

Petroteq Closes Non-Brokered Private Placement

12.11.2022 | [Newsfile](#)

Toronto, November 11, 2022 - [Petroteq Energy Inc.](#) (TSXV: PQE) ("PQE", or the "Company"), an oil company focused on the development and implementation of its proprietary oil sands extraction and remediation technologies, is pleased to announce that it has closed a non-brokered private placement (the "Private Placement") of 2,200,000 units of the company (each, a "Unit") at a price of C\$0.05 per Unit, for aggregate gross proceeds to the Company C\$110,000.

Each Unit issued in the Private Placement consisted of one common share in the capital of the Company (a "Common Share") and one-half of one common share purchase warrant (each whole warrant, a "Warrant", and together with the Common Shares, the "Securities"). Each Warrant is exercisable into one Common Share at a price of C\$0.05 per Common Share until November 11, 2024. All of the Securities issued pursuant to the Private Placement are subject to a four month and one day hold period in accordance with applicable Canadian securities laws.

The Company intends to use the net proceeds from the Private Placement to fund ongoing operations, general and administrative expenses.

The Company would like to clarify that pursuant to a press release dated September 30, 2022, the amount of debt to be settled pursuant to the debt settlement transactions is expected to be C\$4,916,659.05 and not C\$5,042,842.

About Petroteq Energy Inc. –

Petroteq is a clean technology company focused on the development, implementation and licensing of a –patented, environmentally safe and sustainable technology for the extraction and reclamation of heavy oil and –bitumen from oil sands and mineable oil deposits. The versatile technology can be applied to both water-wet –deposits and oil-wet deposits - outputting high-quality oil and clean sand. –

Petroteq believes that its technology can produce a relatively sweet heavy crude oil from deposits of oil sands –at Asphalt Ridge without requiring the use of water, and therefore without generating wastewater which would –otherwise require the use of other treatment or disposal facilities which could be harmful to the environment. –Petroteq's process is intended to be a more environmentally friendly extraction technology that leaves clean –residual sand that can be sold or returned to the environment, without the use of tailings ponds or further –remediation. – For more information, visit www.petroteq.energy.
