Forward-Looking Statements

This news release includes "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. Forward-looking statements are statements other than statements of historical fact. They include statements that give our current expectations, management's outlook guidance or forecasts of future performance, including expected natural gas and oil growth trajectory, projected cash flow and liquidity, our ability to enhance our cash flow and financial flexibility, dividend plans, future production and commodity mix, plans and objectives for future operations, ESG initiatives, the ability of our employees, portfolio strength and operational leadership to create long-term value, and the assumptions on which such statements are based. Although we believe the expectations and forecasts reflected in our forward-looking statements are reasonable, they are inherently subject to numerous risks and uncertainties, most of which are difficult to predict and many of which are beyond our control. No assurance can be given that such forward-looking statements will be correct or achieved or that the assumptions are accurate or will not change over time.

Factors that could cause actual results to differ materially from expected results include those described under "Risk Factors" in Item 1A of our annual report on Form 10-K and any updates to those factors set forth in Chesapeake's subsequent quarterly reports on Form 10-Q or current reports on Form 8-K (available at <http://www.chk.com/investors/sec-filings>). These risk factors include: the ability to execute on our business strategy following emergence from bankruptcy; the impact of inflation and price volatility resulting from Russia's invasion of Ukraine, COVID-19 and related supply chain constraints, along with their impact on our business, financial condition, employees, contractors and vendors, and on the global demand for oil and natural gas and world financial markets; the acquisitions of Vine Energy Inc. ("Vine") and Chief E&D Holdings, LP and affiliates of Targa Resources (together, "Chief"), including our ability to successfully integrate the businesses of Vine and Chief into the Company and the expected synergies from these acquisitions within the expected timeframes; effects of purchase price adjustments and indemnity obligations; the volatility of oil, natural gas and NGL prices; the limitations our level of indebtedness may have on our financial flexibility; our ability to comply with the covenants under our credit facility and other indebtedness; our inability to raise capital on favorable terms; the availability of cash flows from operations and other funds to fund cash dividends, stock repurchases of equity, to finance reserve replacement costs and/or satisfy our debt obligations; write-downs of our oil and natural gas asset carrying values due to low commodity prices; our ability to replace reserves and sustain production; uncertainty inherent in estimating quantities of oil, natural gas and NGL reserves and projecting future rates of production and the timing of development expenditures; our ability to generate profits or achieve targeted results in drilling and well operations; leasehold terms expiring before production can be established; commodity derivative activities resulting in lower prices for oil, natural gas and NGL sales; the need to secure derivative liabilities and the inability of counterparties to satisfy their obligations; adverse developments or losses from pending or future litigation and regulatory proceedings, including royalty claims; costs incurred in response to market conditions; drilling and operating risks and resulting liabilities; effects of environmental protection laws and regulations on our business and legislative, regulatory and environmental, social and governance ("ESG") initiatives addressing environmental concerns, including initiatives addressing the impact of global climate change or further regulation of hydraulic fracturing, methane emissions, flaring or water disposal; our ability to achieve and maintain ESG goals and commitments; our need to secure adequate supplies of water for our drilling operations and to dispose of or recycle the water used; increasing potential legislative and regulatory actions addressing climate change; federal and state tax proposals affecting our industry; potential OTC derivatives regulation limiting our ability to hedge against commodity price fluctuations; competition in the oil exploration and production industry; a deterioration in general economic, business or industry conditions; negative public perceptions of our industry; limited control over properties we do not operate; pipeline and gathering system capacity constraints and transportation interruptions; terrorist activities or cyber-attacks adversely impacting our operations; and an interruption of operations at our headquarters due to a catastrophic event.

In addition, disclosures concerning the estimated contribution of derivative contracts to our future results of operations are based upon market information as of a specific date. These market prices are subject to significant volatility. Our production is also dependent upon many assumptions, including estimates of production decline rates from existing wells and the timing of our future drilling activity. We caution you not to place undue reliance on our forward-looking statements that speak only as of the date of this news release, and we undertake no obligation to update any of the information provided in this release, except as required by applicable law. In addition, this news release contains time-sensitive information that reflects management's best judgment as of the date of this news release.
