

Vox Provides Project Updates Across Gold Royalty Portfolio Assets

21.03.2023 | [CNW](#)

TORONTO, March 21, 2023 - [Vox Royalty Corp.](#) (TSXV: VOX) (NASDAQ: VOXR) ("Vox" or the "Company"), a returns mining royalty company, is pleased to provide recent North American development and exploration updates from royalty partners [Treasury Metals Inc.](#) (TSX: TML) ("Treasury"), Alamos Gold Inc. (TSX: AGI) ("Alamos"), and Orla Mining Ltd. (NYSE: ORLA) ("Orla"). All amounts are in U.S. dollars unless otherwise indicated.

Spencer Cole, Chief Investment Officer stated: "We are excited to report promising development progress across key Canadian and US development gold royalties, including the release of the Goldlund-Goliath (gold) pre-feasibility study, major permitting milestones at Lynn Lake (gold), and exploration success at South Railroad (gold). Vox's ~80% weighting to Canada, US and Australia is further unpinned by the advancement of these North American development projects. In an ever-changing geopolitical landscape, Vox's growth pipeline in these three Tier 1 mining jurisdictions continues to support management confidence around Vox's long-term value creation for our shareholders."

Key Updates

- Treasury announced positive results for its pre-feasibility study ("PFS") over the Goldlund gold project, which is part of the Goliath Gold Complex in Ontario;
- Major permitting milestones were achieved by Alamos at the Lynn Lake gold project, with the completion of an Environmental Impact Assessment ("EIA") and a positive Decision Statement issued by the Minister of Environment and Climate Change Canada; and
- Significant South Railroad gold drilling results were announced by Orla, with continued resource expansion exploration scheduled for 2023 in Nevada.

Goldlund (Pre-Feasibility - Canada) - Positive Results from the Pre-Feasibility Study Released⁽¹⁾

- Vox holds a 1% net smelter royalty ("NSR") on part of the Goldlund gold project (below 50m shaft collar depth), with the Goliath Gold Complex in Ontario, Canada;
- On February 22, 2023, Treasury announced: ● The results of the PFS. Highlights include:

the potential future value of the Goldlund project. We look forward to Treasury continuing to enhance the value of this royalty asset through the upcoming feasibility study and as the asset progresses towards operations "as early as 2026".

Lynn Lake (MacLellan) (Feasibility - Canada) - Major Permitting Milestones

- Vox holds a 2% gross revenue royalty (post initial capital recovery) on part of the MacLellan deposit at the Lynn Lake project;
- On March 6, 2023 Alamos announced:
 - The federal EIA for the Lynn Lake Gold Project has been completed;
 - A positive Decision Statement has been issued by the Minister of Environment and Climate Change Canada;
 - An updated Feasibility Study is expected to be completed during the summer of 2023;
 - Exploration will remain a key ongoing focus with \$5 million budgeted for 2023, with 100,000 metres of drilling focused on several advanced regional targets, and the continued evaluation and advancement of a pipeline of prospectivity on the Lynn Lake Property is also a key area of focus for 2023; and
 - John A. McCluskey, President and Chief Executive Officer, said, "Achieving a positive Decision Statement for the Lynn Lake Gold Project represents a multi-year, collaborative effort to ensure the project's long-term sustainability."
- Vox Management Summary: Alamos management is very optimistic on the opportunity for Lynn Lake to drive significant future growth. The completed EIA and

positive decision statement further de-risks Lynn Lake's development pathway. Vox management is excited to note these major permitting milestones for Lynn Lake and looks forward to Alamos continuing to progress the project towards a development decision.

South Railroad (Feasibility - United States) - Significant RC Drill Results

- Vox holds a 0.633% NSR with advance minimum royalty payments over key portions of the South Railroad gold project which is located in the prolific Carlin Trend of Nevada;
- On February 8, 2023, Orla announced:
 - The resumption of exploration activities in mid-2022 resulted in promising zones and targets across the 21,000-hectare South Railroad land package ("RC") drilling results from the royalty linked deposits Pinion SB, Jasper, and the Jaspur.
 - In total, 10,573m of drilling (9,796m of RC in 61 holes and 777m of core in 7 holes)

were completed at South Railroad in 2022, focused on oxide resource definition and expansion at multiple targets;

- Inferred mineral resource estimates for Pinion SB, POD, Sweet Hollow, and Jasperoid Wash are expected to be updated

in the second half of 2023; and

- A \$10 million exploration budget is planned for South Railroad in 2023, which would include approximately 22,400m of

drilling (16,500m of RC drilling and 5,900m of core).

- Vox Management Summary: Given South Railroad is situated along the prolific Carlin Trend in Nevada, ongoing drilling activity provides significant

mineral resources" and "mineral resources" used or referenced herein and the documents incorporated by reference hereinto, if applicable, are Canadian mineral disclosure terms as defined in accordance with NI 43-101 and the Canadian Institute of Mining, Metallurgy and Petroleum (the "CIM") - CIM Definition Standards on Mineral Resources and Mineral Reserves, adopted by the CIM Council, as amended (the "CIM Definition Standards").

For U.S. reporting purposes, the U.S. Securities and Exchange Commission (the "SEC") has adopted amendments to its disclosure rules (the "SEC Modernization Rules") to modernize the mining property disclosure requirements for issuers of securities registered with the SEC under the Exchange Act, which became effective February 25, 2019. The SEC Modernization Rules more closely align the SEC's disclosure requirements and policies for mining properties with current and global regulatory practices and standards, including NI 43-101, and replace the historical property disclosure requirements for mining registrants that were included in SEC Industry Guide 7. Issuers were required to comply with the SEC Modernization Rules in their first fiscal year beginning on or after January 1, 2021. As a foreign private issuer that is eligible to file reports with the SEC pursuant to the multi-jurisdictional disclosure system, the Company is not required to provide disclosure on its mineral properties under the SEC Modernization Rules and will continue to provide disclosure under NI 43-101 and the CIM Definition Standards. Accordingly, mineral reserve and mineral resource information contained or incorporated by reference herein may not be directly comparable to similar information disclosed by companies domiciled in the U.S. subject to U.S. federal securities laws and the rules and regulations thereunder.

As a result of the adoption of the SEC Modernization Rules, the SEC now recognizes estimates of "measured mineral resources", "indicated mineral resources" and "inferred mineral resources." In addition, the SEC has amended its definitions of "proven mineral reserves" and "probable mineral reserves" to be "substantially similar" to the corresponding CIM Definition Standards terms required under NI 43-101. While the SEC will now recognize "measured mineral resources", "indicated mineral resources", "inferred mineral resources", U.S. investors should not assume that all or any part of the mineralization in these categories can be converted into a higher category of mineral resources or into mineral reserves without further work and analysis. Mineralization described using these terms has a greater amount of uncertainty as to its existence and feasibility than mineralization that has been characterized as reserves. Accordingly, U.S. investors are cautioned not to assume that all or any measured mineral resources, indicated mineral resources, or inferred mineral resources that the Company reports are or will be economically and legally mineable without further work and analysis. Further, "inferred mineral resources" have a greater amount of uncertainty as to whether they can be mined legally or economically. Therefore, U.S. investors are also cautioned not to assume that all or any part of inferred mineral resources will be upgraded to a higher category without further work and analysis. Under Canadian securities laws, estimates of "inferred mineral resources" may not form the basis of feasibility or pre-feasibility studies, except in rare cases. While the above terms are "substantially similar" to CIM Definitions, there are differences in the definitions under the SEC Modernization Rules and the CIM Definition Standards. Accordingly, there is no assurance any mineral reserves or mineral resources that the Company may report as "proven mineral reserves", "probable mineral reserves", "measured mineral resources", "indicated mineral resources" and "inferred mineral resources" under NI 43-101 would be the same had the Company reported its reserve or resource estimates under the standards adopted under the SEC Modernization Rules or under the prior standards under SEC Industry Guide 7.

Cautionary Note Regarding Forward-Looking Statements and Forward-Looking Information

This press release contains "forward-looking statements", within the meaning of the U.S. Securities Act of 1933, the U.S. Securities Exchange Act of 1934, the Private Securities Litigation Reform Act of 1995 and "forward-looking information" within the meaning of applicable Canadian securities legislation, concerning the business, operations and financial performance of the Company and its subsidiaries, a condition of [Vox Royalty Corp.](#) Any statements that express or involve discussions with respect to predictions, expectations, beliefs, plans, projections, objectives, assumptions or future events or performance (often, but not always, using words such as "expects" or "does not expect", "is expected", "anticipates" or "does not anticipate", "plans", "estimates" or "intends") or stating that certain actions, events or results "may", "could", "would", "might" or "will" be taken, occur or be achieved) are "forward-looking statements" and may be "forward-looking statements". Forward-looking statements are subject to a variety of risks and uncertainties which could cause actual events or results to materially differ from those reflected in the forward-looking statements.

The forward-looking statements and information in this press release include, but are not limited to, summaries of operations provided by management and the potential impact on the Company of such operator updates, statements regarding expectations for the timing of commencement of development, construction at and/or resource production from various mining projects, expectations regarding the size, quality and exploitability of the resources at various mining projects, future operations and programs of Vox's mining operator partners, the receipt of future royalty payments derived from various royalty assets and anticipated future cash flows and future financial reporting by Vox, and requirements for and operator ability to receive regulatory approvals.

Forward-looking statements are subject to a variety of risks and uncertainties which could cause actual events or results to materially differ from those reflected in the forward-looking statements, including but not limited to: the impact of general market and economic conditions, the absence of control over mining operations from which the Company expects to receive royalties, and risks related to those mining operations, including risks related to international operations, government and

environmental regulation, actual results of current exploration activities, conclusions of economic evaluations and changes in project parameters as plans continue to be refined, risks in the marketability of minerals, fluctuations in the price of commodities, fluctuation in foreign exchange rates and interest rates, stock market volatility, as well as those factors discussed in the Company's entitled "Risk Factors" in the Company's annual information form for the financial year ended December 31, 2022 available at www.sedar.com.

Should one or more of these risks, uncertainties or other factors materialize, or should assumptions underlying the forward-looking information or statement prove incorrect, actual results may vary materially from those described herein as intended, planned or anticipated, believed, estimated or expected. Vox cautions that the foregoing list of material factors is not exhaustive. When making decisions on the Company's forward-looking statements and information to make decisions, investors and others should carefully consider the foregoing factors and other uncertainties and potential events.

Vox has assumed that the material factors referred to in the previous paragraph will not cause such forward looking statements and information to differ materially from actual results or events. However, the list of these factors is not exhaustive and may change and there can be no assurance that such assumptions will reflect the actual outcome of such items or factors. The forward-looking information contained in this press release represents the expectations of Vox as of the date of this press release and, accordingly, is subject to change after such date. Readers should not place undue importance on forward looking information and should not rely upon this information as of any other date. While Vox may elect to, it does not undertake to update this information at any particular time except as required in accordance with applicable laws.

Neither the TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this release.

Technical and Third-Party Information

Except where otherwise stated, the disclosure in this press release is based on information publicly disclosed by project operators based on the information/data available in the public domain as at the date hereof and none of this information has been independently verified by Vox. Specifically, as a royalty investor, Vox has limited, if any, access to the royalty operation. Vox does not have any knowledge that such information may not be accurate, there can be no assurance that such information from the project operators is complete or accurate. Some information publicly reported by the project operators may relate to a larger property than the area covered by Vox's royalty interests. Vox's royalty interests often cover less than 100% and only a portion of the publicly reported mineral reserves, mineral resources and production from a property.
