Table 1: Olive NAV Breakdown

Black Sheep Income Corp.	Private	\$1,268,923	\$0.011

Other Investments		\$1,402,014	\$0.013

1. Working Capital is calculated as cash, minus management's estimate for known liabilities and is subject to change with future estimates or financial reports.
2. Olive defines Liquid Investments as investments whose position can be liquidated in less than one day's average trading volume for that security.

Samuel Pelaez, the Company's President, CEO, CIO and Director, stated: "Major commodities and resource sectors rebounded in July. Major central banks around the world continue to pursue tighter monetary policy, with the notable exception of China, whose central bank injected liquidity into capital markets. In the U.S., a strong rebound in treasury issuance followed the resolution of the debt ceiling. This policy has led to an increase in liquidity, a weakening of the U.S. dollar, and an increase in risk appetite globally."

Derek Macpherson, Executive Chairman, stated: "Strong performance by Hudbay Minerals Inc., has driven up Rockcliff's share price, increasing Olive's NAV in the month. It is worth noting that on July 31, Olive's share price was trading at a greater than 25% discount to the value of its Rockcliff position alone and closed the month at a greater than 60% discount to NAV per share. With this valuation gap in-mind the Company plans to continue with the ongoing normal course issuer bid ("NCIB")."

As of July 31, 2023 the Company has repurchased 1,300,000 shares pursuant to the NCIB. These shares are currently held in treasury pending cancellation.

As of the date of this release [Olive Resource Capital Inc.](#) has 111,768,709 common shares outstanding.

Use of Non-GAAP Financial Measures:

This press release contains references to NAV or "net asset value per share" which is a non-GAAP financial measure. NAV is calculated as the value of total assets less the value of total liabilities divided by the total number of common shares outstanding as at a specific date. The term NAV does not have any standardized meaning according to GAAP and therefore may not be comparable to similar measures presented by other companies. There is no comparable GAAP financial measure presented in the Company's consolidated financial statements and thus no applicable quantitative reconciliation for such non-GAAP financial measure. The Company believes that the measure provides information useful to its shareholders in understanding the Company's performance, and may assist in the evaluation of the Company's business relative to that of its

peers. This data is furnished to provide additional information and does not have any standardized meaning prescribed by GAAP. Accordingly, it should not be considered in isolation or as a substitute for measures of performance prepared in accordance with GAAP, and is not necessarily indicative of other metrics presented in accordance with GAAP. Existing NAV of the Company is not necessarily predictive of the Company's future performance or the NAV of the Company as at any future date.
