

Victory Plans Follow-Up Exploration on High-Grade Lithium Assay Results for Smokey Lithium Project

26.06.2023 | [ACCESS Newswire](#)

- Victory's Geology Team confirms outstanding assay results on its 23-01 hole, verifying last year's discovery, comparing favorably to [American Lithium Corp.](#)'s (TSXV: LI) (OTCQB: LIACF) infill drilling results at the TLC Li claystone deposit.¹
- Victory is now planning to define the subsurface extensions of the thick claystone interval reported in diamond drill hole (DDH) 23-01 at Smokey Lithium, which is 22 miles southwest of [American Lithium Corp.](#)'s TLC deposit.

VANCOUVER, June 26, 2023 - Victory Battery Metals (CSE:VR)(OTC PINK:VRCFF)(FWB:VR6) ("Victory" or the "Company") is extremely pleased to provide additional information from its Phase 2 drilling program at its Smokey Lithium Nevada property, demonstrating high-grade Li claystone mineralization over significant widths, comparing favorably to American Lithium's (TSXV: LI) (OTCQB: LIACF) previously reported "high-grade" in-fill drilling results for their TLC claystone Li deposit.¹

Victory is currently planning a follow-up exploration and drilling program on their 100% owned Smokey Lithium Project in Nevada, where a thick sequence of high-grade claystone lithium mineralization was reported in diamond drill hole 23-01, presented in Table 1.

Table 1. High-Grade Claystone Li Intervals DDH 23-01

Drill Hole ID	Top (m)	Bottom (m)	Interval (m)	Grade (Li ppm)	Lower Cut (Li ppm)
DDH 23-01	127.0	160.8	33.8	1149	600
including	132.3	158.1	25.8	1267	600

The results of this hole, using a 600 ppm Li cut-off, compare well with high-grade infill resource holes reported by [American Lithium Corp.](#) on April 3, 2019, at their TLC lithium claystone project in the same richly mineralized Esmeralda lithium belt in Nevada, as presented in Table 2.

Table 2. * High Grade Claystone Li Resource Infill Holes - [American Lithium Corp.](#) TLC Deposit

Drill Hole ID	Top (m)	Bottom (m)	Interval (m)	Grade (Li ppm)	Lower Cut (Li ppm)
TLC-1902	27.4	63.8	36.4	1,084	600
TLC-1903	41.1	83.8	42.7	994	600
TLC-1904	24.4	68.6	44.2	934	600

Highly attractive high-grade Li claystone deposits of the rich Esmeralda lithium belt in mining-friendly Nevada are represented by large volumes of open-pit table, near-surface, relatively flat laying, free digging lithium mineralization amenable to low-cost, sustainable mining methods. The current January 2023 Mineral

Resource Estimate and Technical Report published recently by Stantec Consulting Services Inc. ("Stantec")², for [American Lithium Corp.](#)'s TLC deposit reported a Measured Resource of 4.2 Mt Lithium Carbonate Equivalent ("LCE") (860 Mt @ 924 ppm Li), an Indicated Resource of 4.63 Mt LCE (1192 Mt @ 727 ppm Li) and an Inferred Resource of 1.86 Mt LCE (486 Mt @ 713 ppm Li) using a cut-off grade of 500 ppm Li to an open pit vertical depth limit of 274 meters.**

Victory is now planning to define the subsurface extensions of the thick claystone interval discovered in DDH 23-01. A geophysical approach will be taken to map basement faults and potentially conductive claystone units to outline the depth and continuity of favourable thick high-grade lithium claystone units present on the property prior to the next phase of drilling.

Mr. Mark Ireton, Victory President and CEO noted: "Victory's Geology team has is very encouraged by these preliminary results, noting that these types of deposits do not exist in isolation. As noted on June 12th, our team has expanded the Smokey Lithium ground in response to the drill program findings and analysis. Going forward our team is focused on defining the main body of this deposit."

² The Stantec Mineral Resource estimate was prepared by Derek Loveday, P. Geo. of Stantec Consulting Services Ltd. in conformity with CIM "Estimation of Mineral Resource and Mineral Reserves Best Practices" guidelines and reported in accordance with the Canadian Securities Administrators NI 43-101. Mineral resources are not mineral reserves and do not have demonstrated economic viability. There is no certainty that any mineral resource will be converted into mineral reserves.

About Smokey Lithium, Nevada

Victory's Smokey Lithium project is a clay lithium property that lies approximately 20 miles north of Clayton Valley, to the west of American Lithium's flagship lithium project. Smokey Lithium is located northwest of Cypress' Clayton Valley Lithium Project and to the southwest of [American Lithium Corp.](#)'s Tonopah Lithium Claims Property in southwest Nevada. Esmeralda County Nevada is a prolific region for lithium clay deposits, (Noram, Cypress, American Lithium, Spearmint, Enertopia, and Jindalee).

About Victory Battery Metals

VICTORY BATTERY METALS (CSE: VR) is a publicly traded diversified investment corporation with mineral interests in North America. The Company is also actively seeking other exploration opportunities.

Neither the Canadian Securities Exchange nor its Regulation Services Provider (as that term is defined in the policies of the Canadian Securities Exchange) accepts responsibility for the adequacy or accuracy of this release.

Forward Looking Statements

Certain information set forth in this news release may contain forward-looking statements that involve substantial known and unknown risks and uncertainties. All statements other than statements of historical fact are forward-looking statements, including, without limitation, statements regarding future financial position, business strategy, use of proceeds, corporate vision, proposed acquisitions, partnerships,

joint-ventures and strategic alliances and co-operations, budgets, cost and plans and objectives of or involving the Company. Such forward-looking information reflects management's current beliefs and is based on information currently available to management. Often, but not always, forward-looking statements can be identified by the use of words such as "plans", "expects", "is expected", "budget", "scheduled", "estimates", "forecasts", "predicts", "intends", "targets", "aims", "anticipates" or "believes" or variations (including negative variations) of such words and phrases or may be identified by statements to the effect that certain actions "may", "could", "should", "would", "might" or "will" be taken, occur or be achieved. A number of known and unknown risks, uncertainties and other factors may cause the actual results or performance to materially differ from any future results or performance expressed or implied by the forward-looking information. These forward-looking statements are subject to numerous risks and uncertainties, certain of which are beyond the control of the Company including, but not limited to, the impact of general economic conditions, industry conditions and dependence upon regulatory approvals. Readers are cautioned that the assumptions used in the preparation of such information, although considered reasonable at the time of preparation, may prove to be imprecise and, as such, undue reliance should not be placed on forward-looking statements. The Company does not assume any obligation to update or revise its forward-looking statements, whether as a result of new information, future events, or otherwise, except as required by securities laws.
