## Message to Shareholders

The restructured PEI is focused upon continuously improving its financial position through 2022 by executing the following financial strategies:

- Reduce historical AP liabilities by a further \$3million (in addition to the \$1 million YTD 2022 reduction already achieved) by using cash flow generated from operations
- Reduce decommissioning liabilities by \$5million by the end of 2022 through PEI's ongoing liability management program
- Access additional capital to fund the upcoming significant development drilling program
- Adopt a series of robust internal controls to ensure the reliability and accuracy of PEI's financial information
- Further increasing asset value and production levels through the re-entry horizontal drilling program, well work over/recompletions, additional property acquisition; substantiated through 3<sup>rd</sup> party reserve valuation

The above financial strategies will improve the profitability of PEI while also reducing historical shareholder deficit.
