The general purpose of the partnership is a collaborative effort to jointly evaluate integrating a silica sand refinement process into the ENDURING Energy Storage Application. NREL and Homerun have recognized the potential of using the novel energy storage technology to process Homerun's silica sand while providing clean reliable energy.

NREL will test the Homerun silica sand to determine the composition and suitability for use in energy storage and assess other applications of silica purification for photovoltaic (PV) glass, PV silicon or glass substrate for perovskite PV cells, and silicon anode for Li-ion batteries. The Parties will analyze the economic benefits of using Homerun's silica sand for energy storage, including energy arbitrage from energy storage and grid service, processing of the silica sand by using low-cost electricity in energy storage, and generating potential income from processed materials after its use for energy storage (e.g., high-purity silica sand for renewable materials).

About Homerun Resources

Homerun Resources is focused on the development of its business within the critical and energy materials sectors. With a steadfast commitment to operational excellence, sustainability, and building shareholder value, [Homerun Resources Inc.](#) is poised to make a lasting impact in these industries.

On behalf of the Board of Directors of
[Homerun Resources Inc.](#)
