

Computerworld names ADM to 2023 list of Best Places to Work in IT

13.12.2022 | [Business Wire](#)

Foundry's Computerworld has announced ADM as a 2023 Best Places to Work in IT. This award recognizes the top organizations that challenge their IT staffs while providing great benefits and compensation. Organizations will be included in coverage on Computerworld.com along with results from the 2023 Best Places to Work in IT survey.

The Best Places to Work in IT list is an annual ranking of the top work environments for technology professionals by Foundry's Computerworld. The list is compiled based on a comprehensive questionnaire regarding company offerings in categories such as benefits, career development, DEI, future of work, training and retention. In addition, the rankings are reviewed and vetted by a panel of industry experts.

"ADM is a global leader in nutrition, and our employees have the unique opportunity to truly make a difference in the world every day by delivering on our purpose to unlock the power of nature to enrich lives," said Kristy Folkwein, chief information officer at ADM. "We strive to make our IT organization a rewarding place to work where employees feel they are truly contributing to something greater than themselves, and this award is a testament to the power of prioritizing that kind of culture in the workplace."

"Adapting to a 'new normal' has put additional demands on IT organizations at companies of all sizes. This year's winning companies have stepped up with increased IT staffing and a variety of innovative professional development opportunities. The result of these efforts is that not only are IT staffs engaged and productive, but the entire business benefits from IT's ability to support evolving workplace models and changing business and customer needs," said Rob O'Regan, global director, content strategy, Foundry. "Importantly, this year's award winners are laser-focused on diversity initiatives to expand the IT talent pool and promote workplace diversity and inclusion."
