

Nickel Rock Resources Inc. Announces Effective Date of Name Change to Grid Battery Metals Inc.

03.04.2023 | [The Newswire](#)

Coquitlam, April 3, 2023 - [Nickel Rock Resources Inc.](#) (the "Company" or "Nickel Rock") (TSXV:NICL), (OTC:NICKLF), (FRA:NMK2) is pleased to announce that as permitted by the Company's Articles, the Board of Directors have approved by directors' consent resolutions the name change to "Grid Battery Metals Inc." which has also been accepted by the TSX Venture Exchange.

The shares will commence trading under the new name and trading symbol "CELL", effective Wednesday, April 5, 2023 at the market open. The Company's CUSIP number will be 398084103.

The Company will also be launching a new website and social media sites in connection with the name change. The Company will issue a further news release announcing the effective date of the website and social media sites.

About Nickel Rock Resources Inc.

[Nickel Rock Resources Inc.](#) is a Canadian based exploration company whose primary listing is on the TSX Venture Exchange. The Company's maintains a focus on exploration for high value battery metals required for the electric vehicle (EV) market. www.nickelrockresources.com

About Clayton Valley Lithium Project

The Company owns a 100% interest in 113 lithium lode and placer claims covering over 640 hectares in Clayton Valley. Clayton Valley is a down-dropped closed basin formed by the Miocene age Great Basin extension and is still active due to movement along the Walker Lane structural zone. As a result, the basin has preserved multiple layers of lithium bearing volcanic ash, resulting from multiple eruptive events over the past 6 million years including eruptions from the 700,000-year-old Long Valley Caldera system and related events. These ash layers are thought to contribute to the lithium brines extracted by Albemarle and are also likely involved in the formation of the exposed lithium rich clay deposits on the east side of Clayton Valley.

Volt Canyon Lithium Property

The Company owns a 100% interest in 80 placer claims covering approximately 635 hectares of alluvial sediments and clays located 122 km northeast of Tonopah, Nevada.

About the British Columbia, Nickel Projects

The Mount Sidney Williams Group consists of three claim blocks with a total area of 10,569 hectares in the area surrounding Mount Sidney Williams, both adjoining and near the Decar project of FPX Nickel Corp., located 100 kilometres northwest of Fort St. James, B.C., in the Omineca mining division. Metallic mineralization includes nickel, cobalt, and chromium. At least some of the nickel mineralization occurs as awaruite. The Mitchell Range Group area claim consist of one claim block covering 8,659 hectares with demonstrated metallic mineralization including nickel, cobalt, and chromium. Nickel cobalt mineralization has not been well explored, but the presence of awaruite has been documented. The Company has optioned out an 80% interest on certain mineral claims within the HN4 and Ni100 exploration project, to [Surge Battery Metals Inc.](#) (TSXV:NILI).

On Behalf of the Board of Directors
