

# Boots-on-the-Ground Work Program commences at the Jupiter Lithium Project in James Bay, Quebec

12.09.2023 | [The Newswire](#)

Vancouver, Sept. 12, 2023 - [Green Battery Minerals Inc.](#) ("Green" or the "Company") (TSX-V:GEM) (FSE:BK2P) (WKN:A2QENP) (OTC:GBMIF) is pleased to announce it has commenced a work program at the highly prospective Jupiter Lithium Property in James Bay, following the successful acquisition of the project in early 2023 (see May 4th, 2023 news release) where numerous pegmatite observations have been reported.

Tom Yingling, President and CEO of GEM Commented: "We are commencing aggressive 2023 exploration on our Jupiter Lithium property with a ground-truthing, "Boots-on-the-ground" program. Our project, located in the resource prolific James Bay area, benefits from up to 33 pegmatite descriptions that have been documented. We are now advancing this historical information and are targeting the identification of potential lithium -bearing minerals. Jupiter Lithium property is surrounded by some of the biggest lithium projects in North America, including the James Bay and Rose deposits, as well as [Patriot Battery Metals Inc.](#)'s (TSX-PMET) project. The findings at these projects have created significant shareholder value for many companies working in the area. Based on these nearby discoveries and the presence of a large number of documented pegmatite on the property, we believe we are well positioned to drive additional value for our shareholders too, contingent on the results of this program."

## Helicopter-Assisted Rock Sampling Program

The Green Battery team is currently evaluating the 33 pegmatite locations at the property; with a view to reviewing each during the work program that is to commence this week at the primary target areas.

The experienced team at Axiom Group have been secured to manage the helicopter assisted rock sampling program at the Jupiter Property. Two teams are currently mobilizing to the KM381 base near the property to commence the field program.

Teams will be aggressively covering the ground where the clusters of pegmatites have been identified already, in the field, by government geologists. Where favorable outcrops are encountered, Axiom Group will systematically map and sample the outcrops and will submit the samples collected to SRC Laboratories for comprehensive analysis following the field program.

## About the Jupiter Property

The Jupiter Property was optioned to explore for Lithium (LCT) Pegmatites, and Rare Earth Elements ("REE"). The property is an early-stage exploration opportunity which comprises a total of 122 Quebec mineral exploration claims which amount to a total of 6406 hectares. Up to 33 pegmatite occurrences have been identified by government mapping completed over the property. Rock samples collected adjacent to the property returned up to 315ppm lithium. These claims are strategically located within the James Bay lithium prospectivity area within which are the Nemaska Lithium, James Bay Lithium and Rose Critical Elements deposits. The Jupiter Property fulfills the Companies goal of providing additional battery elements that go into Lithium-Ion batteries.

## Property Highlights

- The Jupiter property is located within the La Grande geological sub-province, near the boundary with the Opinaca Sub province within a favorable host rock comprising "typically porphyritic and magnetic tonalite; with minor injections of pink pegmatite".
- Up to 33 pegmatite occurrences have been identified by government mapping completed over the property. Rock samples collected adjacent to the property returned up to 315ppm lithium.
- The acquired claims are located over regionally elevated lake bottom sediment geochemical anomalism for Lithium, with values up to 100ppm along the down ice trend of the property.
- Float Plane and Helicopter accessible, approximately 175 km south of Radisson, and 25 km southwest of the Eleonore Mine and Airstrip. The northern infrastructure corridor comprising 'Rte de la Baie-James' provincial highway and three Power transmission lines is located approximately 35 - 50km east of the property.

#### Green Battery Metal Critical Minerals Property Portfolio:

- Berkwood Graphite Project - Quebec. Graphite Project
- Jupiter - Quebec. Lithium Pegmatite (LCT) prospect
- Stallion - British Columbia. Copper Propyry, Epithermal Au+Ag prospect
- Boudrias - Quebec. Nickel Copper (PGE) prospect

#### About the Berkwood Graphite Project

The Berkwood Graphite Project is located within the jurisdiction of Quebec, in the Manicouagan Regional County Municipality, three hours driving time from the city of Baie-Comeau. Easy access is provided via a major secondary road and numerous tertiary and forest roads that traverse the property.

The Zone 1 deposit lies 8 km southwest of Nouveau Monde's deposit which has a \$3.5 billion NPV on it. The Companies Zone 1 deposit, and that of Nouveau Monde, share many similar geological characteristics, with the Zone 1 deposit being of exceptionally high grade and coarse flake size by global standards.

The current mineral resource at the Berkwood Graphite Project includes in-pit constrained resource totalling 1,755,300 tonnes of indicated resources at 17.00 % Cgr and 1,526,400 tonnes in inferred resources at 16.39 % Cgr.

Table 2: In-pit Resource at Lac Gueret South Project (rounded numbers)

Current Resources (as of June 17th, 2019)

Minerals Resources Category	Tonnage (Mt)	Grade (% Cgr)	Cgr (t)	Cut off
Indicated	1.76	17.0	299,200	6.81%
Inferred	1.53	16.4	250,200	6.81%

The mineral resource estimates above are described in the technical report entitled, NI 43-101 Technical Report Mineral Resource Estimate on the Lac Gueret South Graphite Property, Quebec, Canada. With an Effective date of June 30th, 2019, by Edward Lyons, PGeo., Florent Baril, ing., and Claude Duplessis, ing.

Qualified Person: Mr. Luke van der Meer, P.Geo. is a Qualified Person ("QP") as defined by National Instrument 43-101 guidelines, and he has reviewed and approved the technical content of this news release.

Or

Qualified Person: Maxime Bouchard, Geo., M.Sc., (OGQ #1752) of Laurentia Exploration Inc. (3415, rue de l'Énergie Jonquière, Québec G7X 0J6), an independent Qualified Person as defined by Canadian NI 43-101 standards, has reviewed, and approved the geological information reported in this news release.

About the Company: Green Battery Minerals is managed by a team with over 150 years collectively with a proven track record of not just finding numerous mines but building and operating them too. The Green Battery Mineral management team's most recent success is discovering the Berkwood graphite resource in Northern Quebec. Green Battery Mineral owns this asset 100 percent, and the Company's shareholders will benefit from this asset as the demand for Graphite for electric vehicles increases significantly.

**Disclaimer for Forward-Looking Information:**

Certain statements in this document which are not purely historical are forward-looking statements, including any statements regarding beliefs, plans, expectations or intentions regarding the future. Forward looking statements in this news release include that the Company will carry out the drill program described in this news release, conduct the Offering and expend funds on Berkwood Graphite Project exploration. It is important to note that the Company's actual business outcomes and exploration results could differ materially from those in such forward-looking statements. Risks and uncertainties include that further permits may not be granted timely or at all; the mineral claims may prove to be unworthy of further expenditure; there may not be an economic mineral resource; methods we thought would be effective may not prove to be in practice or on our claims; economic, competitive, governmental, environmental and technological factors may affect the Company's operations, markets, products and prices; our specific plans and timing drilling, field work and other plans may change; we may not have access to or be able to develop any minerals because of cost factors, type of terrain, or availability of equipment and technology; and we may also not raise sufficient funds to carry out our plans. Additional risk factors are discussed in the section entitled "Risk Factors" in the Company's Management Discussion and Analysis for its recently completed fiscal period, which is available under Company's SEDAR profile at [www.sedar.com](http://www.sedar.com). No assurance can be given that any of the events anticipated by the forward-looking statements will occur or, if they do occur, what benefits the Company will obtain from them. These forward-looking statements reflect management's current views and are based on certain expectations, estimates and assumptions, which may prove to be incorrect. Except as required by law, we will not update these forward-looking statement risk factors.

Neither TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of

the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this release.
