

Appia Receives Approval for 12 Additional Claim Blocks at Its PCH Rare Earths Ionic Adsorption Clay Project, Goias, Brazil

11.01.2024 | [Newsfile](#)

Total Exploration Area More Than Doubled Adding 23,412.11 Hectares, Presenting Exceptional New Potential for Additional Critical Mineral Targets

Toronto, January 11, 2024 - [Appia Rare Earths & Uranium Corp.](#) (CSE: API) (OTCQX: APAAF) (FSE: A0I0) (MUN: A0I0) (BER: A0I0) (the "Company" or "Appia") is pleased to announce the extension of its existing mining claims at the PCH project in Goias, Brazil from 17,551.07 hectares to an expansive 40,963.18 hectares across a total of 22 claim blocks. This substantial 133% increase in the current land package includes 12 new claims independently staked by the Company, but included as part of the project acquisition (details available [HERE](#)), incurring minimal costs. This strategic expansion provides Appia with an exceptional opportunity to explore this promising geological corridor to the north of its current claim zones, unveiling new avenues for potential critical mineral resource discoveries.

"The expansion of our exploration rights to 40,963.18 hectares marks a pivotal moment for Appia in Brazil as we build on the momentum achieved through our initial drilling program at the Target IV and Buriti zones," commented Stephen Burega, President, "Our dedicated Brazilian team is eager to explore the untapped potential of the northern corridor, where similar geological and geophysical features have been identified."

Burega adds, "There is huge potential in these new claim blocks as we can draw clear parallels to the favourable geology that hosts the critical rare earth minerals that initially convinced us to enter into our agreement on the PCH project. Doubling the size of our overall land package within the prolific alkali province not only reflects our commitment but also strengthens the Company's strategic plans. We aim to develop a series of potential target zones, extending the project focus for the benefit of our valued shareholders. This expansion underscores our dedication to unlocking the full spectrum of opportunities in Brazil's mineral-rich landscape."

MAP #1 - Target IV covers 193.28 hectares and Buriti covers 210.39 hectares of claim 860058/2018, which spans a total area of 1,874.6 hectares.

Target IV represents a unique high-grade critical REE mineralization zone, with the southwest quadrant displaying exceptional drill results, further details available [HERE](#). Appia's new Scandium and Cobalt discovery zone, Buriti (south of Target IV) revealed substantial findings in hole PCH-RC-116, from surface to 24 metres and remains open at depth, additional details are available [HERE](#).

CHART #1 - List of previously acquired, and newly staked, claim numbers and areas for the PCH project.

The Company remains committed to maintaining open communication with local communities, stakeholders, and regulatory bodies throughout the exploration process and will continue to disseminate information relating to our exploration activities on a timely basis.

About Appia Rare Earths & Uranium Corp. (Appia)

Appia is a publicly traded Canadian company in the rare earth element and uranium sectors. The Company is currently focusing on delineating high-grade critical rare earth elements and gallium on the Alces Lake property, as well as exploring for high-grade uranium in the prolific Athabasca Basin on its Otherside, Loranger, North Wollaston, and Eastside properties. The Company holds the surface rights to exploration for 113,837.15 hectares (281,297.72 acres) in Saskatchewan. The Company also has a 100% interest in 13,008 hectares (32,143 acres), with rare earth elements and uranium deposits over five mineralized zones in the Elliot Lake Camp, Ontario. Lastly, the Company holds the right to acquire up to a 70% interest in the PCH Project which is 17,551.07 ha. in size and located within the Goiás State of Brazil. (See June 9th, 2023 Press Release - [Click HERE](#)).

The Company successfully added 23,412.11 ha to the PCH project's total hectares with the approval of 12 new claims, bringing the overall project size to 40,963.18 ha.

Appia has 136.3 million common shares outstanding, 144.1 million shares fully diluted.
