

Cruz Battery Metals Plans to Begin Phase-3 Drill Program Shortly on the Solar Lithium Project in Nevada

10.01.2023 | [Newsfile](#)

Vancouver, January 10, 2023 - [Cruz Battery Metals Corp.](#) (CSE: CRUZ) (OTC Pink: BKTPF) (FSE: A3CWU7) ("Cruz" or the "Company") wishes to announce the Company is planning to begin a Phase-3 drill program shortly on the 100-percent owned, 8,135-acre Solar Lithium Project in Nevada, directly bordering American Lithium Corp.'s TLC project (See map below). The Company has already received approval from the Bureau of Land Management (BLM) for up to 22 additional holes. To date, every hole drilled on the 'Solar Lithium Project' has discovered lithium, including values as high as 1,300 ppm Li (announced on January 17, 2022).

The 'Solar Lithium Project' directly borders American Lithium Corp.'s TLC project. On December 1, 2022, American Lithium Corp. announced an updated resource estimate, prepared by Stantec Consulting Ltd., for the TLC lithium claystone property containing 8.83 million tonnes lithium carbonate equivalent (LCE) measured & indicated with another 1.86 million tonnes LCE inferred. Cruz Management cautions that past results or discoveries on properties in proximity to Cruz may not necessarily be indicative of the presence of mineralization on the Company's properties.

Jim Nelson, President of Cruz Battery Metals stated, "We are very excited to be in a position to commence a phase-3 drill program shortly on the 8,135-acre Solar Lithium Project in Nevada, comprising a large footprint directly bordering American Lithium. Given the recent success of American Lithium, in regards to a substantial increase to their resource estimate, we couldn't be more optimistic about the future of the Solar Lithium Project. We would like to congratulate our neighbor American Lithium Corp. on today's NASDAQ listing. We are very encouraged by the fact that our phase I and II drill programs have discovered the presence of lithium in all 6 holes drilled to date and we look forward to the next phase of exploration drilling on this project. Cruz's goal is to locate and provide a new, domestically sourced, battery grade lithium deposit. Considering that Cruz is well-funded with \$3.5 million in the treasury, the fact the lithium prices continue to show strength, and that Cruz will be coming into an active news cycle period, management feels that everything is now in place to give our shareholders the best chance of success on this project."
