

# Brigadier Readies for Exploration at Nemaska2 Lithium Property

13.04.2023 | [ACCESS Newswire](#)

VANCOUVER, April 13, 2023 - [Brigadier Gold Ltd.](#) (the "Company") (TSXV:BRG) | (FSE:B7LM) | (OTC PINK:BGADF) is pleased to share its plans for upcoming exploration of its Nemaska2 Lithium property ("Nemaska2"), James Bay, Quebec. Brigadier's goal for this and future exploration at Nemaska2 is to prove the existence of bulk tonnage, near surface, lithium bearing mineralization.

The focus of the upcoming program is to confirm and further delineate pegmatite outcrops mapped and sampled in historical government work at Nemaska2 with a particular focus on the ~20 white pegmatite outcrops, each approximately 1,000 square metres in size. Particular attention will be applied to discover the possible existence of pegmatite dykes or other favorable structures. Subject to ground conditions including snowpack, Phase-1 exploration is forecast to commence June 1, 2023. The Company anticipates this initial program will delineate targets for a mid- summer inaugural drill program.

The Phase-1 program was developed with input from Brigadier's senior technical advisor and seasoned geologist Bill McGuinty and will be carried out by the Company's technical partner Geologica Groupe-Conseil ("Geologica") of Val D'or Quebec. The Phase-1 program will include:

- compilation of all historical work and available government data
- mapping and sampling of known pegmatite outcrops
- reconnaissance prospecting of areas not previously the focus of historical work
- rock analysis and assaying
- technical report writing

"We are excited to initiate our phase 1 work program on our highly prospective Nemaska2 property, which has not seen significant exploration on its pegmatite outcrops to date", stated Robert Birmingham, President of Brigadier Gold. "Partnering with Geologica and Mr. McGuinty, both experts in the James Bay mining region, really will help bolster Brigadier's objective of aggressively advancing the Nemaska2 property. The company also understands that "drill bit" success is key to unlocking project and shareholder value."

## Historical Exploration

The Quebec government has previously carried out a large sampling program and also an airborne magnetometric survey over Nemaska2 which shows the presence of several low magnetic anomalies likely corresponding with fractures or shear zones within the granitic Valiquette Pluton. These structures are generally favourable to the formation of pegmatites and other metals. The presence of pegmatites recognized during the regional reconnaissance mapping, anomalous values of Li and Cs in regional till sampling, and the presence of a major lithium deposit (Whabouchi Deposit) in the area, are all elements favourable to the existence of mineralization sought by the Company.

More information can be found in the National Instrument 43-101 technical report filed by the Company under its SEDAR profile on March 14, 2023

## About Nemaska2 Lithium Project

The Nemaska2 Project consists of 162 map-designated mining titles (Nemaska2 and Nemaska2 Extension) covering a total area of 8,300 hectares and is located in northern Québec, approximately 160 kms east of James Bay, near the community of Nemaska. Neighbouring Brigadier's Nemaska2 Project are claims held by Li-Ft Power, Brunswick Exploration, Dios Exploration, Critical Elements Lithium, and ~23 kilometres to the east lies Nemaska Lithium's Whabouchi Project.

## Qualified Person

Mr. Garry Clark, P. Geo., a member of the Company's Board of Directors, a "Qualified Person" under NI

43-101, has reviewed the technical contents of this news release and has approved the disclosure of the technical information contained herein.

#### Forward-Looking Information Cautionary Statement

This release includes certain statements and information that may constitute forward-looking information within the meaning of applicable Canadian securities laws. Forward-looking statements relate to future events or future performance and reflect the expectations or beliefs of management of the Company regarding future events. Generally, forward-looking statements and information can be identified by the use of forward-looking terminology such as "intends" or "anticipates", or variations of such words and phrases or statements that certain actions, events or results "may", "could", "should", "would" or "occur". Forward-looking statements include those relating to the timing, initiation and completion of exploration and drilling programs. The Company cautions that all forward-looking statements are inherently uncertain, and that actual performance may be affected by a number of material factors, many of which are beyond the Company's control. Such factors include, among other things: risks and uncertainties relating to Company's ability to complete all payments and expenditures required under its mineral property option agreements; and other risks and uncertainties relating to the actual results of current exploration activities; the possibility that future exploration, development or mining results will not be consistent with adjacent properties and the Company's expectations; operational risks and hazards inherent with the business of mining (including environmental accidents and hazards, industrial accidents, equipment breakdown, unusual or unexpected geological or structural formations, cave-ins, flooding and severe weather); environmental and regulatory requirements; availability of permits, possibility of equipment breakdowns and delays, exploration cost overruns, availability of capital and financing, general economic, political risks, market or business conditions, regulatory changes, timeliness of government or regulatory approvals and other risks involved in the mineral exploration industry, and those risks set out in the filings on SEDAR made by the Company with securities regulators. Although the Company believes that the assumptions and factors used in preparing the forward-looking information in this news release are reasonable, undue reliance should not be placed on such information, which only applies as of the date of this news release, and no assurance can be given that such events will occur in the disclosed time frames or at all. The Company expressly disclaims any intention or obligation to update or revise any forward-looking statements whether as a result of new information, future events or otherwise, other than as required by applicable securities legislation.

This news release does not constitute an offer to sell or a solicitation of an offer to buy any of the securities in the United States. The securities have not been and will not be registered under the United States Securities Act of 1933, as amended (the "U.S. Securities Act") or any state securities laws and may not be offered or sold within the United States or to U.S. persons unless registered under the U.S. Securities Act and applicable state securities laws or an exemption from such registration is available.
