

# Stratabound Minerals Corp. Improves Balance Sheet - \$1.6M Liability from Legacy Lawsuit Successfully Dismissed

05.01.2024 | [Newsfile](#)

Toronto, Jan. 4, 2024 - [Stratabound Minerals Corp.](#) (TSXV: SB) (OTCQB: SBMIF) ("Stratabound" or the "Company") is pleased to provide an update on a longstanding litigation matter that existed when it acquired [California Gold Mining Inc.](#) ("CGM") in August 2021. The matter involved claims from suppliers of CGM's former hemp business totalling \$USD 1,214,000 (\*\$CDN 1.6M). A Granville County, North Carolina, Court recently granted CGM's motion to dismiss the case. As a result of the dismissal of this litigation matter the Company is no longer exposed to this claim and its balance sheet has improved by approximately \$CDN 1M as compared to its balance sheet at December 31, 2022. (\*exch: \$USD = \$CDN 1.32)

Interim CEO of Stratabound, Ms. Wendy T. Chan, comments, "As part of the condition in acquiring an asset at a compelling valuation in 2021, our Company had to absorb legacy agreements and liabilities. With this legacy liability cleaned up, our Company's balance sheet further improves and positions Stratabound for a strong 2024. We are poised for growth with a focused plan to advance our mineral assets systematically and expeditiously. We are now more attractive to investors."

## ABOUT STRATABOUND MINERALS

[Stratabound Minerals Corp.](#) is a Canadian exploration and development company with grassroots and advanced exploration properties in highly prospective and safe mining jurisdictions.

Its Golden Culvert and Win Projects, Yukon, covering 99.5 km<sup>2</sup> across a 27-km strike length, are situated in a district-scale, high-grade-gold-mineralized trend within the southern portion of the Tombstone Gold Belt. Gold deposits and occurrences within the Belt include Fort Knox, Pogo, Brewery Creek and Dublin Gulch, and Snowline Gold's Valley target on its Rogue property in the Selwyn Basin.

Its McIntyre Brook Project, New Brunswick, covering 120 km<sup>2</sup> and a 17-km strike length in the emerging Triple Fault Gold Belt, is surrounded by Puma Exploration's Williams Brook Project (5.55 g/t Au over 50m) and is hosted by orogenic rocks of similar age and structure as New Found Gold's Queensway Project.

The Company is also advancing its Fremont Gold development project in the historic Mother Lode Gold Belt of California where 50,000,000 oz of gold has been produced. Fremont, located 500km north of Equinox Gold's Castle Mountain and Mesquite mines, has a PEA with an after-tax NPV of USD \$217MM, a 21% IRR, 11-year LOM, averaging 118k ounces per annum at USD \$1,750 gold. The project hosts an NI 43-101 resource of 1.16 MMoz at 1.90 g/t Au within 19.0 MMt Indicated, and 2.02 MMoz at 2.22 g/t Au within 28.3 MMt Inferred. The MRE evaluates only 1.4 km of the 4 km strike length of the Fremont property that features 4 gold-mineralized zones. Significantly, three step-out holes at depth hit structure, typical of orogenic deposits that often occur at depth. Fremont is located on private land in Mariposa, the original gold rush county and is 1.5 hours from Fresno, California. The property has year-round road access and is close to airports and rail. Please refer to the Fremont Gold project PEA dated Apr. 4, 2023 under NI 43-101 guidelines. The technical report has been reviewed and approved by independent "Qualified Persons" Eugene Puritch, P.Eng., FEC, CET, and Andrew Bradfield, P.Eng. both of P&E, and Travis Manning, P.E. of KCA.

The Company also holds a pipeline of early-stage exploration projects including the critical mineral Captain Cobalt-Copper-Gold Deposit in New Brunswick and the Dingman Gold Project, Ontario.

## QUALIFIED PERSON STATEMENT

The scientific and technical information contained in this press release has been reviewed and approved by Jonathan Victor Hill, Director, BSc (Hons) (Economic Geology - UCT), FAusIMM, and who is a "qualified person" as defined by National Instrument 43-101 - Standards of Disclosure for Mineral Projects ("NI 43-101").
