

GFG Provides Update on Rattlesnake Hills Gold Project Option Agreement with Group 11 Technologies

11.09.2023 | [GlobeNewswire](#)

SASKATOON, Sept. 11, 2023 - [GFG Resources Inc.](#) (TSXV: GFG) (OTCQB: GFGSF) ("GFG" or the "Company") announces the termination of its option and earn-in agreement (the "Agreement") with Group 11 Technologies Inc. ("Group 11"), a privately-owned corporation, to advance GFG's Rattlesnake Hills Gold Project (the "Project") in Wyoming, United States. Under the terms of the Agreement, Group 11 had the right to acquire, in multiple stages, up to 70% of the Project by completing a series of exploration and development expenditures and making staged cash and equity payments to GFG. The Project remains 100% owned and controlled by GFG.

Brian Skanderbeg, President and CEO of GFG commented, "Through our Agreement and the positive metallurgical results from Rattlesnake Hills, Group 11 demonstrated the real potential for In-Situ Recovery application to be used in the gold industry. We remain an equity holder in Group 11 and wish them the best as they continue to advance the development and application of this innovative technology. Moving ahead, GFG owns 100% ownership in this district-scale gold property and will undertake a strategic review to evaluate the best path forward to advance the Project and maximize shareholder value."

"We remain fully committed and well-funded to continue our exploration efforts in the Timmins belt, where we hold three district-scale land positions and are launching an aggressive drill program at Montclerg and advancing regional targeting efforts across Goldarm, Pen and Dore land positions."

As GFG advances its strategic review of the Project, the Company will provide an update to the market.

The Rattlesnake Hills Gold Project

The Rattlesnake Hills Gold Project is a gold exploration project located in central Wyoming approximately 100 km southwest of Casper. The Project is centrally located within a roughly 1,500-kilometre-long belt of alkalic intrusive complexes that occur along the eastern side of the Rocky Mountains from Montana to New Mexico.

The Project has approximately 95,000 m of drilling which has outlined three significant zones of alteration and precious metal mineralization that are associated with Eocene age alkalic intrusions at North Stock, Antelope Basin and Blackjack. The majority of the drilling has focused on near surface, open pit targets in the North Stock and Antelope Basin area with highlights that include intercepts⁽¹⁾ of 1.85 grams of gold per tonne ("g/t Au") over 236.2 metres ("m") hole length; 4.20 g/t Au over 77.7 m hole length; 2.08 g/t Au over 150.9 m hole length and 0.82 g/t Au over 99.1 m hole length. In addition to the outlined zones of mineralization, the Company believes that the district is highly prospective and has outlined several kilometre-scale greenfield targets that have never been drill tested. These greenfield targets were generated from the Company's geophysical and geochemical programs and host strong similarities to the North Stock and Antelope Basin systems.

(1) Gold intervals reported are based on a 0.20 g/t or 0.50 g/t Au cutoff. Weighted averaging has been used to calculate all reported intervals. True widths are estimated at 60-100% of drilled thicknesses.

About GFG Resources Inc.

GFG is a North American precious metals exploration company focused on district scale gold projects in tier one mining jurisdictions, Ontario and Wyoming. In Ontario, the Company operates three gold projects, each large and highly prospective gold properties within the prolific gold district of Timmins, Ontario, Canada. The projects have similar geological settings that host most of the gold deposits found in the Timmins Gold Camp which have produced over 70 million ounces of gold. The Company also owns 100% of the Rattlesnake Hills

Gold Project, a district scale gold exploration project located approximately 100 km southwest of Casper, Wyoming, U.S.

Qualified Persons

Brian Skanderbeg, P.Geo. and M.Sc., President and CEO, is the Qualified Person for the information contained in this press release and is a Qualified Person within the meaning of National Instrument 43-101. Mr. Skanderbeg has reviewed the sampling and QA/QC procedures and results thereof as verification of the sampling data disclosed above and has approved the information contained in this news release.

Quality Analysis and Quality Control

The quality analysis and quality control measures utilized by [Evolving Gold Corp.](#) in respect of the historical drilling data disclosed above included the following: drill hole intervals were weighted averages with each assay interval weighted according to the core length. Rigorous quality assurance and quality control procedures were implemented including routine insertion of internal standard reference materials, certified reference materials, blank material and duplicate samples from both crush and pulp material. Gold assays were completed by SGS Canada Inc. in Toronto, using a 30-gram charge, fire assay, with an ICP finish. SGS Canada laboratory in Toronto is ISO accredited.

CAUTION REGARDING FORWARD-LOOKING INFORMATION

All statements, other than statements of historical fact, contained in this news release constitute "forward-looking information" within the meaning of applicable Canadian securities laws and "forward-looking statements" within the meaning of the United States Private Securities Litigation Reform Act of 1995 (referred to herein as "forward-looking statements"). Forward-looking statements include, but are not limited to, the Company's future exploration plans with respect to its property interests and the timing thereof, the prospective nature of the projects, future price of gold, success of exploration activities and metallurgical test work, permitting time lines, currency exchange rate fluctuations, requirements for additional capital, government regulation of exploration work, environmental risks, unanticipated reclamation expenses, title disputes or claims and limitations on insurance coverage. Generally, these forward-looking statements can be identified by the use of forward-looking terminology such as "plans", "expects" or "does not expect", "is expected", "budget", "scheduled", "estimates", "forecasts", "intends", "anticipates" or "does not anticipate" or "believes", or the negative connotation thereof or variations of such words and phrases or state that certain actions, events or results, "may", "could", "would", "will", "might" or "will be taken", "occur" or "be achieved" or the negative connotation thereof.

All forward-looking statements are based on various assumptions, including, without limitation, the expectations and beliefs of management, the assumed long-term price of gold, that the Company will receive required permits and access to surface rights, that the Company can access financing, appropriate equipment and sufficient labour, and that the political environment within Canada and the United States will continue to support the development of mining projects in Canada and the United States. In addition, the similarity or proximity of other gold deposits to the Company's projects is not necessarily indicative of the geological setting, alteration and mineralization of the Rattlesnake Hills Gold Project, the Goldarm Property, the Pen Gold Project and the Dore Gold Project.

Forward-looking statements are subject to known and unknown risks, uncertainties and other factors that may cause the actual results, level of activity, performance or achievements of GFG to be materially different from those expressed or implied by such forward-looking statements, including but not limited to: actual results of current exploration activities; environmental risks; future prices of gold; operating risks; accidents, labour issues and other risks of the mining industry; availability of capital, delays in obtaining government approvals or financing; and other risks and uncertainties. These risks and uncertainties are not, and should not be construed as being, exhaustive.

Although GFG has attempted to identify important factors that could cause actual results to differ materially from those contained in forward-looking statements, there may be other factors that cause results not to be as anticipated, estimated or intended. There can be no assurance that such statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. In addition, forward-looking statements are provided solely for the purpose of providing information about management's current expectations and plans and allowing investors and others to get a better understanding of our operating environment. Accordingly, readers should not place undue reliance on forward-looking statements.

Forward-looking statements in this news release are made as of the date hereof and GFG assumes no obligation to update any forward-looking statements, except as required by applicable laws.
