

Scottie Resources Extends Strike Of Blueberry Contact Zone To 1.45 Kilometers And Reports Intercept Of 4.24 G/t Gold Over 16.95 Metres

08.11.2022 | [CNW](#)

VANCOUVER, Nov. 8, 2022 - [Scottie Resources Corp.](#) ("Scottie" or the "Company") (TSXV: SCOT) (OTCQB: SCTSF) (FSE: SR8) is pleased to report new assays on its Blueberry Contact Zone including an intercept of 20.3 g/t gold over 2.1 metres that extends the length of the Blueberry Contact Zone by 250 metres, to a total length of 1.45 kilometres. The Company also reports near surface intervals of mineralization that grade 8.9 g/t gold over 6.12 metres and 7.65 g/t gold over 7.53 metres, located just off of the Granduc Road. The Blueberry Contact Zone is located 2 kilometres north-northeast of the past-producing high-grade Scottie Gold Mine, 35 kilometres north of the town of Stewart, BC. The Blueberry Contact Zone is 100% owned and royalty free.

Highlights

- Southern extension hole SR22-165 returned 20.3 g/t gold over a core length of 2.10 metres. ● Extends strike length of the Blueberry Contact zone by 250 metres.
- President and CEO, Brad Rourke: "We're pleased to report that our 2022 testing of the southern extent of the Blueberry Contact zone continues to be successful. These results add on an additional 250 metres to the strike length of the structure, bringing us to a total of 1.45 kilometres, more than doubling the extent tested in 2021. As significant, the high-grade nature of the intercept at the contact confirms that the tenor of the mineralizing system is laterally extensive, which also supports a deposit model with exceptional depth potential. The consistency of results received thus far supports the tremendous upside on the resource potential of the rapidly expanding target."

True thicknesses of mineralized intercepts are undetermined

About the Blueberry Contact Zone

The Blueberry Zone is located just 2 kilometres northeast of the 100% owned, past-producing Scottie Gold Mine located in British Columbia, Canada's Golden Triangle region. Historic trenching and channel sampling of the Blueberry Vein include results of 103.94 g/t gold over 1.43 metres, and 203.75 g/t gold over 1.90 metres. Despite high-grade surficial samples and easy road access, the Blueberry Vein had only limited reported drilling prior to the Company's exploration work. The target was significantly advanced during Scottie's 2019 drill program when an interval grading 7.44 g/t gold over 34.78 metres was intersected in a new splay off zone of the main Blueberry Vein. The drill results received in 2020 and 2021, coupled with surficial mapping and sampling suggest that this splay is in fact a major N-S mineralized structure, of which the Blueberry Vein was only a secondary structure. This zone is much wider than pursued in previous exploration models and drilling in 2021 expanded its strike length to 720 metres and its depth to 225 metres. The zone is steeply dipping, and there is no current restraint on its potential depth; the mineralization at the adjacent Scottie Gold Mine has a vertical extent greater than 450 metres. The Blueberry Zone is located on the Granduc Road, 20 kilometres north of the Ascot Resources' Premier Project, which is in the process of refurbishing their mill. Newcrest's Brucejack Mine is located 25 kilometres to the north.

Thomas Mumford, Ph.D., P.Ge and VP Exploration of Scottie, a qualified person under National Instrument 43-101, has reviewed the technical information contained in this news release on behalf of the Company.

Quality Assurance and Control

Results from samples taken during the 2022 field season were analyzed at SGS Minerals in Burnaby, BC. The sampling program was undertaken under the direction of Dr. Thomas Mumford. A secure chain of custody is maintained in transporting and storing of all samples. Gold was assayed using a fire assay with atomic absorption spectrometry and gravimetric finish when required (+9 g/t Au). Analysis by four acid digestion with multi-element ICP-AES analysis was conducted on all samples with silver and base metal over-limits being re-analyzed by emission spectrometry.

ABOUT SCOTTIE RESOURCES CORP.

Scottie owns a 100% interest in the Scottie Gold Mine Property which includes the Blueberry Zone and the high-grade, past-producing Scottie Gold Mine. Scottie also owns 100% interest in the Georgia Project which contains the high-grade past-producing Georgia River Mine, as well as the Cambria Project properties and the Sulu property. Altogether Scottie Resources holds more than 59,000 hectares of mineral claims in the Stewart Mining Camp in the Golden Triangle.

The Company's focus is on expanding the known mineralization around the past-producing mines while advancing near mine high-grade gold targets, with the purpose of delivering a potential resource. The Company's focus is on expanding the known mineralization around the past-producing mine while advancing near mine high-grade gold targets, with the purpose of delivering a potential resource.

All of the Company's properties are located in the area known as the Golden Triangle of British Columbia which is among the world's most prolific mineralized districts.

Forward Looking Statements

This news release may contain forward-looking statements. Forward looking statements are statements that are not historical facts and are generally, but not always, identified by the words "expects", "plans", "anticipates", "believes", "intends", "estimates", "projects", "potential" and similar expressions, or that events or conditions "will", "would", "may", "could" or "should" occur. Although the Company believes the expectations expressed in such forward-looking statements are based on reasonable assumptions, such statements are not guarantees of future performance and actual results may differ materially from those in forward looking statements. Forward-looking statements are based on the beliefs, estimates and opinions of the Company's management on the date such statements were made. The Company expressly disclaims any intention or obligation to update or revise any forward-looking statements whether as a result of new information, future events or otherwise.

Neither TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of

TSX Venture Exchange) accepts responsibility for the adequacy of accuracy of this release.
