Project comprises a total of 76 claims in two non-contiguous blocks and totals approximately 8,064.9 hectares, located in the Liard Mining Division in northern British Columbia.
