We believe listing on the OTCQB will increase our shareholder base, improve liquidity and allow U.S. based investors an easier trading option for our shares as we continue to focus on establishing the potential size of the Tower Mountain gold discovery. The Shebandowan Greenstone Belt is rapidly emerging as an exciting, new gold district with multiple discoveries being explored throughout the belt. Thunder Gold is focused on establishing a large-tonnage, low-grade gold deposit at Tower Mountain and we encourage U.S. investors to visit our website at www.thundergoldcorp.com for more information."

About the Tower Mountain Gold Property

The Tower Mountain Gold Property is located 5-km off the Trans-Canada highway, 50-km west of Thunder Bay, Ontario. The property lies within the late Archean Shebandowan greenstone belt, an emerging gold district in northwestern Ontario. The property consists of unpatented and patented lands totalling 1,968 ha. Exploration to-date suggests the property offers a large gold endowment. Gold mineralization is widespread, and diamond drilling has identified low-grade gold mineralization extending outward for at least 500-meters from a central alkalic intrusion known as the Tower Mountain Intrusive Complex. Drilling has established persistent gold grades from 0.1 to 1.0 g/t along a 1,500-meter-long x 500-meter-wide x 500-meter-deep block of volcanic-volcanoclastic rocks immediately west and adjacent to the central alkalic intrusion. The remaining 6,000 meters of strike length surrounding the intrusion are untested. Tower Mountain shows many of the classic indicators of being an Intrusion Related Gold Deposit, which is a highly desirable exploration target.
