Vale-Mundoro Projects, Serbia

- Completion of Phase II Drill Program at Skorusa Target: In Q3-2023, a phase II drill program was completed that followed up on previous AMT geophysical anomalies and mineralization at depth. The program drilled 1004.4 meters in a single drill hole. Assay results are expected in Q4-2023.
- Completion of Drilling at Prekostenski Target: In Q3-2023, 291 meters of diamond drilling was completed on a drill hole at the Prekostenski target, testing for possible extensions of mineralization intersected in previous drilling campaigns in areas with geophysical anomalies.
- Advancing Exploration for Upcoming Drill Programs: In Q3-2023, a passive seismic geophysical survey was completed over three target areas, for which the initial geophysical interpretations were received. In addition, in Q3-2023, a regional structural interpretation was completed to improve the understanding of the structural setting and targeting in the Timok region. A Phase I drilling program at Branik to follow up on mineralized ore clasts intersected in a previous drilling campaign is planned for Q4-2023 for a total of up to 750 meters with the assays expected in Q1-2024. A Phase II drill program of 1,600 meters is planned for the Markov Kamen South target area to follow up on potential extensions to mineralization intersected during previous drilling campaigns. Drilling is anticipated to be completed in Q4-2023 with assay results from this drill program anticipated in Q1-2024. A Phase II drilling program is planned for 800 meters at the Bacevica North target to follow up areas of interest identified with geochemistry and geophysics. Drilling will commence in Q4-2023 with the assays expected in Q4-2023 or Q1-2024.

Kinross-Mundoro Project

- Focused on Community Engagement: In Q3-2023, the work program focused on community engagement and permitting in preparation for future drilling.

BHP-Mundoro Projects

- Completion of Drilling: In Q3-2023, a follow up drill program to test the extension of an IP anomaly to the south of the East Zone at the south end of the property was completed with one drill hole of 600.5 meters, with assay results expected in Q4-2023. Additionally, a ground gravity survey was completed measuring gravity at 1400 stations across the project, with geophysical interpretation expected in Q4-2023.
- Advancing Exploration for Upcoming Drill Programs: In Q3-2023, a follow-up grid-based soil geochemical sampling survey covering the Vitinovac and Ponor licenses was completed. In Q3-2023 a ground gravity survey was completed measuring 1022 stations across the license area. Initial geophysical interpretations are expected in Q4-2023. A Phase I drilling program is planned to test one target area within the Vitinovac license during Q4-2023.

JOGMEC-Mundoro Project

- Advancing Exploration for Upcoming Drill Program: In Q3-2023, a soil geochemical survey and geological mapping was completed. In addition, a follow up AMT geophysical survey for a total of 27 line kilometers was completed with geophysical interpretations expected in Q4-2023. A Phase I drill program is planned for 1,900 meters after receiving all relevant permissions from the local government agencies.

Vale-Mundoro Projects, Arizona, USA

- Preparation for Upcoming Drill Program in Dos Cabezas: In Q3-2023, a drill contractor mobilized on to the project in preparation for the Phase 1 Drill Program to commence Q4-2023 over three target areas: Mineral Park, Mescal Canyon and Casey Copper Canyon.
- Advancing Exploration for Upcoming Drill Program in Picacho: In Q3-2023, project wide drone magnetic and ground gravity surveys began, and are ongoing, with an expected completion in Q4-2023.
