

QX Resources Ltd: Quarterly Activities Report

31.10.2023 | [ABN Newswire](#)

Perth, Australia - [QX Resources Ltd.](#) (ASX:QXR) holds four 100% owned hard-rock lithium projects, covering 355km², strategically centred around Western Australia's prolific Pilbara province, hosting some of Australia's largest lithium deposits.

QXR projects are Turner River (E45/6042 & E45/6065), Western Shaw (E45/4960 & E45/6107), Split Rock (E46/1367) and Yule River (E45/6159).

Pegmatites were identified outcropping at Western Shaw and Split Rock during the September quarter, as part of a month-long program of surface rockchip sampling and further geological mapping across all four hard rock lithium projects. This program focused on the key target of the contact zone between greenstones and granitoids known to be permissive for lithium mineralisation of the Split Rock Supersuite with which the Wodgina, Pilgangoora and Global Lithium deposits are associated.

Detailed high-resolution airborne geophysics was also undertaken at the Turner River Project, including detailed spectral image analysis around areas of pegmatites.

Once assays have been received, the Company plans to follow up the sampling program with extensive trenching and sampling across new areas of interest prior to follow-up drilling.

Previously, at the Turner River hard rock lithium project (E45/6065, E45/6042), located 15km to south-east of Mineral Resources' Wodgina lithium mine, an initial drilling program confirmed a lithium mineralisation halo, around high surface lithium grades recovered from 5-15 kg sample blocks of lithium rich micas together with pegmatites. Sampling will be extended near the recently drilled area.

About QX Resources Ltd:

[QX Resources Ltd.](#) (ASX:QXR) is focused on exploration and development of battery minerals, with hard rock lithium assets in a prime location of Western Australia (WA), and gold assets in Queensland. The aim is to connect end users (battery, cathode and car makers) with QXR, an experienced explorer/developer of battery minerals, with an expanding mineral exploration project portfolio and solid financial support.

Lithium portfolio: QXR's lithium strategy is centred around WA's prolific Pilbara province, where it has acquired a controlling interest in four projects through targeted M&A - all of which sit in strategic proximity to some of Australia's largest lithium deposits and mines. Across the Pilbara, QXR's regional lithium tenement package (both granted or under application) now spans more than 350 km².

Gold portfolio: QXR is also developing two Central Queensland gold projects - Lucky Break and Belyando - through an earn-in agreement with Zamia Resources Pty Ltd. Both gold projects are strategically located within the Drummond Basin, a region that has a >6.5moz gold endowment.
