

ADM and Partners Awarded Field to Market's Collaboration of the Year Award for Regenerative Agriculture Project

16.11.2022 | [Business Wire](#)

ADM (NYSE: ADM) and its partners, Keurig Dr Pepper, PepsiCo, and Practical Farmers of Iowa, have won the Field to Market: Alliance for Sustainable Agriculture™ 2022 Collaboration of the Year Award for their regenerative agriculture project supporting Nebraska farmers. The award, one of Field to Market's Sustainability Leadership Awards, recognizes an outstanding collaboration and cross-sector partnership in advancing continuous improvement in sustainable agriculture at the field and landscape level.

The project, "Supporting Nebraska Farmers to Boost Resiliency Via Cover Cropping," provides farmers with technical assistance, peer support networks and cost share payments for implementing cover crops. Since the start of the project in 2021, farmers participating in the project have planted more than the partnership's goal of 15,000 acres of cover crops. This initiative not only supports the agricultural communities financially, but also the overall health of the direct and surrounding ecosystems; cover crops are used to prevent erosion, improve soil and water quality, maintain high nutrient levels in soil, eliminate weeds, and serve as livestock nourishment.

"ADM unites the entire supply chain. Through major regenerative agriculture partnerships and on-the-ground engagement with growers and suppliers, ADM is committed to building a more sustainable food system," said Alison Taylor, Chief Sustainability Officer at ADM. "ADM is also committed to reducing our Scope 3 emissions as part of a holistic approach to addressing climate challenges. Because the majority of our Scope 3 emissions come from the farming that happens upstream - and from the ingredient processing that occurs by our customers downstream - it is important to collaborate with our growers and customers to reduce greenhouse gas emissions."

In total, ADM has initiated 18 Field to Market projects that span across 13 U.S. states and 2 Canadian provinces, focused on corn, soy, and wheat production. These states and provinces include Illinois, Indiana, Iowa, Kansas, Kentucky, Manitoba, Missouri, Nebraska, North Carolina, North Dakota, Oklahoma, Saskatchewan, Tennessee, Texas, and Washington. These projects are part of ADM's broader sustainable agriculture initiatives, which have enrolled over 750,000 total acres of land in the U.S. in the transition to regenerative agriculture practices and are creating long-term market opportunities for farmers.

Farmers have always been stewards of the land, and ADM is proud to partner with them and other companies to do more to advance regenerative agricultural practices that sequester carbon, promote biodiversity, support a holistic approach to ecological health, and increase farm resiliency to feed the world more sustainably.

About ADM

ADM unlocks the power of nature to enrich the quality of life. We're a premier global human and animal nutrition company, delivering solutions today with an eye to the future. We're blazing new trails in health and well-being as our scientists develop groundbreaking products to support healthier living. We're a cutting-edge innovator leading the way to a new future of plant-based consumer and industrial solutions to replace petroleum-based products. We're an unmatched agricultural supply chain manager and processor, providing food security by connecting local needs with global capabilities. And we're a leader in sustainability, scaling across entire value chains to help decarbonize our industry and safeguard our planet. From the seed of the idea to the outcome of the solution, we give customers an edge in solving the nutritional and sustainability challenges of today and tomorrow. Learn more at www.adm.com.
