

Callon Petroleum Company Announces First Quarter 2023 Results

03.05.2023 | [PR Newswire](#)

Reported net income of \$220.6 million, or \$3.57 per diluted share
Reported adjusted income of \$119.9 million, or \$1.94 per diluted share
1Q23 production in line with guidance with capital expenditures below guidance
Increased drilling and completions efficiencies through simultaneous operations on larger projects
Debt moves lower for the eleventh consecutive quarter

HOUSTON, May 3, 2023 - [Callon Petroleum Company](#) (NYSE: CPE) ("Callon" or the "Company") today reported first quarter financial and operating results. A conference call to discuss the results is planned for 8 a.m. CDT, Thursday, May 4. Slides accompanying today's release are available at www.callon.com/investors.

First Quarter 2023 Highlights

- Net income of \$220.6 million, or \$3.57 per diluted share (all share amounts are stated on a diluted basis), adjusted income of \$326.3 million, and adjusted income of \$119.9 million or \$1.94 per diluted share
- Net cash provided by operating activities was \$247.9 million and adjusted free cash flow was \$7.2 million
- Total production averaged 100 MBoe/d (60% oil), in-line with guidance
- Capital expenditures were below expectations at \$270.1 million
- Reduced total debt by \$37.7 million, the eleventh consecutive quarter of debt reduction
- Increased completion stages pumped per day by more than 15% vs. the first half of 2022

"We posted solid financial and operating results for the first quarter and remain on track to achieve our full year objectives," said Joe Gatto, President and Chief Executive Officer. "Execution of larger scale projects in the first half of the year will drive growth and cash flow through the remainder of the year. These projects also benefit from improved cycle times generated by solid drilling and completion efficiencies and a consistent, high-level of well performance. We remain committed to achieving near-term debt reduction targets and implementing a shareholder return program later this year."

Financial Results

For the first quarter of 2023, Callon converted its accounting method from full cost to successful efforts which resulted in changes to the financial statements. On the income statement, the impacts were primarily the elimination of capitalized G&A and the addition of exploration expense. On the balance sheet, the most significant changes were an increase to oil properties and stockholders' equity driven by lower historical impairments under successful efforts as compared to full cost result, DD&A has increased under successful efforts due to a higher depletable base.

Callon reported first quarter 2023 net income of \$220.6 million, or \$3.57 per share, and adjusted EBITDAX of \$326.3 million. Adjusted income was \$119.9 million, or \$1.94 per diluted share.

The Company generated \$247.9 million of net cash provided from operating activities in the first quarter. Total operating expenditures for the quarter were \$270.1 million. Callon expects its adjusted free cash flow to increase through the remainder of 2023 which will continue to be allocated solely to debt reduction until the key \$2.0 billion milestone is reached.

On May 1, 2023 Callon completed the spring redetermination for its senior secured revolving credit facility ("Credit Facility"). The borrowing base was reaffirmed at \$2 billion with an elected commitment of \$1.5 billion. During the quarter, debt under the Facility was reduced by \$37.7 million for a quarter-end balance of \$465.3 million.

Operational Results

First quarter production averaged 100 MBoe/d (60% oil and 80% liquids), in line with guidance. During the quarter, 29 wells were turned in-line. Of note was a 13-well project producing at various stages of flowback over quarter end after being turned in ahead of expectations due to improved completion times.

Average realized commodity prices during the quarter were \$75.65 per Bbl for oil (99% of NYMEX WTI), \$24.18 per Bbl for gas liquids, and \$2.22 per MMBtu for natural gas (80% of NYMEX HH). This quarter's oil price realization was negative due to tightening Gulf Coast and international oil price basis differentials to WTI pricing. Total average realized price for the quarter was \$53.07 per Boe on an unhedged basis.

Lease operating expense, which includes workover expense, for the quarter was \$75.1 million or \$8.36 per Boe compared to \$74.1 million or \$7.58 per Boe in the fourth quarter of 2022. The sequential per unit increase was primarily related to increases in certain operating expenses such as fuel, power, and equipment rental, as well as the distribution of fixed costs spread over lower production volumes.

Capital Investments

Callon incurred \$270.1 million in operational capital expenditures on an accrual basis. Capital spending was 8% below of the Company's first quarter guidance primarily due to lower facility spending and fewer workovers.

Second Quarter Activity Outlook and Guidance

Callon entered the second quarter running seven drilling rigs, four in the Delaware Basin, two in the Midland Basin, and one in the Eagle Ford. The Company intends to maintain this drilling pace through mid-year. Callon is currently utilizing two completion

For the second quarter, the Company expects to produce 105 - 108 MBoe/d which includes oil volumes of 63 - 65 MBoe/d. Wells turned to sales are expected to be 33 - 38 gross wells (31 - 36 net). Operational capital expenditures are expected to be \$300 million on an accrual basis. Second quarter guidance are available in the accompanying presentation.

Earnings Call Information

The Company plans to host a conference call on Thursday, May 4, 2023, to discuss its first quarter 2023 financial and operational results and outlook for the remainder of 2023.

Cautionary Statement Regarding Forward Looking Information

This news release contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. Forward-looking statements include all statements regarding wells anticipated to be drilled and placed on production; future levels of development activity and associated production, capital expenditures and cash flow expectations and expected uses thereof; the Company's production and expenditure guidance; estimated reserve quantities and the present value thereof; future debt levels and leverage; and the implementation of the Company's business plan and strategy, as well as statements including the words "believe," "expect," "plans," "may," "will," "should," "could," and words of similar meaning.

meaning. These statements reflect the Company's current views with respect to future events and financial performance based on management's experience and perception of historical trends, current conditions, anticipated future developments and other factors believed to be appropriate. No assurances can be given, however, that these events will occur or that these projections will be achieved, and actual results could differ materially from those projected as a result of certain factors. Any forward-looking statement speaks only as of the date on which such statement is made and the Company undertakes no obligation to correct or update any forward-looking statement, whether as a result of new information, future events or otherwise, except as required by applicable law. Some of the factors which could affect our future results and could cause results to differ materially from those currently expressed in our forward-looking statements include the volatility of oil and natural gas prices; changes in the supply of and demand for oil and natural gas, including as a result of general economic conditions or as a result of actions by, or disputes with, members of OPEC and other oil and natural gas producing countries with respect to production levels or other matters; the price of oil; our ability to drill and complete wells; operational, regulatory and environment risks; the cost and availability of equipment and labor; our ability to finance our development activities at expected costs or at expected times or at all; rising interest rates and inflation; our inability to realize the benefits of recent transactions; currently unknown risks and liabilities relating to newly acquired assets and operations; adverse actions by third parties involved with the transactions; risks that are not known or material to us; and other risks more fully discussed in our filings with the U.S. Securities and Exchange Commission, including our most recent Annual Reports on Form 10-K and subsequent Quarterly Reports on Form 10-Q, available on our website or the SEC's website at www.sec.gov. Any forward-looking statement speaks only as of the date on which such statement is made and the Company undertakes no obligation to correct or update any forward-looking statement, whether as a result of new information, future events or otherwise, except as required by applicable law.

Non-GAAP Financial Measures

This news release refers to non-GAAP financial measures such as "adjusted free cash flow," "adjusted EBITDAX," "adjusted operating income," and "adjusted income per diluted share." These measures, detailed below, are provided in addition to, and not as a substitute for, and should be read in conjunction with, the information contained in our financial statements prepared in accordance with GAAP (including the notes), included in our filings with the SEC and posted on our website.

- Adjusted free cash flow is a supplemental non-GAAP measure that is defined by the Company as net cash provided by operating activities before net change in working capital, changes in accrued hedge settlements, merger, integration and transaction expense, and other income and expense, less capital expenditures before increase (decrease) in acquisition-related expenditures. We believe adjusted free cash flow provides useful information to investors because it is a comparable measure against other companies in the industry and is a widely accepted financial indicator of an oil and natural gas company's ability to generate cash for the use of internally funding their capital development program and to service or incur debt. Adjusted free cash flow is not a measure of a company's financial performance under GAAP and should not be considered as a substitute for net cash provided by operating activities, or as a measure of liquidity.
- Callon calculates adjusted EBITDAX as net income (loss) before interest expense, income tax expense (benefit), depreciation and depletion, (gains) losses on derivative instruments excluding net settled derivative instruments, impairment of oil and gas properties, non-cash share-based compensation expense, exploration expense, merger, integration and transaction expense, (gain) loss on extinguishment of debt, and certain other expenses. Adjusted EBITDAX is not a measure of financial performance under GAAP. Accordingly, it should not be considered as a substitute for net income (loss), cash flow provided by operating activities or other income or cash flow data prepared in accordance with GAAP. However, the Company believes that adjusted EBITDAX provides useful information to investors because it provides additional information with respect to our performance or ability to meet our future debt service, capital expenditures and working capital requirements. Because adjusted EBITDAX excludes some, but not all, items that affect net income (loss), and may vary among companies, the adjusted EBITDAX presented above may not be comparable to similarly titled measures of other companies.
- Adjusted income and adjusted income per diluted share are supplemental non-GAAP measures that Callon believes are useful to investors because they provide readers with a meaningful measure of our profitability before recording costs whose timing or amount cannot be reasonably determined. These measures exclude the net of tax effects of these non-cash valuation adjustments, which are detailed in the reconciliation provided. Adjusted income and adjusted income per diluted share are not measures of financial performance under GAAP. Accordingly, neither should be considered as a substitute for net income (loss), operating income (loss), or other income data prepared in accordance with GAAP. However, the Company believes that adjusted income and adjusted income per diluted share provide additional information to our performance. Because adjusted income and adjusted income per diluted share exclude some, but not all, items that affect net income (loss) and may vary among companies, the adjusted income and adjusted income per diluted share presented above may not be comparable to similarly titled measures of other companies.

Adjusted Income and Adjusted EBITDAX. The following tables reconcile the Company's adjusted income and adjusted EBITDAX to net income (loss):

	Three Months Ended		
	March 31, 2023	December 31, 2022	March 31, 2022
