Blue Thunder Mining to Present a Live-Video Webinar for Its Focus on Critical Metals

11.07.2023 | Newsfile

Toronto, July 11, 2023 - <u>Blue Thunder Mining Inc.</u> (TSXV: BLUE) ("Blue Thunder" or the "Company") announces that the Dorian L. (Dusty) Nicol CEO, and Chad Williams Non-Executive Chairman, will be presenting a live-video webinar and Q&A on Thursday, July 13th at 1pm (Eastern Daylight Time). Those wishing to participate in this video-webinar can do so by registering with Michelle Savella at msavella@bluethundermining.com.

The Company announced on July 7, 2023, that it has signed a binding letter of intent with a company owned by Mr. Williams to acquire a property package consisting of eleven projects in the Yukon hosting highly prospective targets for copper, cobalt, tin, and tungsten. Please refer to the Company's July 7, 2023, news release for further information about this transaction.

Dorian L. (Dusty) Nicol, the Company's CEO, commented, "We look forward to discussing Blue Thunder's pivot to the critical metals space during our upcoming webinar. We are very excited about the opportunities that we are generating. The Yukon property package is an excellent start. Initial work there will focus on the Batt copper-cobalt project, as it is closest to having identified drill targets. Ongoing work on our Muus property in Quebec will focus on the copper targets identified during last year's field work. We are also in final negotiations to acquire a portfolio of lithium projects in Saint James Bay, Quebec and in Nevada, which we expect to announce shortly. These, as well as other projects we will acquire in due course, will allow us to generate shareholder value within this ever-increasingly important space of critical metals."

About Blue Thunder

Blue Thunder is a gold exploration company that controls 100% of a large land position near Chibougamau, Québec. The Muus Gold project covers approximately 51,000 hectares in five separate blocks of prospective ground in the eastern part of the Abitibi Greenstone Belt. The Project is considered particularly prospective for gold mineralization, as a series of prominent ductile and brittle fault-sets transect the Project, including the Guercheville and Fancamp deformation zones, both of which are associated with numerous past and currently producing precious- and base metal mines in the district.

ON BEHALF OF THE BOARD

Dorian L. (Dusty) Nicol, CEO & Director

Company, are forward-looking statements. Although the Company believes that such statements are reasonable, it can give no assurance that such expectations will prove to be correct. Forward-looking statements are typically identified by words such as: believe, expect, anticipate, intend, estimate, postulate and similar expressions, or are those, which, by their nature, refer to future events. The Company cautions investors that any forward-looking statements by the Company are not guarantees of future results or performance, and that actual results may differ materially from those in forward-looking statements as a result of various factors, including, but not limited to, the state of the financial markets for the Company's equity securities, the state of the commodity markets generally, variations in the nature, the analytical results from surface trenching and sampling program, including diamond drilling programs, the results of IP surveying, the results of soil and till sampling program, the quality and quantity of any mineral deposits that may be located, variations in the market price of any mineral products the Company may produce or plan to produce, the inability of the Company to obtain any necessary permits, consents or authorizations required, including Exchange acceptance, for its planned activities, the inability of the Company to produce minerals from its properties successfully or profitably, to continue its projected growth, to raise the necessary capital or to be fully able to implement its business strategies, the potential impact of COVID-19 (coronavirus) on the Company's exploration program and on the Company's general business, operations and financial condition, and other risks and uncertainties. All of the Company's Canadian public disclosure filings may be accessed via www.sedar.com and readers are urged to review these materials, including the technical reports filed with respect to the Company's mineral properties. This news release contains information with respect to adjacent or similar mineral properties in the Chibougamau District in respect of which the Company has no interest or rights to explore or mine. Readers are cautioned that the Company has no interest in or right to acquire any interest in any such properties, and that mineral deposits, and the results of any mining thereof, on adjacent or similar properties, are not indicative of mineral deposits on the Company's properties or any potential exploitation thereof.
