(1,2) See footnotes (1, 2) on first page.

2022 Annual Financial & Operational Highlights

- Record Ag production of 1,880,707 oz, a 17.5% year-over-year increase in silver ounces produced that is a direct result of a higher mining rate, mill throughput and recovery rate.

- Milling operations averaged 699 tonnes per day ("tpd") for the year compared to 615 tpd in 2021, an increase of 13.5%. Combined mill recovery averaged 86.6% compared to 82.1% in 2021, an increase of 4.5%.
- Cash flows generated by operating activities of \$9,648,774 for the year, compared to \$17,502,239 generated in 2021.
- Revenue from silver sales totaled \$38,244,921 compared to \$34,301,914 in 2021, an increase of 11.5% due to a increase in the volume of sales. The increase in sales volume was partially offset by a lower average realized price of \$19.76/oz (2021 - \$22.65/oz).
- The Corporation had cash, cash equivalents and restricted cash of \$41,849,425 as at December 31, 2022 compared to \$84,185,219 as at December 31, 2021.
- Net income for the year was \$1,469,320 (diluted EPS of \$0.013), compared to a net income of 1,272,142 (diluted EPS of \$0.012) in 2021. Net income for the year was attributable to an increase in production and silver sales.

Fourth Quarter 2022 Financial & Operational Highlights

2022 Operations Review: Production of 661,621 oz in Q4-2022, a 53% increase compared to Q4-2021 attributable to a higher grade of 248 g/t and silver recovery rate (89.9% vs. 82.4%).

2022 Cash flows of \$9,648,774 for the year compared to \$17,502,239 for 2021.

2022 Capital Expenditures of \$1,634,254 for the year and average cash construction of \$1.15/oz for the year compared to \$14.15/oz for 2021.

Zgounder Expansion, while ensuring efficient production. The project construction, mine engineering, geology and mineral processing programs are progressing well.

● Gross margin increased by 39% to \$17,192,205 so strengthens the \$3,390,000 Q4-2022 losses. This was due to the increased production and higher silver prices.

● The Corporation produced a record total of 1,880,707 oz silver in 2022 (2021).

● The Corporation produced a record total of 1,880,707 oz silver in 2022 (2021).

● The Corporation produced a record total of 1,880,707 oz silver in 2022 (2021).

● The Corporation produced a record total of 1,880,707 oz silver in 2022 (2021).

● The Corporation produced a record total of 1,880,707 oz silver in 2022 (2021).

● The Corporation produced a record total of 1,880,707 oz silver in 2022 (2021).

● The Corporation produced a record total of 1,880,707 oz silver in 2022 (2021).

● The Corporation produced a record total of 1,880,707 oz silver in 2022 (2021).

In Q3-2022, the final data from the fieldwork were combined, defining five target areas for the 2022 drill program, which commenced in early October. A 4,012m DDH program was carried out by year-end 2022, and initial drilling results are expected in H1-2023.

Boumadine

In H1-2022, a comprehensive fieldwork program was carried out on Boumadine to expand the Corporation's

understanding of the mineralogy in the permits and to inform the 2022 drill program. The fieldwork included an airborne geophysics survey; a hyperspectral survey; and a litho-geochemistry program. The 349-line km airborne geophysical survey was completed in April 2022 comprising magnetic, radiometric, and electromagnetic surveys. Data from the survey indicated the presence of a conductive anomaly continuing down to at least 600m below surface along the main trend, suggesting at-depth extension. Furthermore, the survey identified conductivity anomalies east and west of main Boumadine trend. The hyperspectral survey outlined strong clay alteration over the main trend and laterally.

A total of 18,335m of DDH were drilled in 2022, more than twice the original 7,500m budget. Results confirmed polymetallic mineralization of the main trend and extended the strike to 3.2km towards the south. The mineralization is open at both ends along strike and at depth within a six km hydrothermal system.

Imiter bis

In 2022, Phase 1 of the planned drill program on Imiter bis completed 24 DDH for a total of 4,754m DDH over four target areas (Northwest, Daoud, Northeast-Extension and Dilatation Zones). Encouraging results were obtained in the North Zone including 3.94 g/t Au over 5.0m and 1.46g/t Au over 11.5m. Phase II drilling, which had been scheduled for Q4-2022, was postponed to focus on Boumadine. The geology and Phase I results indicate the presence of a 4-km potential at-surface polymetallic structure hosted within a low-sulphidation epithermal system. Follow-up drill programs will focus on finding the 'boiling zone" that could host higher-grade mineralization.

In parallel to the drilling program, an airborne geophysical survey comprising magnetic, radiometric, and electromagnetic surveying was completed over 554 linear km in 2022.

The technical information relating to the Zgounder, Boumadine and Imiter bis Projects was reviewed and approved by David Lalonde, B. Sc, Head of Exploration, designated as a Qualified Person under National Instrument 43-101.

2022 Sustainability Expansion

Aya is committed to maintaining a culture of accountable mining through high standards of Environment, Social and Governance ("ESG") practices and minimising the impact of its operations on its people, its communities and on the natural environment.

During the year, the Corporation continued to implement its Environment and Social Management System that is aligned with EBRD performance requirements. ESG policies and practices are being embedded across the business, and the Corporation reports on its ESG performance through its Global Reporting Initiative-compliant Sustainability report.

In a context where a growing number of companies are engaging in decarbonization roadmaps and aligning with the recommendations of the Task Force on Climate-related Financial Disclosures ("TCFD"), the Corporation appointed Ernst & Young to review and assist the Corporation in enhancing its corporate governance for effective climate action. Under the project, a 3-year implementation program has been developed to support the Corporation in aligning its operations with the goals of the Paris Agreement. A first analysis has been conducted to assess the gap between Aya's current practices and those recommended by the TCFD, supplemented by those of the EBRD Climate Corporate Governance framework. Achievement of certain milestones of the plan will reduce the effective interest rate of the CTF tranche of the Zgounder project loan.

About Aya Gold & Silver Inc.

[Aya Gold & Silver Inc.](#) is a rapidly growing, Canada-based silver producer with operations in the Kingdom of Morocco.

The only TSX-listed pure silver mining company, Aya operates the high-grade Zgounder Silver Mine and is exploring its properties along the prospective South-Atlas Fault, several of which have hosted past-producing mines and historical resources. Aya's Moroccan mining assets are complemented by its Tijirit Gold Project in

Mauritania, which is being advanced to feasibility.

Aya's management team is focused on maximising shareholder value by anchoring sustainability at the heart of its operations, governance, and financial growth plans.

For additional information, please visit Aya's website at www.ayagoldsilver.com.

Forward-Looking Statements

This press release contains certain statements that constitute forward-looking information within the meaning of applicable securities laws ("forward-looking statements"), which reflects management's expectations regarding Aya's future growth and business prospects (including the timing and development of new deposits and the success of exploration activities) and other opportunities. Wherever possible, words such as "will", "secured", "guidance", "path", "potential", "deliver", "committed", "continue", "progress", "align", "achieve", "plan", "expect", "designed to", "aims to", "objective", "guidance", "extend", "growth", "advance", "expected", "increase", and similar expressions or statements that certain actions, events or results "may", "could", "would", "might", "will", or are "likely" to be taken, occur or be achieved, have been used to identify such forward-looking information. Specific forward-looking statements in this press release include, but are not limited to, statements and information with respect to the exploration and development potential of Zgounder and the conversion of Inferred Mineral Resources into Measured and Indicated Mineral Resources, future opportunities for enhancing development at Zgounder, executing on the planned expansion at the Zgounder mine, and timing for the release of the Company's disclosure in connection with the foregoing. Although the forward-looking information contained in this press release reflect management's current beliefs based upon information currently available to management and based upon what management believes to be reasonable assumptions, Aya cannot be certain that actual results will be consistent with such forward-looking information. Such forward-looking statements are based upon assumptions, opinions and analysis made by management in light of its experience, current conditions, and its expectations of future developments that management believe to be reasonable and relevant but that may prove to be incorrect. These assumptions include, among other things, the closing and timing of financing, the ability to obtain any requisite governmental approvals, the accuracy of Mineral Reserve and Mineral Resource Estimates (including, but not limited to, ore tonnage and ore grade estimates), silver price, exchange rates, fuel and energy costs, future economic conditions, anticipated future estimates of free cash flow, and courses of action. Aya cautions you not to place undue reliance upon any such forward-looking statements. The risks and uncertainties that may affect forward-looking statements include, among others: the inherent risks involved in exploration and development of mineral properties, including government approvals and permitting, changes in economic conditions, changes in the worldwide price of silver and other key inputs, changes in mine plans (including, but not limited to, throughput and recoveries being affected by metallurgical characteristics) and Beneficial Ownership as of the date of this press release. Aya does not undertake any obligation to update forward-looking statements should assumptions related to these plans, estimates, projections, beliefs and opinions change. Nothing in this document should be construed as either an offer to sell or a solicitation to buy or sell Aya securities. All references to Aya include its subsidiaries unless the context requires otherwise.

This article is published on www.ayagoldsilver.com and is available on the SEDAR+ platform at www.sedar.com.
