Novo's 2023 Sustainability Report demonstrates that while the business strategy has shifted from production to exploration, the commitment to sustainability remains unchanged and the Company's stakeholders, including local communities and traditional owners, have been and continue to be integral to success.

"Collectively these documents will guide us as we continue to make meaningful investments in the communities in which we operate.

"In the year to come we will continue to listen to our stakeholders, and support our people and communities, with a focus on minimising risk and maximising opportunities. We would sincerely like to thank the Novo team, along with our communities and Traditional Owners for their dedication and ongoing support and contribution to our sustainability efforts this past year."
