

# Tectonic Metals Engages Market Climber for Investor Relations Services

30.06.2023 | [ACCESS Newswire](#)

VANCOUVER, June 30, 2023 - [Tectonic Metals Inc.](#) (TSXV:TCT) ("Tectonic" or the "Company") a mineral exploration company focused on acquiring, exploring, and developing district-scale projects in politically stable jurisdictions, today announced that it has entered into an agreement with Market Climber Inc. ("MCI") for investor relations services, subject to TSX Venture Exchange acceptance.

In accordance with TSXV Corporate Finance Policy 3.4 (Investor Relations, Promotional and Market-Making Activities), MCI has been engaged to enhance the capital market's awareness and understanding of Tectonic through a comprehensive corporate communication and investor relations program. The services include the enhancement of corporate marketing materials, investor targeting, investor engagement through select channels, relationship management, and other strategic capital market advisory.

"As we move towards identifying, discovering and delineating more gold mineralization at Flat, and more specifically, Chicken Mountain, we have engaged MCI to enhance the market's understanding of the potential of this intrusive complex where all 55 drill holes to-date have intersected gold," said Tony Reda, President and Chief Executive Officer of Tectonic. "Preliminary metallurgical analysis to-date has demonstrated rapid leach kinetics and gold recoveries averaging 95%. This, combined with gold intersections at or near surface, suggest Chicken Mountain could represent an open pit, heap leach opportunity. Given the critical milestones anticipated for 2023, now is the right time to enhance our engagement with the capital markets."

MCI is an award-winning investor relations firm with an extensive track record of unlocking value through a comprehensive approach to investor relations. By helping clients be clear with their message, compelling with their marketing materials, and connected to the capital markets, MCI has consistently improved its clients' engagement with the street. This enhanced engagement has led to numerous IR awards including IR Magazine's 2022 award for Best Investor Relations. MCI has served clients on every major North American exchange, across a wide range of industries, with enterprise values from under \$10 million to more than \$10 billion.

Under the terms of the agreement, the Company has agreed to engage MCI on a month-to-month basis effective today for CA\$10,000 per month, plus applicable taxes and reasonable expenses. At the time of this announcement, neither MCI nor its principals have any direct or indirect interest in Tectonic securities.

About Tectonic Metals Inc. ("Tectonic" or the "Company")

Tectonic brings a highly disciplined capital allocation and development process to mineral exploration. By consistently limiting their focus to tier 1 opportunities that fit their formula for mine economics, and de-risking projects upfront, the team has established a tremendous track record of success. Members of the Tectonic team have been directly involved in identifying and monetizing several significant gold discoveries throughout N. America that have created a tremendous amount of value for shareholders and stakeholders.

Tectonic is currently assessing the Flat Gold Project in partnership with Doyon Limited, one of Alaska's largest native regional corporations and a significant Tectonic investor. Flat is home to Chicken Mountain, which is credited as the source of 1.4 million ounces of historic placer gold production. Tectonic is currently evaluating this target, which features a four-kilometer gold in-soil anomaly and 55 historic drill holes, all of which hit and 25 of which ended in gold mineralization. Preliminary metallurgical analysis to-date has demonstrated rapid leach kinetics and gold recoveries averaging 95%. This, combined with gold intersections at or near surface, suggest Chicken Mountain could represent an open pit, heap leach opportunity. Chicken Mountain is part of a larger geophysical anomaly that appears to represent a 70 square kilometer intrusion related gold system that incorporates the additional targets of Golden Apex and Chicken

Mountain East.

#### Cautionary Note Regarding Forward-Looking Statements

Certain information in this news release constitutes forward-looking information and statements under applicable securities law. Any statements that are contained in this news release that are not statements of historical fact may be deemed to be forward-looking statements. Forward-looking statements are often identified by terms such as "may", "should", "anticipate", "expect", "intend" and similar expressions and include, but are not limited to, the potential for mineralization at Tectonic's projects, any future exploration activities and the size; the receipt of any regulatory approvals, including the final approval of the TSXV.

Forward-looking information is not a guarantee of future performance and is based upon a number of estimates and assumptions of management at the date the statements are made including, among others, assumptions about future prices of gold and other metal prices, currency exchange rates and interest rates, favourable operating conditions, political stability, obtaining governmental and other approvals and financing on time, obtaining required licenses and permits, labour stability, stability in market conditions, availability of equipment, accuracy of any mineral resources, successful resolution of disputes and anticipated costs and expenditures. Many assumptions are based on factors and events that are not within the control of Tectonic, and there is no assurance they will prove to be correct.

Although Tectonic considers these beliefs and assumptions to be reasonable based on information currently available to it, they may prove to be incorrect, and the forward-looking statements in this release are subject to numerous risks, uncertainties and other factors that may cause future results to differ materially from those expressed or implied in such forward-looking statements. Forward-looking statements necessarily involve known and unknown risks, including, without limitation: the Company's ability to implement its business strategies; risks associated with mineral exploration and production; risks associated with general economic conditions; adverse industry events; marketing and transportation costs; loss of markets; volatility of commodity prices; inability to access sufficient capital from internal and external sources, and/or inability to access sufficient capital on favourable terms; industry and government regulation; changes in legislation, income tax and regulatory matters; competition; currency and interest rate fluctuations; and other risks.

Readers are further cautioned not to place undue reliance on forward-looking statements as there can be no assurance that the plans, intentions or expectations upon which they are placed will occur. Such information, although considered reasonable by management at the time of preparation, may prove to be incorrect and actual results may differ materially from those anticipated. Forward-looking statements contained in this news release are expressly qualified by this cautionary statement. Although Tectonic has attempted to identify important factors that could cause actual results to differ materially from those contained in forward-looking information, there may be other factors that cause results not to be as anticipated, estimated or intended. There can be no assurance that such information will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking information. Tectonic does not undertake to update any forward-looking information, except in accordance with applicable securities laws.

Neither the TSX Venture Exchange nor its Regulation Service Provider (as that term is defined in the policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this release.
