Management of the property of Brazile predictions were will the companies the companies of the metal and advance social development goals, including reducing income inequality at Vale do Jequitinhonha.

Lithium Valley Brazil is the result of the unwavering commitment to climate action, environmental and social sustainability of a relentless and dedicated group of global impact investors, public government officials and regulatory bodies, NGOs, industry associations and civil society.

The initiative was fostered by the unprecedented collaboration among the Government of the state of Minas Gerais, the Ministry of Mines and Energy of the Federal Government, Brazil's National Parliament (Congresso Nacional), Minas Gerais State Parliament (Assembleia Legislativa Minas Gerais), Brazil's Mining Regulatory Agency (ANM), Minas Gerais Industry Federation (FIEMG), Brazil's Mining Sector Association (IBRAM), The Civil Society NGO Mulheres do Brasil and its microcredit initiative Dona de Mim, executives and employees at the four pioneer lithium companies from all over the world: Sigma Lithium (Brazil), Atlas Resources (USA), Latin Resources (Australia) and Lithium Ionic (Canada).

In honor of the occasion, Ana Cabral-Gardner, Sigma Lithium Corp. CEO and Co-Chairperson, joined

02.01.2026 Seite 1/3 Romeu Zema, Governor of the state of Minas Gerais, and Vitor Saback, Deputy Minister of Mines and Energy in ringing the Nasdaq Opening Bell.

"Lithium Valley Brazil commences with significant relevance in the global lithium industry, anchored by Sigma Lithium, one of the world's top producers, which is trucking to port the most environmentally and socially sustainable lithium in the world. Sigma Lithium materials are expected to enable the production of 610,000 electric vehicles in the first year and 1,6 million electric vehicles in its second year," added Ana.

Federal and State Governments will ensure legal certainty and enable regulatory simplicity as well as streamline the permitting process for environmentally sustainable projects. With the proceeds from the 2% of lithium royalties already collected from the industry, the Governments will lead social sustainability infrastructure projects focused on sanitation, health and education that will benefit the people of Vale do Jequitinhonha, lifting their living conditions and reducing inequality.

Investors and capital markets are expected to fund all sustainable lithium projects, ancillary projects, and industry infrastructure as well as downstream industries. As a result of this capital markets-friendly approach, taxpayer money will be directed to social development, following the successful Australian model.

Participating companies are committing to setting the highest global standards of environmental and social sustainability in prospecting and producing the lithium. Industry associations, civil society and NGOs will support the social sustainability efforts, helping to improve the lives of the people of Vale do Jequitinhonha.

## **ABOUT SIGMA LITHIUM**

Sigma Lithium (NASDAQ: SGML, TSXV: SGML) is a company dedicated to powering the next generation of electric vehicle batteries with environmentally sustainable and high-purity lithium producing the most environmentally and socially sustainable lithium in the world its wholly owned Grota do Cirilo Project in Brazil. The project produces Battery Grade Sustainable Lithium concentrate in a state-of-the-art Greentech lithium plant that uses 100% renewable energy, 100% recycled water and 100% dry-stacked tailings and does not leave tailings behind.

Sigma Lithium has been at the forefront of environmental and social sustainability in the EV battery materials supply chain for six years. Phase 1 of the project is to produce 270,000 tonnes of Battery Grade Sustainable Lithium concentrate annually (36,700 LCE annually). If it is determined to proceed, Phase 2 & 3 of the project are expected to increase production to 766,000 tonnes annually (or 104,200 LCE annually).
