

Fuse Cobalt Further Amends Media Services Agreement

08.11.2022 | [The Newswire](#)

Coquitlam, Nov. 7, 2022 - [Fuse Cobalt Inc.](#) ("the Company" or "Fuse") (TSXV:FUSE), (OTC:FUSEF) (FRA:43W3) ") announces that further to the Company's news release dated July 28, 2022 announcing the engagement of TD Media LLC d/b/a Life Water Media LLC ("Life Water Media") to provide online marketing awareness to the Company, and the Company's news release dated September 6, 2022 announcing the amendment to the Media Services Agreement (the "Agreement"), the parties have agreed to further amend certain terms of the Agreement.

The amended terms are that the Company will pay an additional US\$150,000 to Life Water Media and extend the term of the Agreement by one additional month for total term of five months. All other terms of the Agreement remain the same.

Life Water Media and Fuse are not related parties and operate at arm's length. Neither Life Water Media nor its principals have any interest in the Company's securities, directly or indirectly, or any right or intent to acquire such an interest.

About Fuse Cobalt Inc. <https://fusecobalt.com/>

[Fuse Cobalt Inc.](#) is a Canadian based exploration company that trades under the symbol FUSE on the TSX Venture Exchange. The Company's focus is on exploration for high value metals required for the manufacturing of batteries.

Ontario Cobalt Properties

Fuse owns a 100% interest its Glencore Bucke Property, situated in Bucke Township, 6 km east-northeast of Cobalt, Ontario, subject to a back-in provision, production royalty and off-take agreement. The Glencore Bucke Property consists of 16.2 hectares and sits along the west boundary of Fuse's Teledyne Cobalt Project. The Company also owns a 100% interest, subject to a royalty, in the Teledyne Project located near Cobalt, Ontario. The Teledyne Property adjoins the south and west boundaries of claims that hosted the Agnico Mine.

Glencore Bucke/Teledyne Property

Situated in Bucke Township, 6 km east-northeast of Cobalt, Ontario the Glencore Bucke Property adjoins, on its northeast corner, the former cobalt producing Agaunico Mine. From 1905 through to 1961, the Agaunico Mine produced a total of 4,350,000 lbs. of cobalt ("Co"), and 980,000 oz of silver ("Ag") (Cunningham-Dunlop, 1979). The amount of cobalt produced from the Agaunico Mine is greater than that of any other mine in the Cobalt Mining Camp. Production ceased in 1961 due to depressed Co prices and over-supply (Thomson, 1964). The Glencore property is 100% owned by Fuse Cobalt subject to a back-in provision, production royalty and off-take agreement.

The associated Teledyne Property, located in Bucke and Lorrain Townships, consists of 5 patented mining claims totaling 79.1 ha, and 46 unpatented mining claim cells totaling approximately 700 ha. The Property is easily accessible by highway 567 and a well-maintained secondary road.

Over \$25 million Can has been spent thus far, (2020 dollars inflation-adjusted) on the Teledyne Property resulting in valuable infrastructure including a development ramp and a modern decline going down 500 ft parallel to the main cobalt mineralized vein. The Teledyne Property is subject to a production royalty in favor

of New Found Gold and an off-take agreement in favor of Glencore Canada Corp., while the Glencore Buckle Property is subject to a back-in provision, production royalty, and an off-take agreement in favor of Glencore Canada Corp. [Glencore plc](#) is the world's largest producer of cobalt. A significant portion of the cobalt that was produced at the Agaunico Mine was located along structures (Vein #15) that extended southward towards the northern boundary of the Teledyne Cobalt Property, currently 100% owned by FUSE. Mineralization was generally located within 125 ft (38.1 m) above the Huronian/Archean unconformity. Stopping widths of up to 50 ft (15.2 m) were not unusual at the Agaunico Mine (Cunningham-Dunlop, 1979).
