About Collective

Collective is an exploration and development company focused on identifying and exploring prospective

mineral projects in South America. Founded by the team that developed and sold Continental Gold Inc. to Zijin Mining for approximately \$2 billion in enterprise value, the mission of the Company is to repeat its past success in Colombia by making significant new mineral discoveries and advance the projects to production. Management, insiders and close family and friends own nearly 45% of the outstanding shares of the Company and as a result, are fully aligned with shareholders.

The Company currently holds an option to earn up to a 100% interest in two projects located in Colombia. As a result of an aggressive exploration program at its flagship Guayabales project, a total of seven major targets have been defined. The Main Breccia discovery within the Apollo target is the most important to date and is characterized by bulk tonnage, high-grade copper-silver gold mineralization with highlight drill results including: 207.15 metres @ 2.68g g/t AuEq, 265.75 metres at 2.44 g/t AuEq and 237.7 metres at 2.88 g/t AuEq. Other grassroots discoveries include near-surface discovery holes yielding 301.9 metres at 1.11 g/t AuEq at the Olympus target, 163 metres at 1.33 g/t AuEq at the Donut target, and 102.2m @ 1.53 g/t AuEq at the Trap target. At the San Antonio project, the Company intersected, from surface, 710 metres at 0.53 AuEq. (See related press releases on our website for AuEq calculations and our press releases dated August 10, September 13, and October 6, 2022, respectively, for previously announced intercepts.). The Company's fully funded, 20,000 metre drill program for 2022 is ongoing with a significant number of assay results expected through the remainder of the year.
