About Atlas Salt

Atlas Salt owns 100% of the Great Atlantic salt deposit strategically located in western Newfoundland in the middle of the robust eastern North America road salt market. The project features a large homogeneous high-grade resource located immediately next to a deep water port. Atlas is also the largest shareholder in Triple Point Resources as it pursues development of the Fischell's Brook Salt Dome in the heart of an emerging Clean Energy Hub on the west coast of Newfoundland.

About RMEC

RMEC (Resource Mining & Exploration Conference) is a unique virtual investor conference. The goal is to expose new investors, as well as our global network of retail and institutional investors, to vetted Exploration & Mining opportunities. The number of companies is limited, and the content is curated with investor time and interest being paramount. While not exhaustive by design, the RMEC aims to present potential investments to new and seasoned resource investors by presenting highlights for further research.

Each participating company hosts a live presentation followed by a Q&A period within approximately a 35-minute slot. The goal is to help investors learn about the junior companies that are shaping the future of the Global Resource Sector within a responsive and pressure free environment.

RMEC will present up to six junior exploration companies, as they seek to discover the next world class mines. Investors can get more detail about RMEC at www.rmeconferences.com.
